A product of old money and a brilliant heart surgeon, Henry McLaughlan is condescending and pretentious, with a strong need for approval and a reputation for womanizing. Dark secrets from his youth contribute to his atheism, and Henry's medical skill alone has become his saving grace and the heart of his identity. Henry falls in love with Theresa Tabor, a widow and mother of two young children. "You're white water rafting and I'm a deep

water port," Theresa jokes as they begin to work out their differences. Through her example and uncompromising confrontations, Henry gradually transcends past misery to yield his intrinsic decency and recover his faith in God. Unapologetic about her blue-collar, Catholic roots, Theresa marries Henry, then struggles with childbearing, a devastating accident, and his powerful family influences. A COUNTRY PLACE is a contemporary redemption story, and a tribute to the enduring bonds of love and family.

*Vehicle and Automotive Engineering 3*  
Springer

This book presents the proceedings of the first vehicle engineering and vehicle industry conference. It captures the outcome of theoretical and practical studies as well as the future development trends in a wide field of automotive research. The themes of the conference include design, manufacturing, economic and educational topics.

*Elements of Physiological Psychology*  
Springer

This book presents the proceedings of the third Vehicle and Automotive Engineering conference, reflecting the outcomes of theoretical and practical studies and outlining future development trends in a

broad field of automotive research. The conference's main themes included design, manufacturing, economic and educational topics.

*A Country Place*

"There can be no doubt that an important movement in psychology has arisen in recent times through the effort to approach the phenomena of mind from the experimental and physiological point of view. As a result of some years of study of the general subject, I express with considerable confidence the opinion that there is no ground for extravagant claims or expectations, and still less ground for any fear of consequences. In all cases of new and somewhat rankly growing scientific enterprises, it is much the better way to waive the discussion of actual or possible achievements, as well as of welcomed or dreaded revelations of new truth, and proceed at once to the business on hand. It is proposed in this book to

follow this better way. It will be the task of the book itself to set forth the assured or alleged results of Physiological Psychology; and this will be done at every step with such degree of assurance as belongs to the evidence hitherto attainable upon the particular subject discussed. With declamation, either in attack or defense of the "old psychology," of the "introspective method," etc., one may dispense without serious loss. The method and arrangement of the book have been chosen so as to fit it for use, both as a text-book by special students of the subjects of which it treats, and also by the general reader who is interested in knowing what results have been reached by the more modern--and even the latest--psycho-physical researches"--Pref.
