Natural Hazard Management in Coastal Areas Penguin
 A boy discovers his Native American heritage in this Depression-era tale of identity and friendship by the author of Code Talker It's 1932, and twelve-year-old Cal Black and his Pop have been riding the rails for years after losing their farm in the Great Depression. Cal likes being a "knight of the road" with Pop, even if they're broke. But then Pop has to go to Washington, DC--some of his fellow veterans are marching for their government checks, and Pop wants to make sure he gets his due--and Cal can't go with him. So Pop tells Cal something he never knew before: Pop is actually a Creek Indian, which means Cal is too. And Pop has decided to send Cal to a government boarding school for Native Americans in Oklahoma called the Challagi School. At school, the other Creek boys quickly take Cal under their wings. Even in the harsh, miserable conditions of the Bureau of Indian Affairs boarding school, he begins to learn about his people's history and heritage. He learns their language and customs. And most of all, he learns how to find strength in a group of friends who have nothing beyond each other.

 A behind-the-scenes account of the derivatives business at a major investment bank The financial industry's invention of complex products such as credit default swaps and other derivatives has been widely blamed for triggering the global financial crisis of 2008. In Codes of Finance, Vincent Antonin Lépinay, a former employee of one of the world's leading investment banks, takes readers behind the scenes of the equity derivatives business at the bank before the crisis, providing a detailed firsthand account of the creation, marketing, selling, accounting, and management of these financial instruments—and of how they ultimately created havoc inside and outside the bank.

 A complete examination of Patton's campaign to take the fortified city of Metz. General George Patton's most controversial campaign was the series of battles in autumn 1944 battles along the German frontier which centered on the fortified city of Metz. In part, the problem was logistics. As was the case with the rest of the Allied forces in the European Theatre, supplies were limited until the port of Antwerp could finally be cleared. Also problematic was the weather. The autumn of 1944 was one of the wettest on record, and hardly conducive to the type of mechanized warfare for which Patton was so famous. However at the heart of the

problem was the accretion of sophisticated fortifications. Metz had been fortified since ancient times, heavily rebuilt by France in the post-Napoleonic period, modernized by Germany in 1870-1914, and modernized by France during the Maginot effort in 1935-40. The Germans hoped to hold Metz with a thin screen of second-rate troops, counting on the impregnable fortifications. This book covers the entire campaign from beginning to end, offering an unbiased assessment of the success and failures of both the Allied and Axis efforts.

THE BRO CODE provides men with all the rules they need to know in order to become a "bro" and behave properly among other bros. THE BRO CODE has never been published before. Few know of its existence, and the code, until now, has been verbally communicated between those in the 'bro'. Containing approximately 150 "unspoken" rules, this code of conduct ranges from the simple (bros before hos) to the complex (the hot-to-crazy ratio, complete with bar graphs and charts). With helpful sidebros THE BRO CODE will help any ordinary guy become the best bro he can be. Let ultimate bro and co-author Barney Stinson and his book, THE BRO CODE share their wisdom, lest you be caught making eye contact in a devil's three-way (two dudes, duh.) Sample Articles from THE BRO CODE: Article 1: Regardless of veracity, a Bro never admits familiarity with a Broadway show or musical. Article 53: A Bro will, whenever possible, provide his Bro with prophylactic protection. Article 57: A Bro may not speculate on the expected Bro / chick ratio of a party or venue without first disclosing the present-time observed ratio.

Astana, the capital city of the post-Soviet Kazakhstan, has often been admired for the design and planning of its futuristic cityscape. This anthropological study of the development of the city focuses on every-day practices, official ideologies and representations alongside the memories and dreams of the city's longstanding residents and recent migrants. Critically examining a range of approaches to place and space in anthropology, geography and other disciplines, the book argues for an understanding of space as inextricably material-and-imaginary, and unceasingly dynamic – allowing for a plurality of incompatible pasts and futures materialized in spatial form.

Did you grow up playing video games when you had to wait online to get them? Do you remember the bad, weird, or otherwise underrated video games of your youth? Did you like a few of them more than your friends did? A Selective History of 'Bad' Video Games will walk you down memory lane and perform unholy excavations of games you remember, games you've forgotten, and games you never knew you wanted to read about during your lunch break. From a seemingly nude Atari 2600 karate referee to a basketball star doing martial arts to a tiger that speaks broken English and walks through walls, the book will try to uncover what the developers were thinking — and occasionally succeed. While there's been some recent coverage of the most famously "bad" video game — E.T. — this book starts there and continues on to 40 other curiously (or unsurprisingly) unsuccessful video games during the first few decades of the industry's lifespan. Written by a modern day video game developer, the book explores why these games failed, whether or not they truly deserved it, and what could have made them better. The covered games include screen shots that capture awkward moments, irreverent captions, and pages of tongue-in-cheek psychoanalysis.

Featuring hundreds of photos from the national archives, diagrams, and detailed specifications, Hunnicutt's Firepower remains the definitive developmental history of the heavy tank for the military historian, professional soldier, and tank restorer. This ambitious entry in R.P. Hunnicutt's 10-volume compendium of American tank history details the development of the heavy tanks from its initial conception in World War I to its final development in the 1960s. First developed after WWI, various iterations of the heavy armored military vehicle have served as a crucial component of American military operations in all manner of engagements. Hunnicutt spares no detail as he examines the origins and deployment of the Mark VIII and T1 and M6 in the 1930s and 1940s. First conceived as a vehicle to be used for infantry support, by the end of WWI, the heavy tank had evolved into the modern concept with a powerful turret mounted antitank gun protected by heavy armor--a fighting machine in its own

right. Hunnicutt provides detailed technical information about these vehicles and their role in the U.S. Army and Marines. The M103A product-improved descendant of the T43 tanks and its many variations is also treated with exacting detail by Hunnicutt, who takes us through the numerous and important variations on the heavy tank design. Spanning the history of America's most widely used main battle tank, Hunnicutt's Firepower is an absolute must-have for anyone interested in the history of the American military. This book describes the living-room artifacts, clothing styles, and intellectual proclivities of American classes from top to bottom. *Which Country Has the World's Best Health Care?* Springer Two different wars were fought in Vietnam, the jungle-and-booby-trap one down south, and the WWII-like one up on the DMZ. "I was one of a handful whose Vietnam tour was evenly split between the First and Third Marine Divisions, and saw, firsthand, the difference 170 miles could make during the war's bloodiest year." Corporal Robert Peavey was a tank commander in I Corps (Eye Corps) on the DMZ when LBJ ordered a bombing halt over the North. His compelling first-hand account chronicles operations

just south of the 'Z, operations that most Vietnam War histories have completely ignored. Peavey offers detailed, understandable explanations of combat strategy, strengths and shortcomings of standard-issue armament, and inter-service rivalries.

Report of the Presidential Commission on the Space Shuttle Challenger Accident Berghahn Books

"In a world of rising tensions between Russia and the United States, the Middle East and Europe, Sunnis and Shiites, Islamism and liberalism, Turkey is at the epicentre. And at the heart of Turkey is its right-wing populist president, Recep Tayyip Erdo?an. Since 2002, Erdo?an has consolidated his hold on domestic politics while using military and diplomatic means to solidify Turkey as a regional power. His crackdown has been brutal and consistent - scores of journalists arrested, academics officially banned from leaving the country, university deans fired and many of the highest-ranking military officers arrested. In some senses, the nefarious and failed 2016 coup has given Erdo?an the licence to make good on his repeated promise to bring order and stability under a 'strongman'. Here, leading Turkish expert Soner Cagaptay will look at Erdo?an's roots in Turkish history, what he believes in and how he has cemented his rule, as well as what this means for the world. The book will also unpick the 'threats' Erdogan has worked to combat - from the liberal Turks to the Gulen movement, from coup plotters to Kurdish nationalists - all of which have culminated in the crisis of modern Turkey."-- Bloomsbury Publishing.

The preeminent doctor and bioethicist Ezekiel Emanuel is repeatedly asked one question: Which country has the best healthcare? He set off to find an answer. Ezekiel Emanuel profiles eleven of the world's healthcare systems in pursuit of the best or at least where excellence can be found. Using a unique comparative structure, the book allows healthcare professionals, patients, and policymakers alike to know which systems perform well, and why, and which face endemic problems.
