Ethics is at the heart of leadership. All leaders assume ethical burdens and must make every effort to make informed ethical decisions and foster ethical behavior among followers. The Sixth Edition of *Meeting the Ethical Challenges of Leadership: Casting Light or Shadow* explores the ethical demands of leadership and the dark side of leadership. Author Craig E. Johnson takes a multidisciplinary approach to leadership ethics, drawing from many fields of research to help readers make moral decisions, lead in a moral manner, and create an ethical culture. Packed with real-world case studies, examples, self-assessments, and applications, this fully-updated new edition is designed to increase students' ethical competence and leadership abilities. *Reality-Based Leadership Self Assessment* SAGE Publications In the face of today's business challenges, the demand for a more genuine leadership style is arising. Authentic Leadership as a way to authentically relate to oneself and others is meant to create meaning, trust and confidence amongst followers. At the same time, the Buddhist concept of Self-Compassion is becoming popular in the Western academic world. This study offers first insights into the relationship between Authentic Leadership and Self-Compassion. Theoretical similarities and connections between the two constructs are being presented. An online study (N=50) got conducted, asking young professionals from the international student organization 'AIESEC' about Authentic Leadership attributes and self-compassionate behaviours. Data analysis showed a weak positive correlation between Authentic Leadership and Self-Compassion. Methodical limitations of the study are being demonstrated. Implications for Authentic Leadership research and practice are being discussed, concluding that Self-Compassion could enhance the theoretical operationalization of authenticity as well as the intense process of Authentic Leadership Development. This study was shortlisted for the Association of Business Psychologist's Workforce Experience Award in 2014.

The Oxford Handbook of Leadership and Organizations Elsevier Health Sciences

Designed specifically to develop students' understanding of leadership in a variety of contexts, and assuming no prior experience of leadership in the business world, this book is a must-read for students embarking on their study of leadership, while thinking ahead to their own future employment. The book is

divided into two clear parts to logically guide the reader through the key theoretical models of leadership, as well as the issues and themes that surround the subject. Part 1 examines the main theories in the field, including situational and contingency theories, behavioural models, and trait theory, while Part 2 draws on a number of different themes to add depth to the theoretical ideas discussed, such as diversity, power, and ethics. To help to interpret the key theories, the book also illustrates leadership in action using a wealth of diverse case studies, 50% of which are new for this third edition. Examples have been carefully selected to highlight the practical application of leadership theory, both in a formal business context and in everyday life, and to dispel the common misconception for students new to leadership that it is only for the 'great and good'. A broad variety of case studies are included from the world of politics, entertainment, food and sport; these include Boris Johnson, the Spice Girls, Cadbury, and Lance Armstrong. These case studies explore leadership across a variety of contexts and cultures, giving students the broad perspective they need to consider the subject critically. Pause for thought boxes and self-test questionnaires encourage students to reflect on the theories and practices they've learned about and how such concepts and issues might apply in their own approach to leadership. Together with the lively writing style, stimulating case studies, and further learning features, this allows students to fully engage with the subject and use the book as an essential tool in their leadership studies. New to this edition Added coverage on technological developments (such as virtual teams, AI, Big Data, VR/AR) and the impact on leadership practice. Revised case studies include contemporary figures and events such as PewDiePie, Jacinda Arden, the Spice Girls and Boris Johnson. The content is now further balanced to reflect both 'good' and 'bad' leadership styles, with new coverage on the negative or 'dark side' of leadership included in chapters 2, 6 and 11. A new online test bank resource increases the variety of ways in which lecturers can assess student knowledge. This title is available as an eBook. #1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the five-part HBO Max docuseries Brené Brown: Atlas of the Heart! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read Daring Greatly and Rising Strong or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.
