Document-Based Questions for Reading Comprehension and Critical Thinking

Heinemann Educational Books
Classic Books Library
presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United

States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyze the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

teachers need to get

started with a more thoughtful and compelling approach to teaching history, one that develops literacy and higher-order thinking skills, connects the past to students' lives today, and meets social studies 3C standards and most state standards (grades 6-12). The author provides over 90 primary sources organized into seven thematic units, each structured around an essential question from world history. As students analyze carefully excerpted documents-- including speeches by queens and rebels, ancient artifacts, and social media posts--they build an understanding of how diverse historical figures have approached key issues. At the same time, students learn to participate in civic debates and develop their own views on what it means to be a 21st-century citizen of the world. Each unit connects to current events with dynamic classroom activities that make history come alive. In addition to the documents themselves, this teaching manual provides strategies to assess student learning; mini-lectures designed to introduce documents; activities and

reproducibles to help students process, display, and integrate their learning; guidance to help teachers create their own units; guidelines for respectful student debate and discussion; and more. Book Features: A timely aid for secondary school teachers tasked with meeting standards and other state-level quality requirements. An approach that promotes student engagement and critical thinking to replace or augment a traditional textbook. Challenges to the "master narrative" of world history from figures like Queen Nzinga and Huda Sha'arawi, as well as traditionally recognized historical figures such as Pericles and Napoleon. Essential questions to help students explore seven of the most important recurring themes in world history. Role-plays and debates to promote interaction among students. Printable copies of the documents included in the book can be downloaded at tcpress.com.

include: • An overarching narrative that helps readers address historical arguments; • Relevant primary documents or artifacts, plus a discussion of a particular historical method well-suited to teaching about them; • Lesson plans suitable for both middle and secondary level classrooms; • Document-based questions and short bibliographies for further research on the topic.
