Map Reading and Land Navigation Fm 3-25. 26

HarperCollins UK

The field manual provides a standardized source document for Army-wide reference on map reading and land navigation. It applies to every Soldier in the Army regardless of service branch, MOS, or rank. This manual also contains both doctrine and training guidance on map reading and land navigation. Part One addresses map reading and Part Two, land navigation. The appendixes include an introduction to orienteering and a discussion of several devices that can assist the Soldier in land navigation.

Map Reading and Land Navigation Silver Rock Publishing

It requires no prior knowledge of these subjects. Sections include map care, comprehension of map symbols, military symbols, grid reference systems, and interpretation of aerial photographs. After the basics are covered, the second half moves to land navigation - varying terrains, elevations, day-night variations. Map and compass work is thoroughly explained. Finally, extreme scenarios - desert, mountain, jungle, arctic, and urban terrains - are all explored.

Manual of Map Reading Createspace Independent Publishing Platform

Includes a chapter on reading air photographs.

The Defence of Duffer's Drift Createspace Independent Publishing Platform

The U.S. Army's official guide to map reading, determining location, and navigating For a soldier, knowing where you are is a matter of life and death, and so it comes as no surprise that the Army has produced the most complete, clear, and thorough guide to map reading and navigation available. The book starts with a comprehensive explanation of the meaning and uses of maps, whether photographic, planimetric (standard-style), or topographic, then proceeds to the use of those maps, discussing compass techniques, celestial navigation, and determination of distance. There is a detailed section on interpreting topographic maps, with notes on tactical considerations for differing terrain, as well as determining the ease of movement through an area. The book's crucial, well-illustrated chapters have invaluable information on: Training Strategy Maps Marginal Information and

Symbols Grids Scale and Distance Direction Overlays Aerial Photographs Navigation Equipment and Methods Elevation Relief Terrain Association Mounted Land Navigation Navigation in Different Types of Terrain Unit Sustainment There is also information on field sketching, the tricky art of map folding, units of measure and conversion factors, map symbols, orienteering, and the global positioning system (GPS).

U.S. Army Guide to Map Reading and Navigation

Createspace Independent Publishing Platform

This volume is the second in a series of books that Battles & Book Reviews Publishing is releasing that encompass reprints of public domain US Military manuals that are useful to the prepping community This book contains the full text and images contained within the August 1968 version of Field manual 5-15: Field Fortifications. This is an older manual that was superseded in the early 1980's by two manuals FM 5-102 Countermobility and FM 5-103 Survivability. These two successor manuals are much more concentrated on planning factors for engineers and less so on the nuts and bolts of actually building and emplacing field fortifications. I will release these two manuals as hardcopies also at some future time but I wanted to get this manual out there sooner since it is full of more immediately practical information than either 5-102 or 5-103, which are written much more as planning manuals than something you pull out in the field to find practical information on what you need to build a specific obstacle and/or fortification. The contents of this volume are a faithful, cleaned up edition of this manual that has been formatted to fit the paper size. Further volumes in this series are forthcoming
U. S. Army Board Study Guide Createspace Independent Publishing Platform

The purpose of this field manual is to provide a standardized source document forreference on map reading and land navigation. Part One addresses map reading andPart Two, land navigation. The appendixes include a list of training materials, amatrix of land navigation tasks, an introduction to orienteering, and a discussion of severaldevices that can assist the soldier in land navigation.

Finally, the hard-to-find current edition of TC 3-25.26 Map Reading and Land Navigation is available to the general public. Packed with easy to follow illustrations and clear, concise content, this is perhaps the finest navigation training text on the planet and includes much information not found in the earlier 2005 edition. From the preface: " Training Circular (TC) 3-25.26 contains doctrine and training guidance on map reading and land navigation. Part One addresses map reading and Part Two, land navigation. The appendixes include an introduction to orienteering and a discussion of several devices that can assist the Soldier in land navigation. This TC provides a standardized source document for Armywide reference on map reading and land navigation. It applies to every Soldier in the Army regardless of service branch, MOS, or rank. The primary target audience for this publication is the platoon leader and other leaders within a reconnaissance platoon. The secondary audience includes training developers involved in developing training support materials for professional military education (PME).

Map Reading Doublebit Press

Training Circular (TC) 3-09.81, "Field Artillery Manual Cannon Gunnery," sets forth the doctrine pertaining to the employment of artillery fires. It explains all aspects of the manual cannon gunnery problem and presents a practical application of the science of ballistics. It includes step-by-step instructions for manually solving the gunnery problem which can be applied within the framework of decisive action or unified land operations. It is applicable to any Army personnel at the battalion or battery responsible to delivered field artillery fires. The principal audience for ATP 3-09.42 is all members of the Profession of Arms. This includes field artillery Soldiers and combined arms chain of command field and company grade officers, middle-grade and senior noncommissioned officers (NCO), and battalion and squadron command groups and staffs. This manual also provides guidance for division and corps leaders and staffs in training for and employment of the BCT in decisive action. This publication may also be used by other Army organizations to assist in their planning for support of battalions. This manual builds on the collective knowledge and experience gained through recent operations, numerous exercises, and the deliberate process of informed reasoning. It is rooted in time-tested principles and fundamentals, while accommodating new technologies and diverse threats to national security.
