 Sono sempre più numerosi giovani e meno giovani che decidono di andare a vivere in un cohousing o in un ecovillaggio, una scelta dettata non solo da motivi economici (vivere insieme costa decisamente meno), ma anche dal crescente bisogno di uno stile di vita sobrio e a basso impatto ambientale, basato su relazioni autentiche e di solidarietà. Il panorama delle esperienze comunitarie, in Italia e all'estero, è assai ricco e variegato. Sempre più spesso si riconosce il valore sociale oltre che ambientale del vivere insieme, tanto che anche in Italia sono in crescita le amministrazioni locali che promuovono bandi per l'assegnazione di terreni o edifici destinati al

cosiddetto housing sociale; è successo in Lombardia, Toscana, Emilia-Romagna e altrove. L'autrice racconta la storia e soprattutto il presente di ecovillaggi e cohousing già attivi in Italia, dei numerosi progetti in via di realizzazione e aperti a nuove adesioni, e delle esperienze internazionali più significative. Quella che emerge è una mappa completa e variegata, utile per chi vuole approfondire una tematica ancora poco conosciuta oppure per chi ha già avviato una riflessione e un percorso, e che nel libro può trovare suggestioni, stimoli e contatti per proseguire il proprio cammino.

Being Me, Loving You Terra Nuova Edizioni

Kindness is the foundation of the world's great religions and most-enduring philosophies. Why, then, does being kind feel so dangerous? If we crave kindness with such intensity, why is it a pleasure we often deny ourselves? And why—despite our longing—are we often suspicious when we are on the receiving end of it? In this brilliant book, the eminent psychoanalyst Adam Phillips and the historian Barbara Taylor examine the pleasures and perils of kindness. Modern people have been taught to perceive ourselves as fundamentally antagonistic to one another, our motives self-seeking. Drawing on intellectual history, literature, psychoanalysis, and contemporary social theory, this book explains how and why we have chosen loneliness over connection. On Kindness argues that a life lived in instinctive, sympathetic identification with others is the one we should allow ourselves to live. Bursting with often shocking insight, this brief and essential book will return to its readers what Marcus Aurelius declared was mankind's "greatest delight": the intense

satisfactions of generosity and compassion.

Paul Ricoeur (1913-) is Professor Emeritus of Philosophy at the University of Chicago and Dean of the Faculty of Letters and Human Sciences at the University of Paris X, Nanterre. One of the foremost contemporary French philosophers, his work is influenced by Husserl, Marcel and Jaspers and is particularly concerned with symbolism, the creation of meaning and the interpretation of texts. The Conflict of Interpretations ranges across an astonishing diversity of fields: structuralism, linguistics, psychoanalysis, religion and faith. The essays it comprises are bound together by Ricoeur's customary concern for interpretation and language and all bear the stamp of the systematic and critical thinking which has become his hallmark in contemporary philosophy. The "language-communication-society" triangle defies traditional scientific approaches. Rather, it is a phenomenon that calls for an integration of complex, transdisciplinary perspectives, if we are to make any progress in understanding how it works. The highly diverse agents in play are not merely cognitive and/or cultural, but also emotional and behavioural in their specificity. Indeed, the effort may require building a theoretical and methodological body of knowledge that can effectively convey the characteristic properties of phenomena in human terms. New complexity approaches allow us to rethink our limited and mechanistic images of human societies and create more appropriate emo-cognitive dynamic and holistic models. We have to enter into dialogue with the complexity views coming out of other more 'material' sciences, but we also need to take steps in the linguistic and psycho-sociological fields towards creating perspectives and concepts better fitted to human characteristics. Our understanding of complexity is different - but not opposed - to the one that is more commonly found in texts written by people working in physics or computer science, for example. The goal of this book is to extend the knowledge of these other more 'human' or socially oriented perspectives on complexity, taking account of the language and communication singularities of human agents in society. Mediare la conflittualità. Riflessioni e strategie operative per sviluppare competenze comunicative e relazionali nella trasformazione dei conflitti Taylor & Francis

Living among other people, in their families and communities, children become aware from a very early age of questions related to justice, and they search for the meaning of the world. By fostering an understanding of human rights, shaping opinion and developing attitudes, human rights education strongly supports this natural interest and learning process. This is what human rights education is about and this is what 'Composito manual on human rights education for children' is for. 'Composito' is a starting point for educators, teachers and trainers who are ready to deal with human rights education with children of 7-13 years. The book covers the key concepts of human rights and children's rights, and provides substantial theoretical background to 13 key human rights issues, such as democracy, citizenship, gender equality, environment, media, poverty, and violence. The 42 practical activities serve to engage and motivate children to recognise human rights issues in their own environment. They help children to develop critical thinking, responsibility and a sense of justice, and help them learn how to take action to contribute to the betterment of their school or community. The manual also gives practical tips on how it can be used in various formal and non-formal educational settings.

Amare per guarire Nonviolent Communication Guide

The increasingly rapid destruction of the ecological systems that support life is calling into question some of the fundamental stories that we live by: stories of unlimited economic growth, of consumerism, progress, individualism, success, and the human domination of nature.

Ecolinguistics shows how linguistic analysis can help reveal the stories we live by, open them up to question, and contribute to the search for new stories. Bringing together the latest ecolinguistic studies with new theoretical insights and practical analyses, this book charts a new course for ecolinguistics as an engaged form of critical enquiry. Featuring: A framework for understanding the theory of ecolinguistics and applying it practically in real life; Exploration of diverse topics from consumerism in lifestyle magazines to Japanese nature haiku; A comprehensive glossary giving concise descriptions of the linguistic terms used in the book; Discourse analysis of a wide range of texts including newspapers, magazines, advertisements, films, nonfiction books, and visual

images. This is essential reading for undergraduates, postgraduates and researchers working in the areas of Discourse Analysis and Language and Ecology.

Manuale pratico di comunicazione nonviolenta per lo studio individuale o di gruppo del libro «Le parole sono finestre (oppure muri)» Pearson UK

A simple yet powerful method of communication for mediating conflicts and peacefully resolving differences at the political, professional, and personal levels.

Nonviolent Communication Terra Nuova Edizioni

This book investigates intractable conflicts and their main verbal manifestation - radical disagreement - and explores what can be done when conflict resolution fails. The book identifies agonistic dialogue - dialogue between enemies - as the key to linguistic intractability. It suggests how agonistic dialogue can best be studied, explored, understood and managed even in the most severe political conflicts when negotiation, mediation, problem solving, dialogue for mutual understanding, and discourse ethics are unsuccessful. This approach of viewing radical disagreement as the central topic of analysis and conflict management is a new innovation in this field, and also supplements and enhances existing communicative transformational techniques. It also has wider implications for cognate fields, such as applied ethics, democratic theory, cultural studies and the philosophy of difference. This book will be of great interest to students of conflict resolution, peace and conflict studies, ethnic conflict and International Relations in general. Oliver Ramsbotham is Emeritus Professor of Conflict Resolution at the University of Bradford, UK, Chair of the Oxford Research Group, President of the Conflict Research Society and co-author of Conflict Resolution in Contemporary Conflict.
