Catalog Bloomsbury Publishing Science Education and Information Transfer reviews developments in the areas of science education and information transfer. Topics covered include the use of games in science and technology education, transfer of information using readily available technology, and networking. The concepts of global learning and distance learning are also discussed, along with the use of video techniques and computer technology to transfer information. This volume is comprised of 10 chapters and begins with an overview of the information society, the usability of information, and the efficiency of information transfer. The discussion then turns to the use of games to teach science and technology; the most readily available technology for transferring information from teachers to students; and networking as a means to transfer information. The following chapters explore the concept and practice of global learning in the perspective of

dissemination of scientific and technological knowledge in response to human needs; the use of microcomputers in the teaching of science; and some of the features of distance learning. The final chapter is devoted to teaching information technology in the classroom. This monograph will be of interest to planners, practitioners, researchers, and other professionals in the field of science education and information technology.

Sociology and You

Springer Building Vocabulary from Word Roots provides a systematic approach to teaching vocabulary using Greek and Latin prefixes, bases, and suffixes. Over 90% of English words of two or more syllables are of Greek or Latin origin. Instead of learning words and definitions in isolation, students learn key roots and strategies for deciphering words and their meanings across all content areas. Building Vocabulary from Word Roots: Level 9 kit includes: Teacher's Guide; Student Guided Practice Book (Each kit includes a single copy; additional copies may be ordered in quantities of 10 or more); Assessments to support

data-driven instruction; and Digital resources including modeled lessons, 50 bonus activities, and more.

You Can't Make Me!

McGraw-Hill Education (UK)

Put math manipulatives to work in your classroom and make teaching and learning math both meaningful and productive. Mastering Math Manipulatives includes everything you need to integrate math manipulatives—both concrete and virtual—into math learning. Each chapter of this richly illustrated, easy-to-use guide focuses on a different powerful tool, such as base ten blocks, fraction manipulatives, unit squares and cubes, Cuisenaire Rods, Algebra tiles and two-color counters, geometric strips and solids, geoboards, and others, and includes a set of activities that demonstrate the many ways teachers can leverage manipulatives to model and reinforce math concepts for all learners. It features: · Classroom strategies for introducing math manipulatives, including commercial, virtual, and hand-made manipulatives, into formal math instruction. · Step-by-step instructions for

over 70 activities that work with any curriculum, including four-color photos, printable work mats, and demonstration videos. · Handy charts that sort activities by manipulative type, math topic, domains aligned with standards, and grade-level appropriateness.

Delphi GUI Programming with FireMonkey

Routledge

This book builds on the experiences of school leaders, early career teachers and their mentors and responds to the challenges that new teachers face as they move beyond initial teacher training. Practiced educators provide research-informed guidance in each chapter to scaffold new teachers' workplace learning when the learning curve is steepest. Support for new teachers is vitally important in enhancing teaching quality, promoting teacher wellbeing, and reducing staff burnout rates. Each chapter, co-authored by school-based and university-based teacher educators, contains rich illustrative examples and vignettes from lead practitioners in UK primary and secondary schools. The book is

relevant across curriculum areas and phases of education so that all new teachers can ease their transition into teaching, build their confidence and lay foundations for their career-long professional growth. Speaking to new and recently qualified teachers as well as coordinators of professional learning in schools, this book is an essential resource for teacher CPD. "An excellent addition to the thinking educator's bookshelf." Dr David Waugh, Professor of Education, Durham University "The distinctive challenges facing Early Career Teachers are identified and addressed with a clear focus on developing the adaptive expertise which is the foundation and sustenance of success in this demanding profession." Professor Linda Clarke, Ulster University "This is a book that is sorely needed to support the flourishing of teachers during the demanding early stages of their careers." Ian Menter, Emeritus Professor of Teacher Education, University of Oxford, Former President of the British Educational Research Association

(2013-15) "Mastering Teaching is a core, comprehensive, credible and cutting-edge introduction to early career teacher learning."

Dr Beth Dickson, University of Glasgow
Moira Hulme is Professor of Teacher Education at Manchester Metropolitan University, UK. She has extensive experience as a teacher, teacher educator and educational researcher. Rebecca Smith is Headteacher of Sale Grammar School, Manchester, UK. She is an experienced leader who has worked across diverse settings to support teacher development to enable every child to fulfil their potential. Rachel O'Sullivan is Senior Lecturer in the School of Teacher Education, Manchester Metropolitan University, UK. Rachel taught secondary P.E. and was a subject lead, pastoral lead and Assistant Head before moving to her current role.

Prepare your child for a bright future with Barron's Early Achiever

Workbooks. Each

workbook provides a

hands-on learning

experience tailored to

grade-level skills. Barron's

Early Achiever: Grade 3

Math Workbook is an ideal

resource to supplement

learning in the classroom,

at home, for learning

Pods, or for

homeschooling. Inside

you'll find: Fun,

interactive activities for

comprehension and

practice Helpful tips, math

vocabulary, easy-to-

understand examples,

and instructive

illustrations to support

learning Multiple, step-by-

step problem-solving

exercises that aid in

children's critical thinking

and reasoning skills

Using MATLAB McGraw-

Hill/Glencoe

With Gradle, you can

efficiently build

automation framework

along with some flexible

alternatives to customized

build logic. This book

starts with sound basics

about build automation

and how Gradle fits into

this automation. It then

moves on to give you a

good exposure on

Groovy—a scripting

language used to write

Gradle—and helps you

understand a key

elements of Groovy

programming language. In

the following chapters,

you will deal with task

management and learn

how to integrate Ant tasks

into build scripts.

Furthermore, you will

learn dependency

management, plugin

management, and its

configuration techniques

in Gradle. You will also get

hands-on with building

and testing projects using

Gradle. You will then

begin to cover diverse

topics, such as

Continuous Integration

with Jenkins and

TeamCity, Migration

strategies, and

Deployment, which

enables you to learn

concepts useful for Agile

software development.

Finally, you will also learn

how to create a simple

mobile application using

Android and explore how

Gradle can help you to

build and test the

application.

Teacher Elsevier

Mastering Primary History

introduces the primary

history curriculum and

helps trainees and

teachers learn how to

plan and teach inspiring

lessons that make

learning history

irresistible. Topics

covered include: · Current

developments in history ·

History as an irresistible

activity · History as a

practical activity · Skills to

develop in history ·

Promoting curiosity ·

Assessing children in

history · Practical issues

This guide includes

examples of children's

work, case studies,

readings to reflect upon

and reflective questions

that all help to show

students and teachers

what is considered to be

best and most innovative

practice, and how they

can use that knowledge in

their own teaching to the

greatest effect. The book

draws on the experience

of three leading

professionals in primary

history, Karin Doull,

Christopher Russell and

Alison Hales, to provide

the essential guide to

teaching history for all

trainee primary teachers.

Create modern yet

effective multi-platform

applications by building

interactive UIs following a

single codebase approach

to boost productivity Key

FeaturesDelve into the

FireMonkey framework and explore its powerful capabilities. Enhance the user experience by using various technologies included in Delphi and FMX. Boost developer productivity through the cross-platform capabilities enabled by the framework.

Book Description FireMonkey (FMX) is a cross-platform application framework that allows developers to create exciting user interfaces and deliver applications on multiple operating systems (OS). This book will help you learn visual programming with Delphi and FMX. Starting with an overview of the FMX framework, including a general discussion of the underlying philosophy and approach, you'll then move on to the fundamentals and architectural details of FMX. You'll also cover a significant comparison between Delphi and the Visual Component Library (VCL). Next, you'll focus on the main FMX components, data access/data binding, and style concepts, in addition to understanding how to deliver visually responsive UIs. To address modern application development, the book takes you through topics such as

animations and effects, and provides you with a general introduction to parallel programming, specifically targeting UI-related aspects, including application responsiveness. Later, you'll explore the most important cross-platform services in the FMX framework, which are essential for delivering your application on multiple platforms while retaining the single codebase approach. Finally, you'll learn about FMX's built-in 3D functionalities. By the end of this book, you'll be familiar with the FMX framework and be able to build effective cross-platform apps. What you will learn

Explore FMX's fundamental components with a brief comparison to VCL. Achieve visual responsiveness through alignment capabilities and layout components. Enrich the user experience with the help of transitions and visual animations. Get to grips with data access and visual data binding. Build exciting and responsive UIs for desktop and mobile platforms. Understand the importance of responsive applications using parallel programming. Create visual continuity through your applications with

TFrameStand and TFormStand. Explore the 3D functionalities offered by FMX. Who this book is for: This book is for Delphi developers who are looking to discover the full potential of the FireMonkey framework in order to build interactive cross-platform GUI applications and achieve an optimal UI/UX. Basic familiarity with Delphi programming and the VCL will be beneficial but not mandatory.

Make math matter to students in grades 6–12 using Exploring Fractions: Mastering Fractional Concepts and Operations!
In this 96-page book, five units cover fractional concepts from the basics through fraction and

mixed number operations. The three-part lessons include teacher-guided exploration, independent practice, and opportunities to apply new concepts. The book also includes notes, suggestions, and a standards matrix and supports NCTM standards.

Exploring Fractions, Grades 6 - 12 Libraries Unlimited

The International Conference on Informatics in Secondary Schools: Evolution and Perspective (ISSEP) is an emerging forum for researchers and practitioners in the area of computer science education with a focus on secondary schools. The ISSEP series started in 2005 in Klagenfurt, and continued in 2006 in Vilnius, and in 2008 in Torun. The 4th ISSEP took part in Zurich. This volume presents 4 of the 5 invited talks and 14 regular contributions chosen from 32 submissions to ISSEP 2010. The ISSEP conference series is devoted to all aspects of computer science teaching. In the preface of the proceedings of ISSEP 2006, Roland Mittermeir wrote: "ISSEP aims at educating 'informatics proper' by showing the beauty of the discipline,

hoping to create interest in a later professional career in computing, and it will give answers different from the opinion of those who used to familiarize pupils with the basics of ICT in order to achieve computer literacy for the young generation." This is an important message at this time, when several countries have reduced teaching informatics to educating about current software packages that change from year to year. The goal of ISSEP is to support teaching of the basic concepts and methods of informatics, thereby making it a subject in secondary schools that is comparable in depth and requirements with mathematics or natural sciences. As we tried to present in our book "Algorithmic Adventures. *Academic Communication Skills* Thomson South-Western

Confidently shepherd your organization's implementation of Microsoft Dynamics 365 to a successful conclusion. In *Mastering Microsoft Dynamics 365 Implementations*, accomplished executive, project manager, and author Eric Newell delivers a holistic, step-by-step reference to implementing Microsoft's

cloud-based ERP and CRM business applications. You'll find the detailed and concrete instructions you need to take your implementation project all the way to the finish line, on-time, and on-budget. You'll learn: The precise steps to take, in the correct order, to bring your Dynamics 365 implementation to life. What to do before you begin the project, including identifying stakeholders and building your business case. How to deal with a change management throughout the lifecycle of your project. How to manage conference room pilots (CRPs) and what to expect during the sessions. Perfect for CIOs, technology VPs, CFOs, Operations leaders, application directors, business analysts, ERP/CRM specialists, and project managers.

Mastering Microsoft Dynamics 365 Implementations is an indispensable and practical reference for guiding your real-world Dynamics 365 implementation from planning to completion.

Science Education and Information Transfer
Mark Twain Media
Aside from guides to more than 40 powerful

storytelling exercises, you'll find the Golden List of what an audience really needs from storytelling, a proven, step-by-step system for successfully learning and remembering a story, and the Great-Amazing-Never-Fail Safety Net to prevent storytelling disasters. More than 15,000 educators from across the country have successfully used this system.

Get your organization's expertise out of its silos and make it flow-with lessons from over a decade of experience Looking at knowledge

management in a holistic way, Mastering Organizational Knowledge Flow: How to Make Knowledge Sharing Work puts the proper emphasis on non-technical issues. As knowledge is deeply connected to humans, the author moves away from the often overused and therefore burned-out term "knowledge management" to the better-suited term "knowledge flow management." Provides lessons learned and case studies from real experience Discusses key knowledge flow components, success factors and traps, and where to start Covering topics such as the power of scaling, internal marketing, measuring success, cultural aspects of sharing, and the role of Web2.0, Mastering Organizational Knowledge Flow: How to Make Knowledge Sharing Work allows you to stay up-to-date with today's knowledge flow management, and implement best practices to position your organization to take advantage of all of its assets.

Fostering Children's Mathematical Power

Elsevier Health Sciences This auto-translation book overviews the fish population and its research methods, help readers in understanding the concept of fish population and population identification. It divides into seven chapters according to the characteristics of the subject and the development results. Based on a systematic introduction to the basic concepts and research contents of the biology of fishery resources, the book focuses on the introduction of fish populations and research methods, life history division and early development identification, age identification and growth research, the division of sexual maturity, the determination of reproductive habits and fecundity, feeding characteristics and research methods of fish, and the mechanism of fish colony and migration. Through the study of this course, we can master the basic theory and methods of fish biology research and lay a solid foundation for future researches on fishery resources. This book can be used as a reference book for undergraduates and

postgraduates who study fishery resources, as well as for those who are engaged in fishery and marine research. The

translation was done with the help of artificial intelligence (machine translation by the service

DeepL.com). A subsequent human revision was done primarily in terms of content.
