The Nervous System In 9 Minutes The Working Brain An Introduction To Neuropsychology ... Introduction: The Human Brain. The brain is the most complex organ in the human body. It produces our every thought, action, memory, feeling and experience of the world. This jelly-like mass of tissue, weighing in at around 1.4 kilograms, contains a staggering one hundred billion nerve cells, or neurons. Introduction: The Human Brain | New Scientist Like other parts of your body, your brain is made up of cells. Many of these cells help regulate the chemistry of the brain and give it structure. But some are specialized to do far more. These cells, known as neurons, do most of the work that allows you to think, feel, and move. Brain Introduction |

AMNH Singing for the Brain - an introduction - dementia services - Duration: 3:59. Alzheimer's Society 44,810 views Introduction to the brain Neuroscience: the Science of the Brain. Inside our heads, weighing about 1.5 kg, is an astonishing living organ consisting of billions of tiny cells. It enables us to sense the world around us, to think and to talk.
