INTRODUCTIO  
N TO HEAT

TRANSFER

AND MASS

TRANSFER 1.1

HEAT FLOWS

AND HEAT

TRANSFER

COEFFICIENTS

1.1.1 HEAT

FLOW A

typical

problem in

heat transfer

is the

following:

consider a

body "A" that

exchanges

heat with

another body,

of infinite

medium, "B".

3 Heat And

Mass Transfer

Convection

involves

transfer of

heat by the

movement of

mass, which is

a more

efficient

means of heat

transport in

the Earth

compared to

pure

conduction. In

several

processes of

the Earth's

interior, both

conductive as

well as

convective

heat transfer

play important

roles.

Radiation is

the least

important

mode of heat

transport in

the Earth.
