The Ottoman Syrians - residents of modern Syria and Lebanon -
formed the first Arabic-speaking Evangelical Church in the region.
This book offers a fresh narrative of the encounters of this
minority Protestant community with American missionaries,
Eastern churches and Muslims at the height of the Nahda, from
1860 to 1915. Drawing on rare Arabic publications, it challenges
historiography that focuses on Western male actors. Instead it
shows that Syrian Protestant women and men were agents of
their own history who sought the salvation of Syria while adapting
and challenging missionary teachings. These pioneers
established a critical link between evangelical religiosity and the
socio-cultural currents of the Nahda, making possible the literary
and educational achievements of the American Syrian Mission
and transforming Syrian society in ways that still endure today.

This is a comparative study of how the societies of late-medieval England and France reacted to the long period of conflict between them commonly known as the Hundred Years War. Beginning with an analysis of contemporary views regarding the war. Two chapters follow which describe the military aim of the protagonists, military and naval organisation, recruitment, and the raising of taxes. The remainder of the book describes and analyses some of the main social and economic effects of war upon society, the growth of a sense of national consciousness in time of conflict, and the social criticism which came from those who reacted to changes and development brought about by war. Although intended primarily as a textbook for students, Dr Allmand's study is much more than that. It makes an important general contribution to the history of war in medieval times, and opens up new and original perspectives on a familiar topic.

First published in 1932, this book looks at a period that has often been thought of as a time of general decline in the most characteristic features of medieval civilisation. While acknowledging decline in many areas during this period — the power of the Church, feudalism, guilds, the Hanseatic League, the autonomy of towns and the end of the two Roman empires — the author argues that there was also signs of development. National consciousness, the power of the bourgeoisie and trade and industry all rose markedly in this period alongside intellectual and artistic achievements outside of Italy. This book asserts that in amongst the failure and decline new forces were creating new

substitutes.

Protestants, Gender and the Arab Renaissance in Late Ottoman Syria Lorenz Educational Press

It was a tumultuous time, filled with heroes, heretics, and some who were a little bit of both. It was a time of destruction and rebuilding. Some sincerely sought reform while others sought merely to profit by it, and some--perhaps too few--used the events of the time to become saints.

The Vulgate Bible was used from the early Middle Ages through the twentieth century in the Western European Christian (and, later, specifically Catholic) tradition. This volume elegantly and

affordably presents the text of the Pentateuch, the first five books of the Bible, beginning with the creation of the world and the human race, continuing with the Great Flood, God's covenant with Abraham, Israel's flight from Egypt and wanderings through the wilderness, the laws revealed to Moses, his mustering of the twelve tribes of Israel, and ending on the eve of Israel's introduction into the Promised Land. This is the first volume of the projected five-volume set of the complete Vulgate Bible.

The publication of Martin Luther's Ninety-Five Theses in 1517 immediately elicited responses from dozens of Roman Catholics in Germany and beyond. While Luther's works and those of his leading supporters have been available in English translation for many years, those of most of his Catholic opponents have not. In order to address this imbalance, win a fairer hearing for the Catholic opposition, and make it possible for students to understand both sides of the sixteenth-century religious debates, translators have drawn on the rich resources of the Kessler Reformation Collection at the Pitts Theology Library to present here introductions to and translations of ten Catholic pamphlets. *Luther as Heretic* begins with an essay sketching the larger background for these publications. The editors' goal is that this

book will prove useful for teaching and research and will foster a deeper understanding of the sixteenth-century theological discussions by allowing today's readers to hear voices that have been mostly silent in the English-speaking world for centuries.

Petrarch and Boccaccio Lorenz Educational Press

The classic political satire about an imaginary ideal world by one of the Renaissance's most fascinating figures. Named after a word that translates literally to "nowhere," Utopia is an island dreamed up by Thomas More, a devout Catholic, English statesman, and Renaissance humanist who would be canonized as a saint centuries after he was executed for choosing God over king. More's novel introduces us to Utopia's society and its customs. It is a place of no private property and no lawyers; of six-hour workdays and simple ways; and, intriguingly, of a

combination of values that blend the traditional with the highly controversial, from euthanasia to married priests to slavery. Remarkably thought-provoking, it is a novel that asks us to question what makes a perfect world—and whether such a thing is even possible.
