Accounting and Business Ethics BPP Publishing

Despite the enormous impact of various accounting scandals on the accounting profession, the general malaise amongst the profession more broadly, and the significant legislative and institutional reforms that have taken place as a result, there are still surprisingly few textbooks on accounting ethics. This concise introductory text takes a broad view of ethics and accounting, taking into account contemporary social trends, such as globalization and terrorism. Rather than delineating codes of professional conduct, this text pushes the reader towards an understanding of the nature of ethical dilemmas and the factors that influence the ways in which accountants frame ethical questions. The book is divided into two parts. The first part focuses on developing thinking about the different kinds of ethical questions that could be posed in relation to accounting. The second part focuses more explicitly on accounting practice, exploring the ethical function of accounting in relation to the market economy, ethics in relation to the accounting profession, and the ethics of the international accounting harmonization project. Accounting and Business Ethics is a compact

introduction aimed at both students and practitioners who want to understand more about the ethics of accounting.

Testimonials of Astranti Courses, Study Texts and Mock Exams: "Very targeted to the exam and very professional, is every bit as good as attending a class room tuition or revision course." James Glackin "All in all it's the best thing I came across during my CIMA studies. I don't know any better way to help yourself to pass these tough exams." Grzegorz Narozanski "Just wanted to let you know that I passed all 3 exams using the textbook and your mock exams which I found really helpful, thanks!" Nneoma Nwaogu "I would also like to extend my great gratitude for such a wonderful study text; they made my understanding of CIMA P1 much easier. Once more thank you very much to the Team." Mthuthuzeli September "I received the fantastic news this morning that I have finally passed T4!! Many thanks for your support and advice in the lead up to the exam, I am certain that without the really important tips on exam strategy you provided I would not have passed. Many thanks again!" Babak Fardaghaie "So I managed a 76% pass for E2 using your notes. They are very well structured and easy to use. Thank you so very much." Amanda Vakalisa "The Astranti method of teaching is systematic and easy to follow. I gained a lot of knowledge and regret not enrolling with Astranti for my earlier CIMA exams. After the course I was confident about my preparation. I would recommend the course to everyone sitting the T4b exam especially the MARKED mocks. Its the section by section detailed feedback from tutors that helps to improve and gain confidence." Gunjan Nagpal "I have cleared all 3 strategic level papers in my first attempt. I used the Astranti learning material during my final revision. They were short, precise and saved a great amount of time which made all the difference for me in the exam. Thank you very much." Raj The Astranti Study Texts The Astranti Study Texts have been used by thousands of

Bankruptcy prediction is one of the most important research areas in corporate finance. Bankruptcies are an indispensable element of the functioning of the market economy, and at the same time generate significant losses for stakeholders. Hence, this book was established to collect the results of research on the latest trends in predicting the bankruptcy of enterprises. It suggests models developed for different countries using both traditional and more advanced methods. Problems connected with predicting bankruptcy during periods of prosperity and recession, the selection of appropriate explanatory variables, as well as the dynamization of models are presented. The reliability of financial data and the validity of the audit are also referenced. Thus, I hope that this book will inspire you to undertake new research in the field of forecasting the risk of bankruptcy. Cambridge University Press

CIMA offers a business qualification with a finance focus, aiming to produce members with accounting prowess who are skilled in strategic decision-making. 98% of its members work in business, the highest proportion of any worldwide accountancy body. The CIMA E1 exam covers a variety of topics that are unrelated but are all essential to the running of a successful business. There is a strong theoretical basis to this subject and it is important that students understand how to apply these theories in the 'real world'. The key E1 subject areas are: * The global business environment * Information systems * Marketing * Managing human capital. The E1 Study Text comprehensively covers all the E1 syllabus areas. It breaks down each topic into manageable chunks and clearly describes all relevant theories. The questions in the question bank demonstrate how these theories should be applied in an exam situation.

CIMA, for New Syllabus Exams in 2010 Elsevier

A few years ago, Americans held out their systems of corporate governance and financial disclosure as models to be emulated by the rest of the world. But in late 2001 U.S. policymakers and corporate leaders found themselves facing the largest corporate accounting scandals in American history. The spectacular collapses of Enron and Worldcom—as well as the discovery of accounting irregularities at other large U.S. companies—seemed to call into question the efficacy of the entire system of corporate governance in the United States. In response, Congress quickly enacted a comprehensive package of reform measures in what has come to be known as the Sarbanes-Oxley Act. The New York Stock Exchange and the NASDAQ followed by making fundamental changes to their listing requirements. The private sector acted as well. Accounting firms—watching in horror as one of their largest, Arthur Andersen, collapsed after a criminal conviction for document shredding—tightened their auditing procedures. Stock analysts and ratings agencies, hit hard by a series of disclosures about their failings, changed their practices as well. Will these reforms be enough? Are some counterproductive? Are other shortcomings in the disclosure system still in need of correction? These are among the questions that George Benston, Michael Bromwich, Robert E. Litan, and Alfred Wagenhofer address in *Following the Money*. While the authors agree that the U.S. system of corporate disclosure and governance is in need of change, they are concerned that policymakers may be overreacting in some areas and taking actions in others that may prove to be ineffective or even counterproductive. Using the Enron case as a point of departure, the authors argue that the major problem lies not in the accounting and auditing standards themselves, but in the system of enforcing those standards. Rather than attempting to craft a single set of accounting and reporting standards for all companies throughout the world, the authors

advise policymakers to allow competition between the two major sets of standards: Generally Accepted Accounting Principles and International Financial Reporting Standards. The authors also believe that the corporate disclosure system needs to be updated to reflect changes in the underlying economy. In particular, they recommend new forms of disclosure for a variety of nonfinancial indicators to better enable investors and analysts to ascertain the source and nature of intangible assets. They also urge policymakers to exploit the advantages of the Internet by encouraging more frequent financial disclosures in a form that will make them more widely accessible and more easily used.
