Faced with today's challenging economy and new standards of corporate integrity, executives have never experienced a more difficult environment for growing their businesses. A new book offers a proven strategy for finding deserved revenue where most executives never thought of looking: right under their noses. Many companies now leak 2 to 5 percent of total revenue. But AT&T and IBM among others, have found that they can increase revenue by preventing such leakage with a proactive strategy called revenue maximization. PricewaterhouseCoopers partners Randy Browning and Sammy Kumar's TO THE MAX presents a complete, practical, and candid approach to maximizing revenue and combating revenue leakage in a range of industries.

Revenue Cycle Management Software A Complete Guide - 2020 Edition Plunkett Research, Ltd.

The tech sectors are the least understood portion of the healthcare system, but the ones that supply most of the innovation in healthcare services and generate most revenue. Fully updated for this third edition, The Business of Healthcare Innovation is a wide-ranging analysis of business models and trends in the tech sectors of the healthcare industry. It provides a thorough overview of and introduction to the innovative sectors that fuel improvements in healthcare: pharmaceuticals, biotechnology, life science startups, medical devices and information technology. For each sector, the book examines the trends in scientific innovation, the science behind that innovation, the business and revenue models pursued to commercialize that innovation, the regulatory constraints within which each sector must operate and the growing issues posed by

activist payers and consumers. From a combination of academic and industry perspectives, the authors show why healthcare sectors are such an important source of growth in any nation's economy.

Plunkett's Health Care Industry Almanac Bloomsbury Publishing USA

Patients at Risk: The Rise of the Nurse Practitioner and Physician Assistant in Healthcare exposes a vast conspiracy of political maneuvering and corporate greed that has led to the replacement of qualified medical professionals by lesser trained practitioners. As corporations seek to save money and government agencies aim to increase constituent access, minimum qualifications for the guardians of our nation's healthcare continue to decline—with deadly consequences. This is a story that has not yet been told, and one that has dangerous repercussions for all Americans. With the rate of nurse practitioner and physician assistant graduates exceeding that of physician graduates, if you are not already being treated by a non-physician, chances are, you soon will be. While advocates for these professions insist that research shows that they can provide the same care as physicians, patients do not know the whole truth: that there are no credible scientific studies to support the safety and efficacy of non-physicians practicing without physician supervision. Written by two physicians who have witnessed the decline of medical expertise over the last twenty years, this data-driven book interweaves heart-rending true patient stories with hard data, showing how patients have been sacrificed for profit by the substitution of non-physician practitioners. Adding a dimension neglected by modern healthcare critiques such as An American Sickness, this book provides a roadmap for patients to protect themselves from medical harm. WORDS OF PRAISE and REVIEWS Al-Agba and Bernard tell a frightening story that insiders know all too well. As mega corporations push for efficiency and tout consumer focused retail services, American healthcare is being dumbed down to the point of no return. It's a story that many media outlets are missing and one that puts you and your family's health at real risk. --John Irvine, Deductible Media Laced with actual patient cases, the book's data and patterns of large corporations replacing physicians with non-physician practitioners, despite the vast difference in training is enlightening and astounding. The authors' extensively researched book methodically lays out the problems of our changing medical care landscape and solutions to ensure quality care. --Marilyn M. Singleton, MD, JD A masterful job of bringing to light a rapidly growing issue of what should be great concern to all of us: the proliferation of non-physician practitioners that work predominantly inside algorithms rather than applying years of training, clinical knowledge, and experience. Instead of a patient-first mentality, we are increasingly met with the sad statement of Profits Over Patients, echoed by hospitals and health insurance companies. --John M. Chamberlain, MHA, LFACHE, Board Chairman, Citizen Health A must read for patients attempting to navigate today's healthcare marketplace. --Brian Wilhelmi MD, JD, FASA

Revenue Cycle Management Team A Complete Guide - 2020 Edition Springer Nature

Already a regional and global centre for business and finance, Dubai's reputation has been bolstered by the MSC's decision to upgrade the UAE from frontier to emerging market status in 2014, while the emirate's successful Expo 2020 bid is expected to generate myriad opportunities for private investors across a range of sectors. Construction is thriving once again, driven in large part by strong retail sector growth, with various projects, including plans for the world's largest mall, indicating that the sector will maintain its position as the emirate's biggest GDP contributor moving forward. The transport and logistics framework is set for major expansion in the coming years as well, furthering cementing the emirate's status as a leading transport and logistics hub not just regionally, but globally too. The continued development of Dubai's retail and hospitality offerings, alongside the upgrades to its airports, should help to ensure robust growth in visitor numbers from both the region and further afield.
