Fundamentals of Nursing Lippincott Williams & Wilkins

"Fundamentals of Nursing: The Art and Science of Nursing Care, Seventh Edition, promotes nursing as an evolving art and science, directed to human health and well-being. It challenges students to cultivate the blended skills they will need to serve patients and the public well. Our aim is to prepare nurses who combine the highest level of scientific knowledge and technologic skill with responsible, caring practice. We want to

challenge students to identify and master the cognitive and technical skills as well as the interpersonal and ethical/legal skills they will need to effectively nurse the patients in their care"-- Provided by publisher. *Fundamentals of Nursing - Binder Ready* Stanley Thornes Publishers Nurses and midwives have a professional responsibility to keep up-to-date with current research impacting on their clinical practice. They require the skills and knowledge to read and understand research reports, evaluate the quality of the research, synthesise different research studies, apply the most appropriate findings to their clinical practice and be able to evaluate its effectiveness. This book presents a unique approach to teaching the principles of health research using practical case studies with which students can identify and engage. The book covers core concepts and principles including: - what evidence is and why understanding research is vital - finding reliable sources of evidence - the nature of the research process - understanding quantitative and

qualitative research - ethical considerations - using research to guide clinical practice. Throughout the book, activities, summaries and review questions help ground theory in real life scenarios, highlighting how evidence-based practice can be applied in every aspect of nursing care. 'The text is highly readable while achieving the aim of familiarising the reader with the language of, and process for, doing research. It is logically organised and ... guides reader learning using a variety of techniques that reinforce [the] information presented and challenge thinking.'
