 John T. Lysaker works between and weaves together questions and replies in philosophical psychology, Emerson studies, and ethics in this book of deep existential questioning. Each essay in this atypical, philosophical book employs recurring terms, phrases, and questions that characterize our contemporary age. Setting out from the idea of where we are in an almost literal

sense, Lysaker takes readers on an intellectual journey into thematic concerns and commitments of broad interest, such as the nature of self and self-experience, ethical life, poetry and philosophy, and history and race. In the manner of Emerson, Cavell, and Rorty, Lysaker's vibrant writing is certain to have a transformative effect on American philosophy today.

This successful text puts personality back into the personality course, integrating the classic insights of the personality theorists with modern research in a manner that will fascinate and captivate students. Organized around eight basic aspects of personality-psychoanalytic, ego, biological, behaviorist, cognitive, trait, humanistic, and situational/interactionist-the text both explains the classic theories and also explores how the information applies to the student reader. The text presents a balanced, critical, yet optimistic approach. Personality encourages critical thinking about human nature. While holding the highest scientific standards, the text uses unique and provocative pedagogical devices (see below) to capture students' interest and bring the field of personality to life. It has been hailed as the best-written and most relevant personality textbook in the field.
