 ... *Functionalism revisited architectural theory and practice* ... In
 architecture, functionalism is the principle that buildings should
 be designed based solely on the purpose and function of the
 building.. This principle is a matter of confusion and controversy
 within the profession, particularly in regard to modern
 architecture, as it is less self-evident than it first appears.. The
 theoretical articulation of functionalism in buildings can be traced
 back ... *Functionalism (architecture) - Wikipedia* *Architectural*

theory is the act of thinking, discussing, and writing about architecture. Architectural theory is taught in all architecture schools and is practiced by the world's leading architects. Some forms that architecture theory takes are the lecture or dialogue, the treatise or book, and the paper project or competition entry. Architectural theory is often didactic, and theorists tend to ...

One more important contribution after 'Creating Architectural Theory' which represents one of the classical writings on the theories of architecture. In this book, redefining functionalism in

FUNCTIONALISM AND THE CONTEMPORARY ARCHITECTURAL DISCOURSE ...

This book argues that the model of 'function' and the concept of a 'functional building' that we have inherited from the twentieth-century Modernists is limited in scope and detracts from a full understanding of the purposes served by the built environment. It simply does not cover the range of functions that buildings can afford nor is it tied in a conceptually clear manner to our contemporary concepts of architectural theory.

Functionalism Revisited - Jon Lang, Walter Moleski - Bok ...

Functionalism. The notion of functional art, most actively promoted by German writers and termed by them Zweckkunst, is most appropriately related to architectural theory under three headings, namely (1) the idea that no building is beautiful unless

it properly fulfills its function, (2) the idea that if a building fulfills its function it is ipso facto beautiful, and (3) the idea that, since form relates to function, all artifacts, including buildings, are a species of industrial, or ...
