This book
brings
together a
group of

leading and emerging scholars on the history of cultural and literary interactions between Asia and Latin America. Through a number of interlinked case studies, contributors examine how different forms of Asia-Latin America dialogues are embedded in various national and local contexts. The volume is divided in four parts: 1) Asian hybrid identities and Latin American transnational

narratives; 2) translations and reception of Latin American narratives in Asia; 3) diffracted worlds of Nikkei identities; and 4) interweaving of Asian and Latin American narratives and travel chronicles. Through the lens of modern globality and Transpacific Studies, the contributions inaugurate a perspective that has, until recently, been neglected by Asian and

Latin American cultural studies, while offering an incisive theoretical discussion and detailed textual analysis.

2004 Ed. Rex Bookstore, Inc. The Israel Defense Force (IDF) plays a key role in Israeli society, and has traditionally been perceived not only as the guardian of national survival, but also as a 'people's army'

responsible for the custody of national values. This volume analyses the circumstances currently undermining these perceptions, and explores both the changes occurring in Israel's military framework, and their potential implications. The book highlights the influence exerted by massive shifts in both Israel's external strategic landscape and in the country's

domestic and cultural environments, which have compelled the IDF to undertake major programmes of structural reform, technological adaptation and doctrinal revision. This book argues that these changes have lead the public to subject the armed forces and their conduct to unprecedented critical scrutiny. The way in which Israelis and their army resolve these tensions is of crucial

importance not only for Israel, but for the Middle East as a whole. *Interpreting the Noli me tangere and Doubting Thomas* Daimon The Social CancerNoli Me TangereThe Floating Press **State and Society in the Philippines** BRILL Mary Magdalene, Iconographic Studies from the Middle Ages to the Baroque examines the iconographic inventions in Magdalene

Interruptions and Transitions: Essays on the Senses in Medieval and Early Modern Visual Culture

Boydell & Brewer
A wide-ranging and accessible approach to Godard's later work, and a major intervention in the study of

film aesthetics and ethics.

Encounters with Godard takes the reader on a personal voyage into the sensory pleasures and polyphonic rhythms of Jean-Luc Godard's multimedia work since the late 1970s, from his feature films and video essays to his published writings, art books, and media performances. Godard, suggests James S. Williams, lays ethical claim

to the cinematic, defined in the broadest terms as relationality and artistic resistance. An introductory chapter on the extended history of *La Chinoise* (1967), a film explicitly of montage, is followed by seven different types of critical encounters with Godard, encompassing the fields of art and photography, music and literature, and foregrounding themes of gender and sexuality, race

and violence, mystery and emotion. The Godard who emerges here is a restless and radical experimenter who establishes new cinematic thresholds through new technology and expands the creative potential and free exchange of the archives. Williams examines works including *Nouvelle vague* (1990), *Film socialisme* (2010), *Hélas pour moi* (1993), and the magnum

opus *Histoire(s) du cinéma* (1988–98). Wide-ranging and accessible, *Encounters with Godard* marks a major intervention in the study of film aesthetics and ethics while forging a vital dialogue with literature, history and politics, art and art history, music and musicology, philosophy, and aesthetics. “A landmark contribution to our understanding of Godard and

of modernist expression as a whole.” — David Sterritt, author of *The Films of Jean-Luc Godard: Seeing the Invisible*

“Writing with a delirious lucidity, Williams opens Godard to debate and dialogue that informs, extends, opens, and illuminates what may be the greatest and most complex body of cinema of the last half-century.” — Tom Conley, author of *Film Hieroglyphs: Ruptures in*

examines not only aspects of the arts of painting and sculpture but also extends into other spheres: philosophy, music and poetry, gardens, food, relics and rituals. Temple University Press Samuel Beckett's work is deeply concerned with physical contact - remembered, half-remembered, or imagined. Applying the philosophical writings of Jean-Luc Nancy and Maurice Merleau-Ponty that feature sensation, this study examines how Beckett's later work dramatizes moments of contact between self and self, self and world,

How can local experiences and the social transformation generated by modernity help to enrich our understanding of the international? What might a version of the much-discussed "non-Western International Relations (IR)" look like? What continuities and discontinuities from the Philippine

experience in particular can be useful for understanding other post-colonial polities? The Philippines makes a fascinating case study of a medium-sized, developing, post-colonial, multi-ethnic and multi-cultural state in Southeast Asia. Cruz, Adiong and their contributors map horizons of non-Western approaches in Philippine experiences of IR, rooted in the Global South, and in

local customs and practice. Examining both theory and praxis, they explore issues as diverse as pre-colonial history, diplomacy, religion, agrarian reform and the Philippines' relationship with key regions in the Global South. The book will appeal to researchers interested in Southeast Asian Studies and alternative perspectives on IR.

Since the Renaissance, at least, the medium of sculpture has been associated explicitly with the sense of touch. Sculptors, philosophers and art historians have all linked the two, often in strikingly different ways. In spite of this long running interest in touch and tactility, it is vision and visuality which have tended to dominate art historical research in recent decades. This

book introduces a new impetus to the discussion of the relationship between touch and sculpture by setting up a dialogue between art historians and individuals with fresh insights who are working in disciplines beyond art history. The collection brings together a rich and diverse set of approaches, with essays tackling subjects from prehistoric figurines to

the work of contemporary artists, from pre-modern ideas about the physiology of touch to tactile interaction in the museum environment, and from the phenomenology of touch in recent philosophy to the experimental findings of scientific study. It is the first volume on this subject to take such a broad approach and, as such, seeks to set the agenda for future research and collaboration

in this area.

science researcher. This powerful book includes the author's personal account of sexual abuse by a nun and her years of struggle to recover. Passionate but scholarly and objective, the book advocates the need for healing dialogue, empirical research, and informed prevention strategies to bring a meaningful resolution to the crisis of sexual abuse in the church. Popular

explanations for the reasons behind the crisis have included issues related to celibacy, homosexuality, the power structure of the church, and poor seminary screening practices. But none of these theories are supported by research nor can they explain why Catholic priests and nuns may be more likely to abuse children than other adults in positions of trust. Sexual Abuse and the

Culture of Catholicism uses a complex, systemic approach to draw parallels between the church as a human system and a family that has experienced incest, presenting a model for a sexual trauma cycle in the church based on systemic sexual shame passed down through the beliefs and practices of Catholicism. Sexual Abuse and the Culture of Catholicism examines: the prevalence

and characteristics of sexual abuse by Catholic priests and nuns compared to sex offenders in the general population celibacy, homosexuality , and the power structure of the church as contributing factors in the sexual abuse crisis an analogy of the church as a family in which incest occurs the effects and causes of sexual offending from one generation to the next how current research on sexual offending applies to sexual abuse by priests and nuns healing and empowerment for those affected by religious-based sexual trauma reform and renewal within the Catholic Church and much more Sexual Abuse and the Culture of Catholicism is a unique and important resource for clergy, religious order, and lay leaders in the Catholic Church and other Christian denominations ; social science researchers; social workers and mental health professionals; lay and religious members of the Catholic Church; and anyone recovering from religious-based sexual trauma.

Each drawing is illustrated in color, discussed in detail, and shown with many comparative photographs. Bronzino's technical virtuosity as a draftsman and his mastery of anatomy and perspective are vividly apparent in</p>	<p>each stroke of the chalk, pen, or brush. The younger generations of Florentine artists particularly admired Bronzino for his technical virtuosity as a painter, and Giorgio Vasari praised him for his powers as a disegnatore (designer and draftsman)</p>
