### **A Birthday Cake for George Washington** Simon and Schuster

Watch Frieda Frog's animals friends use clues to discover who took the missing birthday cake from her birthday party. Artist Beryl Reichenberg has turned to writing children's stories. "Remembering my grandfather in an old rocking chair by the fireplace, telling us stories when we were young, I decided to write for my own grandchildren." Since then, Beryl has written over 30 stories, illustrated with her drawings and photographs. She often depicts her grandchildren as characters in her books. "They love to see themselves in the stories. When they leaf through one of these books for the first time, they search eagerly to find their pictures. Other children also respond positively to pictures of real children." She travels extensively throughout the world, gleaning story ideas from other peoples and their cultures. Beryl lives in San Luis Obispo, California. She has a Master's Degree from UCLA and taught high school in the Bay Area and Los Angeles. Currently she is retired, devoting fulltime to her writing and art. She hopes you enjoy her books as much as she enjoys creating them.

"Development in Unity Volume Two" represents an eclectic repertoire of over forty years exploits and profile of a renowned international scholar and an eminent cultural African leader, Daasebre Professor (Emeritus) Oti Boateng, to inspire a new generational philosophy of development. In this treatise, the author, a distinguished authority in statistics , a United Nations Commissioner, and recipient of several national and international awards, including recognition by the American Biographic Institute as one of the five hundred best thinkers of the twenty-first century, seeks to blend scholarship and culture as mutually inclusive prerequisites to underpin contemporary models in addressing pertinent development challenges. The book pioneers an alternative innovative root-based development model to harness the potential of indigenous institutions of governance in ensuring self-sustaining inclusive local economic development as a hedge against poverty, insurgency mobilization, migration, and radicalization in response to the demands of contemporary global development challenges. It elucidates the truth that development has manifold aspects, dealing with every aspect of human life, and addresses its intrinsic challenges from an eclectic and

multidisciplinary perspective. In this respect, the book covers diverse areas ranging from entrepreneurial collaboration for sustainable micro progress, gender sensitive statistics to democratic governance through credible elections. Other areas include harmonization of tradition and modernity in the chieftaincy institution, integration of ECOWAS statistical systems, space science and satellite technology, oil and gas exploration, construction of poverty profiles, religion, and the cocoa industry. Every section of the book is filled with leadership lessons to inspire a new development approach and intellectual assertiveness. This very penetrating book fills an important knowledge gap between theory and experiential learning in the development process. It is a melting pot of lessons for all readers.
