How ed tech was born: Twentieth-century teaching machines--from Sidney Pressey's mechanized test-giver to B. F. Skinner's behaviorist bell-ringing box. Contrary to popular belief, ed tech did not begin with videos on the internet. The idea of technology that would allow students to "go at their own pace" did not originate in Silicon Valley. In *Teaching Machines*, education writer Audrey Watters offers a lively history of predigital educational technology, from Sidney Pressey's mechanized positive-reinforcement provider to B. F. Skinner's behaviorist bell-

ringing box. Watters shows that these machines and the pedagogy that accompanied them sprang from ideas--bite-sized content, individualized instruction--that had legs and were later picked up by textbook publishers and early advocates for computerized learning. Watters pays particular attention to the role of the media--newspapers, magazines, television, and film--in shaping people's perceptions of teaching machines as well as the psychological theories underpinning them. She considers these machines in the context of education reform, the political reverberations of Sputnik, and the rise of the testing and textbook industries. She chronicles Skinner's attempts to bring his teaching machines to market, culminating in the famous behaviorist's efforts to launch *Didak 101*, the "pre-verbal" machine that

taught spelling. (Alternate names proposed by Skinner include "Autodidak," "Instructomat," and "Autostructor.") Telling these somewhat cautionary tales, Watters challenges what she calls "the teleology of ed tech"--the idea that not only is computerized education inevitable, but technological progress is the sole driver of events.

The Day Lincoln Was Almost Shot: The Fort Stevens Story recounts the story of President Abraham Lincoln's role in the Battle of Fort Stevens in July 1864. This engagement stands apart in American history as the only time a sitting American president came under enemy fire while in office. In this new study of this overlooked moment in American history, Cooling

poses a troubling question: What if Lincoln had been shot and killed during this short battle, nine months prior to his death by John Wilkes Booth's hand in Ford's Theater? A potential pivotal moment in the Civil War, the Battle of Fort Stevens could have changed—with Lincoln's demise—the course of American history. *The Day Lincoln Was Almost Shot*, however, is more than a meditation on an alternate history of the United States. It is also a close study of the attempt by Confederate general Jubal Early to capture Washington, DC, to remove Lincoln and the Union government from power, and to turn the tide of the Civil War in the South's favor. The dramatic events of this attempt to capture Washington—and the president with it—unfold in stunning detail as *Cooling Taps* fresh documentary sources and offers a new interpretation of this story of the defense of the nation's capital. Commemorating this largely forgotten and under-appreciated chapter in the study of Lincoln and the Civil War, *The Day Lincoln Was Almost Shot* is a fascinating look at this potential turning point in American history.

Elementary and Applied UNC Press Books *Involved: Writing for College, Writing for Your Self* helps students to understand their college experience as a way of advancing their own personal concerns and to draw substance from their reading and writing assignments. This edition of the book has been adapted from the print edition, published in 1997 by Houghton Mifflin. Copyrighted materials—primarily images and examples within the text—have been removed from this edition. --

Teaching Machines Bloomsbury Publishing The first book-length study of one of the Civil War's most outlandish and mysterious characters, *Devil's Game* traces the amazing career of Charles A. Dunham, double agent. Dunham was a spy, forger, "reptile journalist," and master of dirty tricks. Writing under different names for different newspapers, including New York's *Tribune*, *Herald*, and *World*, he routinely faked stories to promote the North's war aims, sometimes writing contradictory stories for rival papers. Dunham also used his journalism to create new identities and sometimes stepped into them, playing (with the help of his wife, Ophelia) at least a half-dozen such roles.

Dunham achieved his greatest infamy at the war's end. Called to testify in Washington, he was the most notorious of the witnesses who swore that Lincoln's assassination had been plotted by conspirators in Montreal and Toronto, on orders from Richmond. That testimony (later discredited but never officially challenged) helped lead to the execution of several alleged associates of John Wilkes Booth. Dunham's postwar intrigues were almost as complex, as he continued to collect fake "evidence" of Southern war crimes. Finally convicted of perjury in these schemes, he worked in prison to produce evidence implicating President Andrew Johnson in the assassination, then reversed himself and sold out his associates to the President. Until now many parts of Dunham's wartime (and postwar) career have remained shadowy. Carman Cumming sheds new light on numerous escapades, including Dunham's effort to sell Lincoln on plans for a raid to capture Jefferson Davis and a complex effort in Canada to plan - and then betray - cross-border raids. Exhaustively researched, *Devil's Game* is a portrait of a consummate chameleon. Drawing together previous Dunham scholarship, Cumming offers the first detailed tour of Dunham's convoluted, high-stakes, international deceptions. A carefully crafted assessment of Dunham's motives, personality, and the complex effects of his schemes make *Devil's Game* an important and original work that will change some basic assumptions about the secret operations of the Civil War.

James Loewen has revised *Teaching What Really Happened*, the bestselling, go-to resource for social studies and history teachers wishing to break away from standard textbook retelling of the past. In addition to updating the scholarship and anecdotes throughout, the second edition features a timely new chapter entitled "Truth" that addresses how traditional and social media can distort current events and historical record. Helping students understand what really happened in the past will empower them to use history as a tool to argue for better policies in the present. Our society needs engaged citizens now more than ever, and this book offers teachers concrete ideas for getting students excited about history while also teaching them to read critically. It will specifically help teachers and students tackle important content areas, including Eurocentrism, the American Indian experience, and slavery. **Book Features:** an up-to-date assessment of the potential

and pitfalls of U.S. and world history education; information to help teachers expect, and get good performance from students of all racial, ethnic, and socioeconomic backgrounds; strategies for incorporating project-oriented self-learning, having students conduct online historical research, and teaching historiography; ideas from teachers across the country.

In the middle of the Mississippi Delta lies rural, black-majority Sunflower County. J. Todd Moyer examines the social histories of civil rights and white resistance movements in Sunflower, tracing the development of organizing strategies in separate racial communities over four decades. Sunflower County was home to both James Eastland, one of the most powerful reactionaries in the U.S. Senate in the twentieth century, and Fannie Lou Hamer, the freedom-fighting sharecropper who rose to national prominence as head of the Mississippi Freedom Democratic Party. Sunflower was the birthplace of the Citizens' Council, the white South's pre-eminent anti-civil rights organization, but it was also a hotbed of SNCC (Student Nonviolent Coordinating Committee) organizing and a fountainhead of freedom culture. Using extensive oral history interviews and archival research, Moyer situates the struggle for democracy in Sunflower County within the context of national developments in the civil rights movement. Arguing that the civil rights movement cannot be understood as a national monolith, Moyer reframes it as the accumulation of thousands of local movements, each with specific goals and strategies. By continuing the analysis into the 1980s, *Let the People Decide* pushes the boundaries of conventional periodization, recognizing the full extent of the civil rights movement.

Being the parent of a young athlete is a complex and challenging endeavour. Parents play a pivotal role in the development of young people in reaching their full potential in sport - indeed, the psychological and practical support of parents can be as vital to young athletes as the appropriate coaching and facilities. This book brings together current research into the impact of parenting in youth sport and examines the relationships between athletes, coaches and parents, whilst also discussing topics such as parenting styles, behaviour at competition and talent development. This book not only outlines the theories of parenting in youth sport, but also utilises research and examples

from several countries, including the UK, US, Canada, and Australia. It has a research-to-practice theme and includes numerous suggestions for research projects (and getting research published). *Parenting in Youth Sport* is an essential text for students, lecturers and practitioners with an interest in youth sport, sport psychology or sport development.

Here, Michael F. Holt gives us the only comprehensive history of the Whigs ever written. He offers a panoramic account of the tumultuous antebellum period, a time when a flurry of parties and larger-than-life politicians--Andrew Jackson, John C. Calhoun, Martin Van Buren, and Henry Clay--struggled for control as the U.S. inched towards secession. It was an era when Americans were passionately involved in politics, when local concerns drove national policy, and when momentous political events--like the Annexation of Texas and the Kansas-Nebraska Act--rocked the country. Amid this contentious political activity, the Whig Party continuously strove to unite North and South, emerging as the nation's last great hope to prevent secession.

John Holt, the American educator, was passionate about the need for alternatives to traditional institutional schooling, seeing schools as often hindering children from learning rather than helping them; he became an important proponent of homeschooling or 'unschooling', was a pioneer in youth rights theory and had a profound influence on school reform in particular and educational philosophy in general. Here, Roland Meighan challenges the often held notion that Holt's work was

'romantic' and impractical within the context of compulsory schooling. He brings together the work and thinking of John Holt into applicable theory for education students, enabling readers to appreciate the view that individuals outside the education system can influence and change what is happening within it.

This is a revised edition by David Herbert Donald of his former professor J. G. Randall's book *The Civil War and Reconstruction*, which was originally published in 1937 and had long been regarded as "the standard work in its field", serving as a useful basic Civil War reference tool for general readers and textbook for college classes. This Second Edition retains many of the original chapters, "such as those treating border-state problems, non-military developments during the war, intellectual tendencies, anti-war efforts, religious and educational movements, and propaganda methods [...]" bearing evidence of Mr. Randall's thoroughgoing exploration of the manuscripts and archives," whilst it expands considerably on other original chapters, such as those relating to the Confederacy. Still other portions have been entirely recast or rewritten, such as the pre-war period chapters and Reconstruction chapters, reflecting factual updates since Randall's original publication. A must-read for all Civil War students and scholars.

The Fate of Their Country *The Civil War and Reconstruction* [Second Edition]

To tell the history of the Caribbean is to tell the history of the world," write Laurent Dubois and Richard Lee Turits. In this powerful and expansive story of the vast archipelago, Dubois and Turits chronicle how the Caribbean has been at the heart of modern contests between slavery and freedom, racism and equality, and empire and independence. From the emergence of racial slavery and European colonialism in the early sixteenth century to U.S. annexations and military occupations in the twentieth, systems of exploitation and imperial control have haunted the region. Yet the Caribbean is also where empires have been overthrown, slavery was first defeated, and the most dramatic revolutions triumphed. Caribbean peoples have never stopped imagining and pursuing new forms of liberty. Dubois and Turits reveal how the region's most vital transformations have been ignited in the conflicts over competing visions of land. While the powerful sought a Caribbean awash in plantations for the benefit of the

few, countless others anchored their quest for freedom in small-farming and counter-plantation economies, at times succeeding against all odds. Caribbean realities to this day are rooted in this long and illuminating history of struggle.

How partisan politics lead to the Civil War What brought about the Civil War? Leading historian Michael F. Holt convincingly offers a disturbingly contemporary answer: partisan politics. In this brilliant and succinct book, Holt distills a lifetime of scholarship to demonstrate that secession and war did not arise from two irreconcilable economies any more than from moral objections to slavery. Short-sighted politicians were to blame. Rarely looking beyond the next election, the two dominant political parties used the emotionally charged and largely chimerical issue of slavery's extension westward to pursue reelection and settle political scores, all the while inexorably dragging the nation towards disunion. Despite the majority opinion (held in both the North and South) that slavery could never flourish in the areas that sparked the most contention from 1845 to 1861--the Mexican Cession, Oregon, and Kansas--politicians in Washington, especially members of Congress, realized the partisan value of the issue and acted on short-term political calculations with minimal regard for sectional comity. War was the result. Including select speeches by Lincoln and others, *The Fate of Their Country* openly challenges us to rethink a seminal moment in America's history.
