Glen DeZeeuw is a firm believer in the concept of life long learning and continues to work on learning more. Throughout his career, he has studied leadership and is an avid reader of books on leadership. In this, the author's first book, DeZeeuw wants to share some of the timeless principles he has learned over the span of his leadership career. Born and raised in northwest Iowa, Glen graduated from Iowa State University in Ames, Iowa in 1969, and joined the Northwestern Mutual shortly thereafter. His 40 year career with Northwestern Mutual included time in sales, in field leadership in both Iowa and Colorado, and as Vice President of Agency Development in the Home Office in Milwaukee. Following his retirement from Northwestern Mutual in 2009, Glen returned to Colorado and founded Lifesong Consulting LLC, a consulting firm dedicated to helping people grow in their leadership skills. DeZeeuw is highly regarded as a speaker, and continues to do motivational talks across the country. He and his wife, Carolyn, were married in 1968, and now reside near Windsor, Colorado. They feel very blessed to live in such a beautiful place. They are both active in their church and love to spend time with their grandsons. Glen's interests include doing crossword puzzles, golfing, bicycling, hiking, and reading.

Ironies Leaders Navigate, Second Edition First Edition Design Pub. [EPI] “. . . just as one cannot not communicate, you do not have the option of not using power.” [EPI] For every definition of leadership, you can find a definition of power that makes the same statement. Hence, every act of leadership is an act of power, and the better we understand power, the better we understand leadership. And we misunderstand power, scholars lament, in part by under-understanding power. We equate it merely with coercion and competition, but miss how power dynamics define leadership, education, coaching, teamwork, parenting, etc. Here is a brief, contextual, synergistic, occasionally ironic study of power, which provides numerous lenses through which to examine leadership settings, including how they differ. This study (in specific, framed pages) ultimately focuses on a unique leadership setting—the local church. It ponders distinct challenges faced by church leaders, and by The Church's Leader, Jesus Christ.

 Why have small churches remained small? And why has this mandate in Mark 16: 15 not impacted the thousands of small, denominational churches across the country? When you consider

the plan of salvation, how can a church not grow? Because of the positive growth in many nondenominational churches, some church leaders falsely assume they can have the same results by abandoning their denominational heritage. However, most people are attracted to a particular church because they feel welcomed by the people in that church, and because of that church's unique ministry in their community. While it may be helpful to de-emphasize the denominational connection, it is a mistake to abandon it. As you read "The Little Brown Church in the Vale," you will be challenged to take a fresh look at the direction your ministry and your church is taking.

 A critical, global counterpoint to more western-centric texts that will appeal to critical leadership scholars, those teaching leadership from a critical perspective and those teaching leadership with an international focus. Split into two parts; its first part presents the local and regional variations in leadership from across the globe, with each of the twenty individual authors presenting the histories, cultures, tensions and social changes that shape the practice of everyday leadership in their respective region. Regions and countries included are: the Arab Middle East, Argentina, ASEAN, Australia, Brazil, China, Democratic Republic of Congo, Ethiopia, France, Germany, India, Japan, Mexico, Poland, Russia, Scandinavia, South Africa, Turkey, UK, USA. In the second part, the editors then critically analyse these chapters and identify the key themes and specific issues, enabling the reader to challenge their own leadership perceptions and move beyond the normative, uncritical approach to leadership. Suitable reading for leadership students, researchers and practitioners looking to enhance their knowledge of global leadership.

Servant Leadership as Paradigm, Power, and Possibility Wipf and Stock Publishers

Cheryl Bachelder joined an ailing restaurant chain and turned it into the darling of the industry--by daring to serve the people in her organization well. When Bachelder was named CEO of Popeyes in the fall of 2007, guest visits had been declining for

years, restaurant sales and profit trends were negative, and the company stock price had dropped from \$34 in 2002 to \$13. The brand was stagnant, and relations between the company and its franchise owners were strained. By 2014, average restaurant sales were up 25 percent, and profits were up 40 percent. Popeyes' market share had grown from 14 percent to 21 percent, and the stock price was over \$40. The franchisees were so pleased with the turnaround that they began reinvesting in the brand, rapidly remodeling restaurants, and building new units around the world. The difference maker, Bachelder says, was a conscious decision to lead in a new way. She and her team created a workplace where people were treated with respect and dignity yet challenged to perform at the highest level. Silos and self were set aside in favor of collaboration and team play. And the results were measured with rigor and discipline. Servant leadership is sometimes derided as soft or ineffective, but this book shows that it's actually challenging and tough minded--a daring path. Bachelder takes you firsthand through the transformation of Popeyes and shows how a leader at any level can become a Dare-to-Serve leader.

12 Actions to Create the Ideal Workplace Juta and Company (Pty) Ltd

No political image in recent American history has enjoyed the impact of the "limousine liberal." It has managed to mobilize an enduring politics of resentment directed against everything from civil rights to women's liberation, from the war on poverty to environmental regulation. Coined in 1969 by New York City mayoralty candidate Mario Procaccino, the term took aim at what he and his largely white lower middle class and blue collar following considered the repellent hypocrisy of well-heeled types who championed the cause of the poor, especially the black poor, but who had no intention of bearing the costs of their plight. The metaphor zeroed in on liberal elites who preferred to upset rather than defend the status quo not only in race relations, but in the sexual, moral, and religious order and had little interest in looking after the needs of working people. In *The Limousine Liberal*, the acclaimed historian Steve Fraser argues that it is impossible to understand American politics without coming to grips with this image, where it originated, why it persists, and where it may be taking us. He reveals that the limousine liberal had existed in all but name long before Procaccino gave it one. From Henry Ford decrying an improbable alliance of Jews, bankers, and Bolsheviks in the 1920s to the Tea Party's vehement hatred of Hillary Clinton, the fear of the limousine liberal has stoked right-wing populism for nearly a century. Today it fuses together disparate elements of the conservative movement. Sunbelt entrepreneurs on the rise, blue collar ethnics and middle classes in decline, heartland evangelicals, and billionaire business dynasts have found

common cause, despite their real differences, in shared opposition to liberal elites. The *Limousine Liberal* tells an extraordinary story of why the most privileged and powerful elements of American society were indicted as subversives and reveals the reality that undergirds that myth. It goes to the heart of the great political transformation of the postwar era: the rise of the conservative right and the unmaking of the liberal consensus. **Seven Pillars of Servant Leadership** F.A. Some leaders fundamentally alter the status quo whilst others guide quietly. Most leadership books emphasise specific rules, but Tom Cronin and Michael Genovese see leadership as filled with paradox. *Leadership Matters* offers a different view of leadership - one that builds community and responds creatively to new situations. Cronin and Genovese argue that leadership is about more than just charisma and set leaders on to a different path - to unleash the power of paradox.

India is an emerging market economy, and has been more successful than most other emerging economies. Key to this success are India's ancient legacy of consensus democracy, non-violence, multi-culturality, tolerance, secularism, and the practical simplicity of economic life inspired by Mahatma Gandhi. Also, vital to India's present economy is the history of the country since the struggle for Independence began in 1857. India has followed a strikingly distinct route of development from other emerging economies such as South Korea, China, Malaysia, Brazil, and Mexico. While these countries concentrated on manufacturing and exports, India grounded its economy on an integrative domestic system of life. This model is marked by interesting and gradual, but constant, growth with an emphasis on services. Reforms in land-agricultural system, political governance, and financial management have led to a landmark stage of economic progress, with India's GDP rate higher than many emerging market economies. This volume explores the reasons why India has fared better than other emerging market economies, and whether other countries can take inspiration from this model and rebuild their own countries based on their national resources, cultural heritage, and the capacity to interact globally.

Steward leadership is a form of leadership that focuses on others, the community and society at large, rather than the self. Many senior leaders and executives across the globe appear to 'naturally' move into a stewardship mindset at a ripe age or when their careers have matured, whereas executives of around 30 years old, on average, are typically focused on their personal self-interests. The authors of *Steward Leadership: a maturational perspective*, who teach MBA courses around the world, wondered how to develop stewards at younger ages and set about creating a framework for stewardship and its requisite behaviour. Their research was conducted among a group of MBA students, testing nine stewardship attributes: personal vision, personal mastery, vulnerability and maturity, risk-taking and experimentation, mentoring, raising awareness, shared vision, valuing diversity, and delivering results. The outcome of the study, which is explored in this book, provides a base-line of attitudes which were tested against various demographic variables. In addition, the authors interviewed industry leaders from around the world to gauge their perspectives on and experience with the concept of stewardship and some of its dimensions, to gain qualitative insights. The results of their research provide the theoretical as well as consulting tools with which organisations can develop

stewards, whether through training programmes, mentoring programmes, coaching initiatives and/or personal development practices. The authors believe that stewardship is a more viable and indeed better alternative to current leadership concepts. This book provides a roadmap by which contemporary and upcoming leaders can be guided into developing their leadership abilities - and become the stewards of the future.

Lessons from the Past, Current Approaches, and Future Insights SAGE

Social Sustainability for Business demonstrates the need for a transformational change to the way businesses across the globe operate. What has become the standard, accepted "business model," with a focus on corporate profit, shareholder wealth maximization, and GDP growth, is no longer a sustainable business model for workers, consumers, communities, society, the planet, or any of its inhabitants and ecosystems. The authors argue that the current commercial system depletes natural resources, denigrates human rights, and inhibits positive social and technological innovation. To address these issues, they focus on societal goals—such as a sustainable planet, meeting human rights of workers, and safe products for consumers—and outline steps that organizations and individuals must take to achieve them. Readers will gain insight into the psychological barriers to and influences on sustainable behavior. They will also learn how reconsidering corporate social responsibility and business ethics can stop and reverse the destruction of a profit-based approach. Cases on modern examples of sustainability or lack thereof explain how establishing and maintaining a socially sustainable business system can protect the environment, meet the rights of its people, and ensure that their needs are met tomorrow. End-of-chapter and end-of-case discussion questions will help students in sustainability classes to think critically about the practical impact of the topics discussed.
