The innovative lift-truck transmission from ZF. The wide functionality

of diesel lift trucks makes the highest demands on the driveline,

in particular on the transmission. For example, gear-shifting must

occur under full load without interruption in traction and without

jerking. With the ERGOPOWER series ZF offers a whole range of

transmissions which have been specially conceived for the

requirements of lift trucks and other materials transport

vehicles.ERGOPOWER - ZF - ZF FriedrichshafenThe ZF-Powershift

Transmission 4 WG-92/98 TSC is composed of a hydrodynamic

torque converter and a rear-mounted multi-speed powershift

reversing transmission with integrated transfer case (see

Table-1). The torque converter is a wear-free starting device

which is adapting itself infinitely variable to the required

conditions (road resistance).ZF - POWERSHIFT TRANSMISSION 4

WG-92/98 TSC - JLG IndustriesThe innovative transmission for the

special challenges of ground support equipment (GSE) With the

ERGOPOWER series ZF offers a whole range of transmissions

which have been specially conceived for ground support

equipment. ZF provides solutions for a broad range of GSE

vehicles like aircraft tow tractors, cargo loaders, belt loader,

passenger stairs, and towbarless tractors.ERGOPOWER - ZF

ZF Transmission Service Manual. Preface. The Service Manual

introduces the ZF 4WG200(4WG158[6WG200 also

applied)transmission removal and assembling process and offers

the transmission service process technology and standard

requirements, which can help the service personnel understand

the transmission removal and assembling methods more

profoundly as well as lay a solid technical foundation for the

service personnel to correctly judge the malfunction and do

troubleshooting.

Description. ZF WG powershift transmission offers everything

technically possible to make wheel loader application more

efficient,effective and safe. Through modular design,WG

transmission can be tailored to exact technical needs.Depending

on application and maximum speed,there is a choice for 3 or 4

forward and reverse gears.Since wheel loader work 30% of the

time in reverse,closed gear stepping in forwards and reverse are

particularly important for efficiency and service life.
