The author of

Straw Dogs,
famous for his
provocative
critiques of
scientific
hubris and the
delusions of
progress and

humanism, turns his attention to cats—and what they reveal about humans' torturous relationship to the world and to themselves. The history of philosophy has been a predictably tragic or comical succession of palliatives for human disquiet. Thinkers from Spinoza to Berdyaev have pursued the perennial questions of how to be happy, how to be good, how to be loved, and how to

live in a world of change and loss. But perhaps we can learn more from cats--the animal that has most captured our imagination--than from the great thinkers of the world. In *Feline Philosophy*, the philosopher John Gray discovers in cats a way of living that is unburdened by anxiety and self-consciousness, showing how they embody answers to the big questions of love and attachment,

mortality, morality, and the Self: Montaigne's house cat, whose unexamined life may have been the one worth living; Meo, the Vietnam War survivor with an unshakable capacity for "fearless joy"; and Colette's Saha, the feline heroine of her subversive short story "The Cat", a parable about the pitfalls of human jealousy. Exploring the nature of cats, and what we can learn from it, Gray offers

a profound, thought-provoking meditation on the follies of human exceptionalism and our fundamentally vulnerable and lonely condition. He charts a path toward a life without illusions and delusions, revealing how we can endure both crisis and transformation, and adapt to a changed scene, as cats have always done.

With each object that disappears, the postman reflects on the life he's lived, his joys and regrets, and the people he's loved and lost.

Global
From Michael Ondaatje: an electrifying novel, by turns thrilling and deeply moving—one of his most vividly rendered and compelling works of fiction to date. In the early 1950s, an eleven-year-old boy boards a huge liner bound for England. At mealtimes, he is placed at the lowly "Cat's Table" with an eccentric and unforgettable group of grownups and two other

boys. As the ship makes its way across the Indian Ocean, through the Suez Canal, into the Mediterranean, the boys find themselves immersed in the worlds and stories of the adults around them. At night they spy on a shackled prisoner—his crime and fate a galvanizing mystery that will haunt them forever. Looking back from deep within adulthood, and gradually moving back and forth from the decks and

holds of the ship to the years that follow the narrator unfolds a spellbinding and layered tale about the magical, often forbidden discoveries of childhood and the burdens of earned understanding, about a life-long journey that began unexpectedly with a sea voyage. The Karma of Cats HarperCollins There's a new cat in town! This feisty sibling of the international bestseller I Could Pee on

This will be making its own sensational mark in the cat-poetry world. I Could Pee on This, Too explores fresh feline emotions and philosophical musings through cats' own poetry, such as "Welcome New Cat," "Sleeping My Life Away," and "You Also Live Here." Any cat lover who's longed for a deeper look into the enigmatic world of their cats will fall whiskers over paws for this well-versed

follow-up.

 cats—about

life, love, and our spiritual nature “The Karma of Cats is yet more proof that cats teach us to be better humans, and sometimes even save our lives. Read this book with a cat on your lap, then hand it to another biped in need of inspiration.” —Caroline Paul, author of *Lost Cat and The Gutsy Girl* “What I find most enticing about *The Karma of Cats* are the golden filaments of respect, delight, and appreciation that weave

through the unique voice of each storyteller, these kindred spirits who—like ourselves—treasure the remarkable gifts bestowed upon us by our feline family members.” —Susan Chernak McElroy, author of *Why Buffalo Dance* There is nothing quite like the love of a cat. Both revered and feared throughout history, cats are unique in the mystical truths and practical

lessons they share with us. In *The Karma of Cats*, spiritual teachers and writers reflect on the wisdom and gifts they’ve received from their feline friends—exploring themes of radical respect, unconditional love, our spiritual nature, and more. Loving companions and wild spirits, our feline friends have much to teach all who welcome them into their homes and hearts. With an

introduction by Seane Corn and contributions by Alice Walker, Andrew Harvey, Biet Simkin, Brother David Steindl-Rast, Damien Echols, Geneen Roth, Jeffrey Moussaieff Masson, Kelly McGonigal, Rachel Naomi Remen, Sterling "TrapKing" Davis, and many more. <u>What My Cat Has Taught Me about Life</u> Running Press Adult In the continuously changing field	of social sciences, ethical considerations in anthropologic al studies pose unprecedente d challenges. The book Reviving and Re-Writing Ethics in Social Research For Commoning the Community embarks on a transformative journey, moving beyond historical analysis to address pressing contemporary questions about the norms	governing anthropologic al study. Who guards the guardians? What ethical challenges does the modern era pose for anthropologic al sciences? These are the critical questions explored in this comprehensiv e exploration of the ethical landscape of social research. As the ethical foundations of social research shift with political, intellectual, and societal changes, there is a

pressing need to reassess the purpose of anthropological knowledge and the responsibility of researchers towards the communities they study. The book raises vital concerns about the evolving nature of ethical considerations, challenging traditional notions of ethical research. It highlights the ethical and axiological dilemmas faced by anthropologists in the modern era,

emphasizing the need for a more community-centric approach that actively benefits the studied communities. *Reviving and Re-Writing Ethics in Social Research For Commoning the Community Chronicle* Books
Cats have been popular household pets for thousands of years, and their numbers only continue to rise. Today there are three cats for every dog on

the planet, and yet cats remain more mysterious, even to their most adoring owners. Unlike dogs, cats evolved as solitary hunters, and, while many have learned to live alongside humans and even feel affection for us, they still don't quite "get us" the way dogs do, and perhaps they never will. But cats have rich emotional lives that we need to respect and understand if they are to

thrive in our company. In Cat Sense, renowned anthrozoologist John Bradshaw takes us further into the mind of the domestic cat than ever before, using cutting-edge scientific research to dispel the myths and explain the true nature of our feline friends. Tracing the cat's evolution from lone predator to domesticated companion, Bradshaw shows that although cats and humans

have been living together for at least eight thousand years, cats remain independent, predatory, and wary of contact with their own kind, qualities that often clash with our modern lifestyles. Cats still have three out of four paws firmly planted in the wild, and within only a few generations can easily revert back to the independent way of life that was the exclusive

preserve of their predecessors some 10,000 years ago. Cats are astonishingly flexible, and given the right environment they can adapt to a life of domesticity with their owners—but to continue do so, they will increasingly need our help. If we're to live in harmony with our cats, Bradshaw explains, we first need to understand their inherited quirks: understanding their body language, keeping their

environments—however small—sufficiently interesting, and becoming more proactive in managing both their natural hunting instincts and their relationships with other cats. A must-read for any cat lover, *Cat Sense* offers humane, penetrating insights about the domestic cat that challenge our most basic assumptions and promise to dramatically improve our

pets' lives—and ours. *The People of the Book and the Camera* Penguin

Seduction is just the practice of artful stretching. Never let people know how fast you are. Appear slow in all things, and less is expected of you. When someone is on the computer too long, help them by distracting

them, or walk lightly on their keyboard. So advises Stanley, a remarkably astute cat with a keen eye for the important things in life. Perhaps you don't have time for yoga, can't afford therapy, or wouldn't dare cry to mother. If so, let Stanley be your guide. Lessons from Stanley the Cat offers wise and witty maxims from Stanley himself, translated by his dotting psychotherapist (human)

Pete the Cat's Groovy Guide to Life Pete the Cat's Groovy Guide to Love Pete the Cat's 12 Groovy Days of Christmas Soul cats University of Chicago Press Amihay offers a pioneering study of the unique nexus between literature and

photography in the works of Hebrew authors. Exploring the use of photography—both as a textual element and through the inclusion of actual images—Amihay shows how the presence of visual elements in a textual work of fiction has a powerful subversive function. Contemporary Hebrew authors have turned to photography as a tool to disrupt narratives and

give voice to marginalized sectors in Israel, including women, immigrants, Mizrahi Israelis, LGBTQ+ individuals, second-generation Holocaust survivors, and traumatized army veterans. Amihay discusses standard novels alongside graphic novels, challenging the dominance of the written word in literature. In addition to providing a poetic analysis of imagetext pages, Amihay addresses the social and political issues authors are responding to, including gender roles, Zionism, the ethnic divide in Israel, and its Palestinian minority. In exploring these avant-garde novels and their authors, Amihay elevates their significance and calls for a more expansive definition of canonical Hebrew literature.
