Growth miracles typically have been studied at the country level. In *The Making of Miracles in Indian States*, internationally-renowned economists Arvind Panagariya and M. Govinda Rao bring together a team of six leading scholars to break from that tradition and study three growth miracles in India at the level of the state: Andhra Pradesh, Bihar, and Gujarat. These are three large and diverse states in India: Gujarat has the third-highest per-capita income among the largest eighteen states, Bihar is the poorest, and Andhra Pradesh falls in the middle. Despite vast differences among the states, all three have grown at rates exceeding 8% for an entire decade in the twenty-first century. Each section of this three-part book offers a historical perspective on the state's development and the specific factors that improved its economic fortunes. The three case studies are backed by extensive quantitative documentation. They demonstrate the critical role that leadership, translated into improved policies and implementation, plays in stimulating growth and development. *The Making of Miracles in Indian States* is essential reading for students and scholars alike, as well as policy makers, NGO workers, and employees of international institutions.

The aim of this book is to provide readers with the tools to understand the historical evolution of terrorism and counterterrorism over the past 150 years. In order to appreciate the contemporary challenges posed by terrorism it is necessary to look at its evolution, at the different phases it has gone through, and the transformations it has experienced. The same applies to the solutions that

states have come up with to combat terrorism: the nature of terrorism changes but still it is possible to learn from past experiences even though they are not directly applicable to the present. This book provides a fresh look at the history of terrorism by providing in-depth analysis of several important terrorist crises and the reactions to them in the West and beyond. The general framework is laid out in four parts: terrorism prior to the Cold War, the Western experience with terrorism, non-Western experiences with terrorism, and contemporary terrorism and anti-terrorism. The issues covered offer a broad range of historical and current themes, many of which have been neglected in existing scholarship; it also features a chapter on the waves phenomenon of terrorism against its international background. This book will be of much interest to students of terrorism studies, political violence, international history, security studies and IR.

Do people starve in democratic polities? It is often claimed that as government must respond to public needs in times of crisis, democracy has reduced famine in India since Independence. This book seeks to identify the processes which generate and perpetuate hunger in India, and what sort of intervention by public and private agencies are best suited to combat this problem. Drawing on fieldwork in the much publicised Kalahandi district, Bob Currie explains why problems of poverty and alleged starvation remain despite regular elections and extensive regional and national publicity.

Since the mid-1980s, the presence of women in governance has become a major marker of successful democracy in global and national discourses on the democratization of society. A diverse set of nation-states have legislatively mandated gender quotas to ensure the presence of elected women representatives (EWRs) in various rungs of governance. Since 1993, the Indian state has legislated a massive program of democratization and decentralization. As a result, more than 1.5 million EWRs have taken office within the lower rungs of governance or the Panchayati Raj Institutions (PRI). This book is an ethnography of the Indian state and its policy of legislated entry of women into political life. It argues that political participation of women is necessary to change the political practices in society, to make institutions more gender, class and caste representative, and to empower individual women to negotiate both formal and informal institutions. Its locus is the everyday life contexts of EWRs in the southern Indian state of Karnataka who negotiate their own meanings of politics, state, society, empowerment and political subjectivity. Analysing three factors – structural boundaries, sociocultural divisions and conjunctural limitations imposed on the participation of EWRs by political parties – the book demonstrates that the social embeddedness of PRIs within everyday practices and social relations of identity and power severely constrain and shape the political participation and empowerment of EWRs. Providing a valuable insight into

contemporary state and feminist praxis in India, this book will be of interest to scholars of grass-roots democracy, gender studies and Asian politics.

An International History of Terrorism Routledge

Hind Swaraj by Mahatma Gandhi is arguably the greatest text to have emerged from the anti-colonial movement in India and the first to seriously challenge the cultural and civilizational premises of the colonizers' mentality. It is also the first text in India that falls within the broad tradition of modern political philosophy, advancing a complex cluster of theses with conceptual sensitivity, analytical precision, and sustained argument. This book critically engages with Hind Swaraj and explores the fascinating and subtle dialogue set up by Gandhi between the characters of the reader and the editor. With essays from leading contemporary thinkers on Gandhi, the volume looks at themes such as Gandhi on epistemic servitude, decolonization, and intercultural translation; his complex critique of modern civilization; his views on the empire, democracy, citizenship, and violence; the normative structure of Gandhian thought; Gandhi and the political praxis of educational reconstruction; and how to read this text. An important intervention in Gandhian studies, this book will be useful for scholars and researchers of peace studies, political philosophy, Indian philosophy, Indian political thought, political sociology, and South Asian studies.

This book examines the impact of economic reforms in India on the pharmaceutical industry and access to medicines. It traces the changing production and trade pattern of the industry, research and development (R&D) preferences and strategies of Indian pharmaceutical firms, patent system alongside pricing policy measures and their shortcomings. It also analyses the public health financing system in India driven largely by out-of-pocket expenditure — about 60 per cent — and characterised by very high share of medicines in total health expenditure. A masterful insight into a topical area, the work will be indispensable to those working on pharmaceutical industry and public policy. It will be of interest to researchers, scholars, students, and policy-makers of economics, industrial policy, public policy, intellectual property rights and health financing.

Understanding the Rohingya Displacement ISPCK

This book explores a range of connections between India and Australia that fall outside the formal diplomacy of the two states. It examines how race, class and gender shape conceptions of the two nations, whose voices are heard and whose are not, and the politics that emerge from sport, culture, the drive for development as well as from language and the poetic. The book seeks to challenge the primacy of the state in determining the character of the nation and its monopoly of relations with other peoples. To this end, it looks to everyday life to find linkages not only between India and Australia but also extending through the South and Southeast Asian regions. This book was published as a special issue of *Postcolonial Studies*.

Pharmaceutical Industry and Public Policy in Post-reform India Taylor & Francis

As India rises to great power status in the emerging multipolar world order, what influence will its rich and ancient culture have on the country's foreign policy? This book reveals that cultural values have greater explanatory power than previously thought and describes the nature of their influence. Excavating thousands of years of history, the monograph identifies enduring values that are relevant to contemporary foreign policy. It examines three critical areas of Indian foreign policy – nuclear policy, humanitarian intervention and relations with the Middle East. Major decisions were shaped by cultural values – sometimes at the expense of strategic interests. India's choice to test nuclear weapons was not purely because of China or Pakistan: hierarchy also played a role. From a hierarchical worldview shaping Delhi's approach to international law on arms control to pluralism facilitating simultaneous friendships with America and Iran, values thread their way throughout India's foreign relations. Non-violence underpins Delhi's soft power in both the West and the Middle East, while having spurred India's opposition to Western intervention in Iraq. Analyzing state behavior and interviewing diplomats, the book charts culture's evolving influence from Rajiv Gandhi to Narendra Modi.

This book provides an interpretive and comprehensive account of the history of India between the eighteenth and twentieth centuries, a crucial epoch characterized by colonialism, nationalism and the emergence of the independent Indian Union. It explores significant historiographical debates concerning the period while highlighting important new issues, especially those of gender, ecology,

caste, and labour. The work combines an analysis of colonial and independent India in order to underscore ideologies, policies, and processes that shaped the colonial state and continue to mould the Indian nation.
