*The Islamic State in
Khorasan* Test Prep Books

This book examines the lives and writings of important intellectual women, most of whom are known by small circles only and then in a foreign language. This is the first time many of them, including someone as famous (in Austria) as Kaethe Leichter, will see the light of day in English. The work shows how these women negotiated their national and Jewish identities, their intellectual interests and personal lives in the multi-cultural population of Central Europe.

Hav Pustak Mahal
A New York Review Books
Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us

through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

Professionalism is
arguably more important
in some occupations than
in others. It is vital in
some because of the life
and death decisions that
must be made, for
example in medicine. In
others the rapidly
changing nature of the
occupation makes
efficient regulation
difficult and so the
professional behaviour of
the practitioners is central
to the good functioning of
that occupation. The core
idea behind this book is
that Information and
Communication
Technology (ICT) is
changing so quickly that
professional behaviour of
its practitioners is vital
because regulation will
always lag behind.
