Seekers II

MDPI

This book examines the migration of women as gendered subjects to and from Turkey, using feminist research practices to explore a range of diverse experiences of migrant women as refugees, asylum seekers, undocumente

d or documented migrants. The collection includes contributions from researchers, practitioners, and migrants themselves to present a nuanced analysis that challenges binary divisions between 'forced' and 'voluntary' migrants and highlights the political and social agency of refugee and migrant women in Turkey. Drawing on a rich body of

original empirical and theoretical research the volume explores recent policy change in Turkey, the political and social influences that have shaped migration policy (both internally and globally), and how women migrants have been positioned within its changing refugee and migration regimes. Analysis of the Turkish experience of

redesigning migration policy in a country with weak civil protection against gender discrimination provides important lessons, in particular for countries in the Global South that are under pressure from the Global North to control and manage migrant flows. This interdisciplinary volume offers gender-sensitive recommendations for policymakers and

practitioners and will advance global debates on migration management and governance across the fields of sociology, social policy, anthropology, labour economics and political science. REFUGEE CRISIS IN INTERNATIONAL POLICY - VOLUME I - LEGAL AND SOCIAL STATUSES OF REFUGEES Routledge This volume focuses on Jewish, Arab, non-Latin European,

Asian, and Latin American immigrants and their experiences in their “new” homes. Rejecting exceptionalist and homogenizing tendencies within immigration history, contributors advocate instead an approach that emphasizes the locally- and nationally-embedded nature of ethnic identification. *Seeking Asylum in Israel* Jessica Kingsley

Publishers of Asylum-Seeking, Migration and Church addresses one of the most pressing issues confronting contemporary society. How are we to engage with migrants? Drawing on studies of church engagement with asylum seekers in the UK and critical immigration and refugee issues in North America, Snyder presents an extended theological reflection on both the issue of asylum-seeking and the fears of established populations surrounding immigration. This book outlines ways in which churches are currently supporting asylum seekers, encouraging closer engagement with people seen as 'other' and more thoughtful responses to newcomers. Creatively exploring biblical and theological traditions surrounding the 'stranger', Snyder argues that as well as practising a vision of inclusive community churches would do well to engage with established population fears. Trends in global migration and the dynamics of fear and hostility surrounding immigration are critically and creatively explored throughout the book. Inviting more complex, nuanced responses to asylum seekers and immigrants, this book

offers invaluable insights to those interested in Christian ethics, practical theology, social work, mission and faith and social action, as well as those working in the field of migration. Bordered Lives Council of Europe Media have played an important role in framing the public debate on the “refugee crisis” that peaked in autumn of 2015. This report

examines the narratives developed by print media in eight European countries and how they contributed to the public perception of the “crisis”, shifting from careful tolerance over the summer, to an outpouring of solidarity and humanitarianism in September 2015, and to a securitisation of the debate and a narrative of fear in November 2015. Overall, there has been limited

opportunity in mainstream media coverage for refugees and migrants to give their views on events, and little attention paid to the individuals’ plight or the global and historical context of their displacement. Refugees and migrants are often portrayed as an undistinguishable group of anonymous and unskilled outsiders who are either vulnerable or dangerous. The

dissemination of biased or ill-founded information contributes to perpetuating stereotypes and creating an unfavourable environment not only for the reception of refugees but also for the longer-term perspectives of societal integration. Understanding Immigration and Refugee Policy Transnational Press London This report is about obstacles placed at the Greek entrance to

the EU that prevent Iraqis and other asylum seekers and migrants from entering the European Union or that summarily expel them when they do. It includes testimonies from Iraqis and other asylum seekers and migrants on both sides of the Greek-Turkish border about pushbacks and summary expulsions from Greece, inhuman and degrading conditions of detention in Greece, Greek

police and coast guard brutality and harassment, and the blocking of access to asylum in Greece as well as the denial of asylum and other forms of protection to those needing it. This report is also about abusive treatment of migrants by Turkish border authorities in the border region with Greece, including inhuman and degrading conditions of detention in direct violation of Turkey's

<p>obligations under the European Convention for the Protection of Human Rights and Fundamental Freedoms (ECHR). <u>Refugee Migration and Health</u> Springer</p> <p>The increasing number of refugees, asylum seekers, and irregular migrants poses a challenge for mental health services in Europe. This review found that these groups are exposed to risk factors for mental</p>	<p>disorders before, during, and after migration. The prevalence of psychotic, mood, and substance-use disorders in these groups varies but overall resembles that in the host populations. Refugees and asylum seekers, however, have higher rates of post-traumatic stress disorder. Poor socioeconomic conditions are associated with increased rates of depression five years after</p>	<p>resettlement. Refugees, asylum seekers, and irregular migrants encounter barriers to accessing mental health care. Good practice for mental health care includes promoting social integration, developing outreach services, coordinating health care, providing information on entitlements and available services, and training professionals to work with these groups. These actions</p>
---	---	---

require resources and organizational flexibility. Refugee News, Refugee Politics Transnational Press London "This book focuses mainly on Britain within an international and European context. The author examines different theoretical approaches to understanding migratory flows and strategies, and explores links between immigration policy, welfare and social

exclusion, and migrants' experiences in negotiating and challenging these policies. The book concludes by questioning whether immigration controls can be justified on either ethical or practical grounds." "This book will be a key text for students and researchers of migration and ethnicity, and of social policy and welfare. It will be of interest to professionals working with migrants and refugees and

to all those concerned with migrant rights."--BOOK JACKET. Towards a Refugee Oriented Right of Asylum Human Rights Watch Germany will spend around \$6.6 billion to cope with an estimated 800,000 refugees expected to have entered the country in the year 2016; this reality indeed extending further into 2017. Despite this overwhelming number of people entering the

country, Chancellor Angela Merkel stated that there is “no legal limit to the number of asylum seekers Germany will take in in the coming years.” The announcement by Merkel's coalition government arrived following Germany and Austria opening their borders to the large numbers of refugees making their way north and west from the Middle East, Africa and elsewhere. In particular, this

statement came after the Syrian refugee crisis created the biggest refugee crisis the world has seen since the Second World War. Germany is seen as the immigration hub of Europe. It also happens to be the second most popular destination for immigrants after the United States of America. Germany is also the country in Europe with the highest numbers of foreign nationals to date. Germany

established a new immigration law in 2005 was born out of a realization that it was coming to terms with a demographic crisis stemming from an ageing population and further complimented by a sharp decline national birth rates. In foresight, and within this unfortunate context, migration was seen by much of the German political class as an economic

necessity, and the answer to the German economic and demographic time bomb. Between the years 2009 and 2014, annual net migration in Germany rose from 100,000 to 580,000 individuals. Moreover, the inflow of foreign nationals increased from 266,000 to 790,000 individuals. As of January 2015, approximately 10% of residents in Germany were foreign nationals, with around 12%

born outside the country. Naturally, these figures have all risen significantly following Merkel's decision to allow what has reached one million refugees and migrants into Germany across 2016 and moving into 2017. Moving from this reality, the research will focus on the importance of the compliance of Germany's migration policy with International Refugee and Migration Law,

as it is crucial for the country's survivability and move forward throughout this phase of its history. The importance of the research lies in whether or not Germany's migration policy towards the Syrian Refugees in particular complies with its duties toward international law embodied in the treaties and conventions it has committed to. *Public Health Aspects of Mental Health*

*Among Migrants and Refugees Federation Press* Seeking to understand why host states treat migrants and refugees inclusively, exclusively, or without any direct engagement, Kelsey P. Norman offers this original, comparative analysis of the politics of asylum seeking and migration in the Middle East and North Africa. While current classifications of migrant and refugee engagement in the Global South mistake the absence of formal policy and law for neglect, Reluctant Reception proposes the concept of 'strategic indifference', where states proclaim to be indifferent toward migrants and refugees, thereby inviting international organizations and local NGOs to step in and provide services on the state's behalf. Using the cases of Egypt, Morocco and Turkey to develop her theory of 'strategic indifference', Norman demonstrates how, by allowing migrants and refugees to integrate locally into large informal economies, and by allowing organizations to provide basic services, host countries receive international credibility while only exerting minimal state resources. *Refugees and Asylum Seekers National*

Academies Press International migration, particularly to Europe, has increased in the last few decades, making research on aspects of this phenomenon, including numbers, challenges, and successes, particularly vital. This Special Issue highlights this necessary and relevant area of research. It presents 37 articles including studies on diverse topics relating to the health of refugees and migrants. Most articles (28) present studies focusing on European host countries. The focus on Europe is justified if we take into consideration the increased number of refugees and migrants who have come to Europe in recent years. However, there are also articles which present studies from other continents. The topics discussed in the Issue include healthcare utilization, infectious diseases, mother and child health, mental health, and chronic diseases. Finding from the included articles indicate that further development of guidelines and policies at both local and international levels is needed. Priorities must be set by encouraging and funding in-depth research that aims to evaluate the impact of existing policies and

interventions. Such research will help us formulate recommendations for the development of strategies and approaches that improve and strengthen the integration of migrants and refugees into the host countries.

### **The Refugee Surge in Europe**

UNESCO Publishing  
This book aims to address 'boat migration' with a holistic approach. The different chapters consider the

multiple facets of the phenomenon and the complex challenges they pose, bringing together knowledge from several disciplines and regions of the world within a single collection. Together, they provide an integrated picture of transnational movements of people by sea with a view to making a decisive contribution to our understanding of current trends and future

perspectives and their treatment from legal-doctrinal, legal-theoretical, and non-legal angles. The final goal is to unpack the tension that exists between security concerns and individual rights in this context and identify tools and strategies to adequately manage its various components, garnering an inter-regional / multi-disciplinary dialogue, including input from

international law, law of the sea, maritime security, migration and refugee studies, and human rights, to address the position of 'migrants at sea' thoroughly. Women, Migration and Asylum in Turkey Cambridge University Press Mass-migration, conflict and poverty are now persistent features of our globalised world. This reference book for social workers and service

providers offers constructive ideas for practice within an inter-disciplinary framework. Each chapter speaks to a skill and knowledge area that is key to this work, bringing together myriad voices from across disciplines, interspersed with the vital perspectives of asylum seekers, refugees and migrants themselves. The book discusses the specific challenges faced when

working in the community, and where people have suffered torture, in the context of social work practiced from an ethical value-base. Staying up to date with the latest developments in policy; and addressing key specific skills needed to work with people affected by borders, this book is a valuable resource for both practitioners and students. *Threatened Peoples, Threatened*

<p><i>Borders MDPI</i>          "This book explores Australia's ambivalent legal and political response to 'irregular' migrants - asylum seekers, 'boat people', 'illegals', 'queue jumpers' and 'economic migrants'."--          Back cover.  <b>Comparative Regional Protection Frameworks for Refugees</b>          Bloomsbury Publishing USA          Investigating the global system of detention centers that</p>	<p>imprison asylum seekers and conceal persistent human rights violations          Remote detention centers confine tens of thousands of refugees, asylum seekers, and undocumented immigrants around the world, operating in a legal gray area that hides terrible human rights abuses from the international community.          Built to temporarily house eight hundred</p>	<p>migrants in transit, the immigrant "reception center" on the Italian island of Lampedusa has held thousands of North African refugees under inhumane conditions for weeks on end.          Australia's use of Christmas Island as a detention center for asylum seekers has enabled successive governments to imprison migrants from Asia and Africa, including the Sudanese human rights</p>
---	---	--

activist Abdul Aziz Muhamat, held there for five years. In *The Death of Asylum*, Alison Mountz traces the global chain of remote sites used by states of the Global North to confine migrants fleeing violence and poverty, using cruel measures that, if unchecked, will lead to the death of asylum as an ethical ideal. Through unprecedented access to offshore detention centers and

immigrant-processing facilities, Mountz illustrates how authorities in the United States, the European Union, and Australia have created a new and shadowy geopolitical formation allowing them to externalize their borders to distant islands where harsh treatment and deadly force deprive migrants of basic human rights. Mountz details how states use the geographic inaccessibility of places like

Christmas Island, almost a thousand miles off the Australian mainland, to isolate asylum seekers from the scrutiny of humanitarian NGOs, human rights groups, journalists, and their own citizens. By focusing on borderlands and spaces of transit between regions, *The Death of Asylum* shows how remote detention centers effectively curtail the basic human right to seek asylum,

forcing refugees to take more dangerous risks to escape war, famine, and oppression.

### Cities

welcoming refugees and migrants

BRILL

This collection focuses on regional approaches to refugee protection, and specifically upon the norms, and the norm entrepreneurs of those approaches. It considers how recent crises in refugee protection (such as the

Syrian and Andaman Sea crises) have highlighted the strengths and limits of regional approaches to refugee protection and the importance of looking closely at the underlying norms, and the identities and activities of the relevant 'norm entrepreneurs' at the regional level. It compares the norms of refugee protection that have evolved in three regions: the EU, Latin America and

the South East Asian region, to identify which norms of refugee protection have been 'internalised' in the three regional contexts and to contextualise the processes. The authors demonstrate the need for awareness of the roles of different norm 'entrepreneurs' such as states, international organisations and civil society, in developing and promoting basic norms on refugee protection.

This book was originally published as a special issue of The International Journal of Human Rights. International Migration and Refugee Law. Does Germany's Migration Policy Toward Syrian Refugees Comply? Berghahn Books

This volume explores the factors that give rise to the number of people seeking asylum and examines the barriers they currently and will continue

to face. Divided into three parts, the authors first explore the causality that generates displacement, examining climate change, illegal conflicts and the deprivation of natural resources. They argue that all of these problems either originate from human agency directly, or are strongly influenced by human activities, particularly those of wealthy countries in

the North West. The study goes on to discuss how migrants are received and the problems they face on arrival, and concludes with confronting the fate and the status of asylum seekers after arrival, and the walls, both virtual and material, that they encounter. The authors propose ways of approaching the situation, beyond the present language and the limited interpretations

of the Convention on the Status of Refugees. Written by leading experts in environmental ethics, asylum law, and international law, the book will be essential reading for those working in these and related areas. Media coverage of the “refugee crisis”: A cross-European perspective Routledge Preventing loss of life and protecting the human rights of refugees, asylum

seekers and migrants at sea The protection of refugees, asylum-seekers and migrants travelling by sea forms an integral part of international human rights, refugee and maritime laws. As explained in this document, states have clear obligations to aid any person found in distress at sea, to rescue people in distress and to ensure that their rights – including the right to life

and to protection from refoulement – are upheld. Therefore, the Council of Europe Commissioner for Human Rights is putting forward a Recommendation on how to help member states make these rights practical and effective. Refuge beyond Reach Springer Nature This first volume offers comprehensive analyses on a variety of topics ranging from legal to social statute

of the refugees. The authors and their contributions are as follows: Çağla Arslan Bozkuş “Legal Status of Refugees”; Özkan Gönül and Yunus Karaağaç “Social Rights of Refugees”, Hasan Acar and Serhat Bulut “The Political Rights of Refugees”; Gülayşe Ülgen Türedi “Refugees and Human Rights”; Emine Kılıçaslan “Refugee and Cultural Rights of Refugees in the Context of Political	Communicatio n”; Cenap Çakmak Clarifying the Legal Status: Distinctions between Refugees, Asylum Seekers and (Irregular) Migrants”; Mehlika Özlem Ultan “Conceptual Framework About Migration”; Akın Kiren “The History of Refugee Movements: A Brief Overview”; Hakan Sezgin Erkan “Development Assistance and Refugee Crisis”; Merve Mamacı “Refugee	Well-Being in Work Life”; Saadat Demirci “Integration of Refugees into the Society”; Güneş Koç “Identity Construction of Syrian in their Narratives”; Asena Boztaş “Refugees, Integration and Political- Demographic Concerns in Turkey and the World”; Cemal Kakişım and Ozan Selçuk “Integration Policies of the European Union and Turkey towards Refugees”; and Hekma
---	--	--

Wali “The Local Integration of Syrian Refugees in Lebanon, Jordan and Turkey”. *Refugees Welcome?* Anchor Academic Publishing Since 2017, the United States and Europe—among many other refugee-hosting countries—have made significant changes in their refugee policies. New visa restrictions, travel bans, and other regulations were imposed by national governments. At the local level, towns and cities responded in different ways: some resisted national policy by declaring themselves “sanctuary cities”, while others supported exclusionary policies. These different responses influenced refugees’ ability to settle and become integrated. The Refugees in Towns (RIT) project at Tufts University explores local urban integration experiences, drawing on the knowledge and perspectives of refugees and citizens in towns around the world. Since 2017, more than 30 RIT case studies have deepened our local knowledge about the factors that enable or obstruct integration, and the ways in which migrants and hosts co-exist, adapt, and struggle with integration. In this Special Issue, seven

articles  
explore urban  
integration in  
towns in  
Europe  
(Frankfurt-  
Rödelheim,  
Germany;  
Newcastle,  
UK;  
Ambertois,
