The book that inspired the major new motion picture *Mandela: Long Walk to Freedom*. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's anti-apartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. *LONG WALK TO FREEDOM* is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph.

"Today Singapore ranks sixth in the world in healthcare outcomes well ahead of many developed countries, including the United States. The results are all the more significant as Singapore spends less on healthcare than any other high-income country, both as measured by fraction of the Gross Domestic Product spent on health and by costs per person. Singapore achieves these results at less than one-fourth the cost of healthcare in the United States and about half that of Western European countries. Government leaders, presidents and prime ministers, finance ministers and ministers of health, policymakers in congress and parliament, public health officials responsible for healthcare systems planning, finance and operations, as well as those working on healthcare issues in universities and think-tanks should know how this system works to achieve affordable excellence."--Publisher's website.

Among the finest examples of deeply researched and colorfully written military history, Richard Bassett's *For God and Kaiser* is a major account of the Habsburg army told for the first time in English. Bassett shows how the Imperial Austrian Army, time and again, was a decisive factor in the story of Europe, the balance of international power, and the defense of Christendom. Moreover it was the first pan-European army made up of different nationalities and faiths, counting among its soldiers not only

Christians but also Muslims and Jews. Bassett tours some of the most important campaigns and battles in modern European military history, from the seventeenth century through World War I. He details technical and social developments that coincided with the army's story and provides fascinating portraits of the great military leaders as well as noteworthy figures of lesser renown. Departing from conventional assessments of the Habsburg army as ineffective, outdated, and repeatedly inadequate, the author argues that it was a uniquely cohesive and formidable fighting force, in many respects one of the glories of the old Europe.

During the first half of the twentieth century, Zen Buddhist leaders contributed actively to Japanese imperialism, giving rise to what has been termed "Imperial-Way Zen" (Kodo Zen). Its foremost critic was priest, professor, and activist Ichikawa Hakugen (1902-1986), who spent the decades following Japan's surrender almost single-handedly chronicling Zen's support of Japan's imperialist regime and pressing the issue of Buddhist war responsibility. Ichikawa focused his critique on the Zen approach to religious liberation, the political ramifications of Buddhist metaphysical constructs, the traditional collaboration between Buddhism and governments in East Asia, the philosophical system of Nishida Kitaro (1876-1945), and the vestiges of State Shinto in postwar Japan. Despite the importance of Ichikawa's writings, this volume is the first by any scholar to outline his critique. In addition to detailing the actions and ideology of Imperial-Way Zen and Ichikawa's ripostes to them, Christopher Ives offers his own reflections on Buddhist ethics in light of the phenomenon. He devotes chapters to outlining Buddhist nationalism from the 1868 Meiji Restoration to 1945 and summarizing Ichikawa's arguments

about the causes of Imperial-Way Zen. After assessing Brian Victoria's claim that Imperial-Way Zen was caused by the traditional connection between Zen and the samurai, Ives presents his own argument that Imperial-Way Zen can best be understood as a modern instance of Buddhism's traditional role as protector of the realm. Turning to postwar Japan, Ives examines the extent to which Zen leaders have reflected on their wartime political stances and started to construct a critical Zen social ethic. Finally, he considers the resources Zen might offer its contemporary leaders as they pursue what they themselves have identified as a pressing task: ensuring that henceforth Zen will avoid becoming embroiled in international adventurism and instead dedicate itself to the promotion of peace and human rights. Lucid and balanced in its methodology and well grounded in textual analysis, Imperial-Way Zen will attract scholars, students, and others interested in Buddhism, ethics, Zen practice, and the cooptation of religion in the service of violence and imperialism.

This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and

possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

The emperor Nero is etched into the Western imagination as one of ancient Rome's most infamous villains, and Tacitus' Annals have played a central role in shaping the mainstream historiographical understanding of this flamboyant autocrat. This section of the text plunges us straight into the moral cesspool that Rome had apparently become in the later years of Nero's reign, chronicling the emperor's fledgling stage career including his plans for a grand tour of Greece; his participation in a city-wide orgy climaxing in his publicly consummated 'marriage' to his toy boy Pythagoras; the great fire of AD 64, during which large parts of central Rome went up in flames; and the rising of Nero's 'grotesque' new palace, the so-called 'Golden House', from the ashes of the city. This building project stoked the rumours that the emperor himself was behind the conflagration, and Tacitus goes on to present us with Nero's gruesome efforts to quell these mutterings by scapegoating and executing members of an unpopular new cult then starting to spread through the Roman empire: Christianity. All this contrasts starkly with four chapters focusing on one of Nero's most principled opponents, the Stoic senator Thrasea Paetus, an audacious figure of moral fibre, who courageously refuses to bend to the forces of imperial corruption and hypocrisy. This course book offers a portion of the original Latin text, study aids with vocabulary, and a commentary.

Designed to stretch and stimulate readers, Owen's and Gildenhard's incisive commentary will be of particular interest to students of Latin at both A2 and undergraduate level. It extends beyond detailed linguistic analysis and historical background to encourage critical engagement with Tacitus' prose and discussion of the most recent scholarly thought.

Bestselling author and eminent foreign policy scholar Zbigniew Brzezinski's classic book on America's strategic mission in the modern world. In *The Grand Chessboard*, renowned geostrategist Zbigniew Brzezinski delivers a brutally honest and provocative vision for American preeminence in the twenty-first century. The task facing the United States, he argues, is to become the sole political arbiter in Eurasian lands and to prevent the emergence of any rival power threatening our material and diplomatic interests. The Eurasian landmass, home to the greatest part of the globe's population, natural resources, and economic activity, is the "grand chessboard" on which America's supremacy will be ratified and challenged in the years to come. In this landmark work of public policy and political science, Brzezinski outlines a groundbreaking and powerful blueprint for America's vital interests in the modern world. In this revised edition, Brzezinski addresses recent global developments including the war in Ukraine, the re-emergence of Russia, and the rise of China.

'A landmark in the process of decolonizing imperial Western

knowledge.' Walter Mignolo, Duke University To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically,

the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now

in its eagerly awaited second edition, this bestselling book has been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date.
