'Kevin Missal has given the age-old Sinbad tale a delightful spin. Beware, this fast-paced, adrenaline-pumping adventure is going to rob you of your sleep'-Anand Neelakantan Before I came to be known as the greatest sailor in the world, I was a

young monster hunter who fell in love. As all legendary love stories go, things were . . . well, not smooth sailing. And of course, there was the problem of the Armageddon. So I set sail across the seven seas to hoodwink a Greek god, crash a vampire wedding, mollycoddle a giant and face the Angel of Death. And as the hourglass turned, I had: Seven days to save the world. Seven days to kill the only girl I have ever loved. Bestselling author Kevin Missal pens this thrilling reimagination of Sinbad--the fabled sailor from the classic One Thousand and One Nights--who encounters fearsome mythological monsters!

Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of

natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem. *Vol. VI. The Seven Voyages of Sinbad the Sailor
Modern Library

This book retells the story of Sinbad the Sailor and recounts tales of the voyages on which he acquired his wealth, of the strange peoples and monsters he encountered along the way and of lands beyond the horizon. It places the fiction of Sinbad, popularised in the collection of stories known as the Arabian Nights, into the context of medieval Cairo where these tales were originally told. By retracing the history of these stories and the Arabian voyages of exploration and trade which

inspired them, and by examining modern incarnations of Sinbad that have appeared since his stories reached the West, this book breathes new life into these ancient tales of adventure, magic and mystery.

Ali Baba and the Forty Thieves Walker

Although physical travel between the stars is impossible because of the vast distances involved, communication is instantaneous. There are a couple of different ways to visit alien worlds: veering (using virtual reality to project images), and teeping (using telepresence to control robotic bodies on the other planet). It's

even possible to engage in trade, licensing the rights to books, art, inventions, and other intellectual property. Deborah Rabinowitz is a literary broker. She veers to alien worlds and sells the publishing rights to Earth books. But when an alien is murdered right before her eyes, there's no way she can keep from being involved and solving the murder herself. Then, when an old friend is accused of a murder on a different world, Deborah has to become a lawyer and defend her friend before a kangaroo court by solving that murder, too.
