Some 35 years ago Datsun (now Nissan) introduced the 1970 Datsun 240Z sports car, emphatically disproving the perception

that Japanese automakers could only produce economy cars. Designed specifically to appeal to the American market, the Z car has enjoyed long-term popularity with its sporty styling and impressive performance. Z car fans are loyal and numerous. Over 1.4 million Z cars have been sold worldwide, including 1 million-plus in the U.S. The five generations of Z cars include the latest version, the 350Z introduced in 2003, which has refueled interest in Z cars. This book will thoroughly cover the history of this breakthrough Japanese sports car, and will include official Datsun/Nissan photography and memorabilia such as advertising and international marketing materials.

The Mitsubishi Pajero was first launched in 1983, creating a new class of 4x4, smaller and more affordable than the Range Rover. Renamed Shogun for the UK market, and Montero for Spain and

the Americas, this rugged, yet refined, off-roader rapidly became Mitsubishi's best-selling export product. In the 22 years since its introduction, the Shogun's popularity has gone from strength to strength, and in the UK grey imports of Pajeros now outnumber official Shoguns, while the Shogun brand has expanded to include the Shogun Sport and the Shogun Pinin. This fascinating book is essential reading for all Shogun owners and enthusiasts.

The Japanese automotive industry enjoyed spectacular success in the 1980s. This was largely due to the so-called 'Lean Production System' - the combination of an efficient production system, an effective supplier system, and a product development system. In the 1990s the industry fell on hard times because of the Japanese asset price bubble and extreme currency appreciation. In this book, eminent industry specialist Koichi Shimokawa draws on his thirty years of research and fieldwork with Japanese and American firms, to show how the Japanese automotive industry has managed to recover from this difficult period. He shows how firms like Toyota were able to transfer Japanese systems to

overseas plants and how they have changed in order to compete in increasingly globalized markets. In addition, the book also addresses the two major challenges to the current industry model: the rise of China and the environmental and energy supply situation.

Graphic designer Paul has a history. Having organized events on the London rave scene and supplied recreational drugs across the capital, he turns his back on his past life and leaves the UK to travel the world, picking up the odd bit of legal and illegal work on the way. After meeting gifted Thai chemists, Paul sets up a lab in Northern Thailand, producing high-quality LSD. But there are others on the same turf who don't appreciate the competition. When his new business comes to the attention of a local crime lord, Paul has to take drastic measures to survive. It doesn't take long for Paul to be pulled back into the world of drug trafficking, as he gets involved with the biggest cartel in the region. When things turn sour, a frantic hunt across South East Asia follows. But when Paul and his pursuers finally confront each other, the answers are not at all what he had expected. This book contains adult content and is not recommended for readers under the age of 18.

South Africa, like most other countries, hosts thousands of sport events each year. Therefore, destinations compete fiercely not only to host these events but also to offer quality events. This book explores the economic uses of violence and coercion in Russia in the 1990s through interviews with members of criminal groups, heads of protection companies, law enforcement employees and businesspeople. It also uses journalistic and anecdotal evidence. It shows that violence has played a crucial role in creating the institutions of a new market economy, and describes the competition among so-called violence-managing agencies which have multiplied with the liberal reforms of the early 1990s. Examples of these organizations include criminal groups, private security services, private protection companies,

and informal protective agencies associated with the state. The book also examines the organizational bases of violence-prone groups in sports clubs (particularly martial arts clubs), associations for veterans of the Soviet-Afghan war, ethnic gangs, and regionally based social groups. Some groups wore state uniforms and others did not, but all of their members spoke and acted essentially the same and were engaged in the same activities: intimidation, protection, information gathering, dispute management, contract enforcement, and taxation. Each group controlled the same resource-organized violence.
