A User's Guide to Democracy Macmillan + ORM

The first major study of Alan Bush, this book provides new perspectives on twentieth-century music and communism. British communist, composer of politicised works, and friend of Soviet musicians, Bush proved to be 'a lightning rod' in the national musical culture. His radical vision for British music prompted serious reflections on aesthetics and the rights of artists to private political opinions, as well as influencing the development of state-sponsored music making in East Germany. Rejecting previous characterisations of Bush as political and musical Other, Joanna Bullivant traces his aesthetic project from its origins in the 1920s to its collapse in the 1970s, incorporating discussion of modernism, political song, music theory, opera, and Bush's response to the Soviet music crisis of 1948. Drawing on a wealth of archival sources, including recently released documents from MI5, this book constructs new perspectives on the 'cultural Cold War' through the lens of the individual artist.

Why don't women tell jokes? Because we marry them. Devastatingly funny and more than a little outrageous, Kathy offers up advice (“if he wants breakfast in bed, tell him to sleep in the kitchen”),

her inimitable insights into the battle of the sexes (“statistically, 100% of divorces begin with marriage”) and some scathing observations of the decidedly less fair sex (“all husbands think they're Gods. If only their wives weren't atheists”). Praise for Kathy Lette: 'Fabulous, fast-paced, funny & unapologetically female. Nobody does it better.' DEBORAH FRANCES-WHITE, THE GUILTY FEMINIST 'Deliciously rude and darkly funny, but with compassion and humanity at its heart. Read with relish.' NICOLE KIDMAN 'Kathy Lette can turn from raunchy farce to the most tender emotion in a trice.' STEPHEN FRY

The Instant Cult Classic on the Art of Reprogramming Your Own Psychological Software A bold and fascinating dive into the nuts and bolts of psychological evolution, *Designing the Mind: The*

Principles of Psychitecture is part philosophical manifesto, part practical self-development guide, all based on the teachings of legendary thinkers like Marcus Aurelius, Lao Tzu, Friedrich Nietzsche, and Abraham Maslow. The ideas and techniques it offers are all integrated into a vital theory for helping individuals scale the heights of self-mastery and lead great lives. "A fascinating framework" - Scott Barry Kaufman, PhD, author of *Transcend: The New Science of Self-Actualization* This visionary guide argues that the mind can be compared to software, made up of many interwoven algorithms which were originally programmed by natural selection. Though most never learn to alter their default programming, it is possible to rewire cognitive biases, change ingrained habits, and transform emotional reactions. The process of psychitecture enables you to unplug from your own mind, identify its underlying patterns, and become the architect of your own enlightenment.
