Researched and written in Japan with the full co-operation of the factory, here in definitive detail is the story of the two-stroke Suzuki bikes - a series of models that put the company on the map, helping it to survive a difficult era that saw hundreds of Japanese motorcycle makers reduced to just four. Successful immediately, the two-stroke models defended Suzuki's honour on the tracks as well as in the showrooms, handing the company numerous world championship titles. The series has now been all but killed off, but Suzuki Motorcycles - The Classic Two-stroke Era helps celebrate an era when the two-stroke was king, concentrating on the 1950s through to the late-1970s.

Penned by one of the most prominent motorcycle journalists of the 21st century, Head Check invites readers to take in the color and detail of a rider's life vividly realized, richly observed, and transcendently described. During his tenure at Motorcyclist magazine, Jack Lewis has touched

readers around the world not only through his incandescent prose riffs and self-effacing humor, but also through a consistent and deeply felt humanity. This collection of magazine features and columns alongside personally published web pieces and new material may be populated by motorcycles, but it centers around the varied experiences of riders (and their tolerant keepers) in a world where risk is a bet you make with yourself for purposes that must always transcend mere recreation. Head Check is - beneath the sarcastic wit, wide-eyed fear, profound humility, and occasional descents into scatology - a collection of love stories. Recommended for riders, readers, passengers, and humans.

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method

that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you’ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.
