External Trade  
A century ago, the  
automobile industry  
stood poised to  
reshape the American  
landscape. The Legend

of Federal-Mogul  
recounts this  
compelling period in  
industrial history  
through the story of  
Federal-Mogul, one of  
the world's largest  
manufacturers of  
automobile  
components. Under the  
leadership of founders  
H. Gray Muzzy and

Edward Lyon, the company began by supplying bearings to the first automobile companies, but quickly diversified into engine seals, lighting systems and braking components. Today, led by Chairman and CEO Dick Snell, with sales of almost \$7 billion, the company has stayed true to its roots while emerging as a global systems supplier that works in close partnership with major automakers.

This collection of fully peer-reviewed papers were presented at the

26th Leeds-Lyon Tribology Symposium which was held in Leeds, UK, 14-17 September, 1999. The Leeds-Lyon Symposia on Tribology were launched in 1974, and the large number of references to original work published in the Proceedings over many years confirms the quality of the published papers. It also indicates that the volumes have served their purpose and become a recognised feature of the tribological literature. This year's title is 'Thinning Films and Tribological Interfaces', and the papers cover practical applications of tribological solutions in a wide range of situations. The evolution of a full peer review process has been evident for a

number of years. An important feature of the Leeds-Lyon Symposia is the presentation of current research findings. This remains an essential feature of the meetings, but for the 26th Symposium authors were invited to submit their papers for review a few weeks in advance of the Symposium. This provided an opportunity to discuss recommendations for modifications with the authors.

### **The Structure of the Japanese Motor Components Industry**

Volume 8: New Guinea and the Marianas, March 1944-August 1944 covers five of the most eventful months of the Pacific war. Awash with spectacular rescues of downed

airmen, bold beach landings, and brilliant though risky strategic gambles, this volume carries Morison's coverage of the war in the Pacific through the Allies' securing of Dutch New Guinea and the Marianas.
