From Visual Surveillance to Internet of Things CRC Press

From Visual Surveillance to Internet of Things: Technology and Applications is an invaluable resource for students, academicians and researchers to explore the utilization of Internet of Things with visual surveillance and its underlying technologies in different application areas. Using a series of present and future applications - business insights, indoor-outdoor securities, smart grids, human detection and tracking, intelligent traffic monitoring, e-health department and many more - this book will support readers to obtain a deeper knowledge in implementing IoT with visual surveillance. The book offers comprehensive coverage of the most essential topics, including: The rise of machines and communications to IoT (3G, 5G) Tools and technologies of IoT with visual surveillance IoT with visual surveillance for real-time applications IoT architectures Challenging issues and novel solutions for realistic applications Mining and tracking of motion-based object data Image processing and analysis into the unified framework to understand both IOT and computer vision applications This book will be an ideal resource for IT professionals, researchers, under- or post-graduate students, practitioners, and technology developers who are interested in gaining a deeper knowledge in implementing IoT with visual surveillance, critical applications domains, technologies, and solutions to handle relevant challenges. Dr. Lavanya Sharma is an Assistant Professor in the Amity Institute of Information Technology at Amity University UP, Noida, India. She is a recipient of several prestigious awards during her academic career. She is an active nationally-recognized researcher who has published numerous papers in her field. She has contributed as an Organizing Committee member and session chair at Springer and IEEE conferences. Prof. Pradeep K. Garg worked as a Vice Chancellor, Uttarakhand Technical University, Dehradun. Presently he is working in the department of Civil Engineering, IIT Roorkee as a professor. Prof. Garg has published more than 300 technical papers in national and international conferences and journals. He has completed 26 research

projects funded by various government agencies, guided 27 PhD candidates, and provided technical services to 84 consultancy projects on various aspects of Civil Engineering.

This series contains the decisions of the Court in both the English and French texts.

Technology and Applications Penguin

Automotive Technician Training is the definitive student textbook for automotive engineering. It covers all the theory and technology sections that students need to learn in order to pass levels 1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is ideal for courses and exams run by other awarding bodies. This revised edition overhauls the coverage of general skills and advanced diagnostic techniques. It also includes a new chapter about electric and hybrid vehicles and advanced driver-assistance systems, along with new online learning activities. Unlike current textbooks on the market, this takes a blended-learning approach, using interactive features that make learning more enjoyable and effective. It is ideal to use on its own but when linked with IMI eLearning online resources, it provides a comprehensive package that includes activities, video footage, assessments and further reading. Information and activities are set out in sequence to meet teacher and learner needs, as well as qualification requirements.

Take to the open road with DK Eyewitness Back Roads Great Britain and discover 25 leisurely drives through the country's beautiful villages and stunning landscapes. Explore the spectacular scenery of the Lake District, follow a whiskey trail through the Highlands or discover picturesque coastal villages in Cornwall. Packed with insider tips and information, this easy-to-use e-guide reveals incredible sights, hidden gems, and authentic local experiences that can be discovered only by road. Inside DK Eyewitness Back Roads Great Britain: - 25 easy-to-follow driving tours, each lasting one to five days - Guided walks take you through Great Britain's historic towns and villages - Experts suggest the best off-road activities in each area, from whiskey trails to water sports - Contains essential travel tips, including our pick of where to stay, eat, and shop, plus useful travel, visa, and health information - Covers all the UK rules of the road - Includes postcodes for use with GPS, plus information on road conditions and parking tips - Covers Cornwall, Devon, the Jurassic Coast, Salisbury, Bath, Glastonbury, the Cotswolds, the Chilterns, the South Downs, Brighton, Kent, Cambridgeshire, Norfolk, the Brecon Beacons, West Wales, Snowdonia, Offa's Dyke, the Peak District, Yorkshire, the Lake District, Northumbria, Edinburgh, Rosslyn Chapel, Fife, the Scottish Highlands, the Scottish Lochs, Aberdeen, Inverness, and more Staying for longer and looking for a more comprehensive e-guide to Great Britain? Try our DK Eyewitness Travel Guide Great Britain.

High Probability Short-term Trading Strategies APH Publishing

Top-selling manual on short term trading methods and strategies from two prominent authors and traders. Combines 25 years of combined trading experience to teach you 20 of their best strategies.

Expert guidance on swing trading from "New Market Wizard", Linda Raschke, in her specialty area. Also covers pattern recognition, ADX volatility, Crabel, gap reversals, and many other strategies. Perspectives Beyond Frontiers 2019 5th International Conference on Advanced Computing and Communication Systems (ICACCS)2019 International Conference on Advanced Computing & Communication Systems (ICACCS 2019) aims at exploring the interface between the industry and real time environment with state of the art techniques ICACCS 2019 publishes original and timely research papers and survey articles in current areas of energy, smart city, temperature, power and environment related research areas of current importance to readers2021 International Conference on Computer Communication and Informatics (ICCCI)The 2021 International Conference on Computer Communication and Informatics (ICCCI 2021) aims to provide an outstanding opportunity for both academic and industrial communities alike to address new trends, challenges and emerging technologies on topics relevant to today s fast moving areas of Computer, Communication and Informatics The conference will feature invited talks and referred paper presentations The vision of ICCCI 2021 is to develop foster communication among researchers and practitioners with a common interest but working in a wide variety of areas in communication and informaticsPhysics, Chemistry and Technology of Solid State Gas Sensor Devices

Technological change is a central feature of modern societies and a powerful source for social change. There is an urgent task to direct these new technologies towards sustainability, but society lacks perspectives, instruments and policies to accomplish this. There is no blueprint for a sustainable future, and it is necessary to experiment with alternative paths that seem promising. Various new transport technologies promise to bring sustainability benefits. But as this book shows, important lessons are often overlooked because the experiments are not designed to challenge the basic assumptions about established patterns of transport choices. Learning how to organise the process of innovation implementation is essential if the maximum impact is to be achieved - it is here that strategic niche management offers new perspectives. The book uses a series of eight recent experiments with electric vehicles, carsharing schemes, bicycle pools and fleet management to illustrate the means by which technological change must be closely linked to social change if successful implementation is to take place. The basic divide between proponents of technological fixes and those in favour of behavioural change needs to be bridged, perhaps indicating a third way.

The Maritime Engineering Reference Book is a one-stop source for engineers involved in marine engineering and naval architecture. In this essential reference, Anthony F. Molland has brought together the work of a number of the world's leading writers in the field to create an inclusive volume for a wide audience of marine engineers, naval architects and those involved in marine operations, insurance and other related fields. Coverage ranges from the basics to more advanced topics in ship design, construction and operation. All the key areas are covered, including ship flotation and stability, ship structures, propulsion, seakeeping and maneuvering. The marine environment and maritime safety are explored as well as new technologies, such as computer aided ship design and remotely operated vehicles (ROVs). Facts, figures and data from world-leading experts makes this an invaluable ready-reference for those involved in the field of maritime engineering. Professor A.F. Molland, BSc, MSc, PhD, CEng, FRINA. is Emeritus Professor of Ship

Design at the University of Southampton, UK. He has lectured ship design and operation for many years. He has carried out extensive research and published widely on ship design and various aspects of ship hydrodynamics. * A comprehensive overview from best-selling authors including Bryan Barrass, Rawson and Tupper, and David Eyres * Covers basic and advanced material on marine engineering and Naval Architecture topics * Have key facts, figures and data to hand in one complete reference book

The Seventh International Conference on Electrical Energy Systems 2021 ICEES 2021 is the premier interdisciplinary platform to deliver the latest developments and innovative research results in electrical energy systems for all professionals, researchers and engineers from all over the world This conference aims to foster interaction in the area of Electrical Energy Systems with a specific focus to smart grid, embedded systems, renewable energy and its applications among scientists from both academia and industry The conference includes keynote address and invited talks by eminent speakers and presentations by participants

The Greenhouse Gas Protocol Penguin

In recent years, smart systems and control science are entering into a new technology phase This initiative reflects new challenges and stimulates the need of rapid research awareness on realizing various smart systems and control strategies into existence The International Conference on Inventive Systems and Control ICISC 2020 which is to be held on 8 10 January 2020 at JCT College of Engineering and Technology, Coimbatore, India will initiate an open forum for academicians, researchers and industrialists where the recent advances in control science and systems engineering can be extensively discussed, shared and examined ICISC 2020 is solely dedicated to publish high quality and transferable innovations across all the aspects in the fields of inventive smart systems and control science with an extensive interest in the areas of formulation, implementation and analysis in the fields of control and information science

The Maritime Engineering Reference Book "O'Reilly Media, Inc."

Research and development of solid state gas sensor devices began in the 1950s with several uncoordinated independent efforts. The number and pace of these investigations later accelerated in response to increasing pressure placed on the environment and public health by industrial activities. Since 1970, several thousand articles have been written on the subject, and laboratories around the globe have introduced novel methodologies and devices to address needs associated with particular technological developments. Despite the rapid development of this important new technology, very little has been done to review and coordinate data related to sensor science and technology itself. Physics, Chemistry and Technology of Solid State Gas Sensor Devices focuses on the underlying principles of solid state sensor operation and reveals the rich fabric of interdisciplinary science that governs modern sensing devices. Beginning with some historical and scientific background, the text proceeds to a study of the interactions of gases with surfaces. Subsequent chapters present detailed information on the fabrication, performance, and application of a variety of sensors. Types of sensor devices discussed include: Gas-sensitive solid state semiconductor sensors Photonic and photoacoustic gas sensors Fiber optic sensors Piezoelectric quartz crystal microbalance sensors Surface acoustic wave sensors Pyroelectric and thermal sensors

For analytical chemists using solid state sensors in environment-related analysis, and for electrical engineers working with solid state sensors, this book will expand and unify their understanding of these devices, both in theory and practice.

Addresses an Emerging Shift in Developing Countries The authors and contributors of Ambient Assisted Living have recognized that the demographic profile is changing in many developing countries and have factored in an inversion of the demographic pyramid. The technology of ambient assisted living (AAL), supports the elderly and disabled in their daily routines to allow for safe and independent living for as long as possible. Dedicated to ambient intelligence—electronic environments that are sensitive and responsive to the presence of people—Ambient Assisted Living highlights the technologies that center on the needs of these special interest groups, such as the elderly or people with disabilities. Beneficial to students, practitioners, and users of ambient assisted living (AAL), this text compiles scattered information on the subject, outlines the most important and significant work in related literature, and covers the latest hardware and software for ergonomic design pertaining to AAL. From inception to implementation, the text assesses what has been produced and researched so far and looks for trends and clues for the future. It reviews literature on AAL published since 2007 and describes the main features and areas of products or systems that interlink and improve new or existing technologies and systems. This text: Provides extensive coverage of the applications, software, and information management for AAL Contains an overview of the concepts related to AAL Includes a comprehensive review of the state of the art on pervasive and mobile health (m-health) applications Describes a set of projects and work with scientific relevance in AAL Introduces a framework focused on the monitoring and assistance of elderly persons living alone Discusses a prospective study on technological systems for people with

cognitive disabilities Ambient Assisted Living highlights technologies that adapt to the user rather than the user adapting to the technology. This text proposes technologies that can enable assisted persons to live independently for longer and reduce the need for long-term care.

POLLACHI John Wiley & Sons

Presents recipes ranging in difficulty with the science and technology-minded cook in mind, providing the science behind cooking, the physiology of taste, and the techniques of molecular gastronomy.

Named a Best Book of the Year by The New York Times, Wall Street Journal, New Statesman, Air Mail, and more A “haunting and elegant” (The Wall Street Journal) story about love, faith, the search for utopia—and the often devastating cost of idealism. It’s the late 1960s, and two lovers converge on an arid patch of earth in South India. John Walker is the handsome scion of a powerful East Coast American family. Diane Maes is a beautiful hippie from Belgium. They have come to build a new world—Auroville, an international utopian community for thousands of people. Their faith is strong, the future bright. So how do John and Diane end up dying two decades later, on the same day, on a cracked concrete floor in a thatch hut by a remote canyon? This is the mystery Akash Kapur sets out to solve in *Better to Have Gone*, and it carries deep personal resonance: Diane and John were the parents of Akash’s wife, Auralice. Akash and Auralice grew up in Auroville; like the rest of their community, they never really understood those deaths. In 2004, Akash and Auralice return to Auroville from New York, where they have been living with John’s family. As they reestablish themselves in the community, along with their two sons, they must confront the ghosts of those distant deaths. Slowly, they come to understand how the tragic individual fates of John and Diane intersected with the collective history of their town. “A riveting account of human aspiration and folly taken to extremes” (The Boston Globe), *Better to Have Gone* probes the underexplored yet universal idea of utopia and portrays in vivid detail the daily life of one such community. Richly atmospheric and filled with remarkable characters, spread across time and continents, this is narrative writing of the highest order—a “gripping...compelling...[and] heartbreaking story, deeply researched and lucidly told” (The New York Times Book Review).

Love, Death, and the Quest for Utopia in Auroville Away Publications
