Diagnoses, Clinical Tools, and Psychopharmacology Mosby

As a nurse, you always have to be at your best. Diagnosing different medical conditions on sight and having plausible solutions to each problem could be the only thing between you and a life. Even though your training will rigorously take you through the remedies for the most common diseases, a frequent reminder on the latest symptoms and treatment options will not only keep you up to date but also ensure that you present the very best treatment services to your patients.

Lippincott's Manual of Psychiatric Nursing Care Plans Elsevier Health Sciences

Get everything you need to create and customize effective nursing care plans, now with evidence-based ICNP® diagnoses! Covering the most common medical-surgical nursing diagnoses and clinical problems, Gulanick & Myers' *Nursing Care Plans: Diagnoses, Interventions, and Outcomes*, 10th Edition features more than 200 care plans, each reflecting the latest evidence-based guidelines and national and international treatment protocols. It also features highlighted QSEN competencies and a clear differentiation of nursing and collaborative interventions. New to this edition are ICNP® diagnoses, care plans on LGBTQ health issues and on electrolytes and acid-base balance, and a new Online Care Planner that makes it easier than ever to customize care plans. Written by noted educators Meg Gulanick and Judith L. Myers, this #1 care planning book will help you learn to think like a nurse! 61 patient problem care plans include the most common/important patient problems, providing the building blocks for you to create your own individualized care plans. 164 disorder care plans cover virtually every common medical-surgical condition, organized by body system. Patient problem care plan format includes a definition/explanation of the diagnosis, related factors, defining characteristics, expected outcomes, ongoing assessment, and therapeutic interventions. Disorder care plan format covers synonyms for the disorder (for ease in cross referencing), a definition, common related factors, defining characteristics, expected outcomes, ongoing assessment, and therapeutic interventions for each relevant nursing diagnosis. Prioritized care planning guidance internally organizes care plans from "actual" to "risk" diagnoses, from general to specific interventions, and from independent to collaborative/interprofessional interventions, to help you select the most important, priority interventions for your particular patients. NEW! Updated care plans are now based on the evidence-based, complete, and internationally accepted International Classification of Nursing Practice (ICNP®) nursing diagnoses. NEW! 19 all-new care plans are featured in this edition. NEW! Updated content throughout reflects the most current evidence-based practice and national and international guidelines. NEW! Online Care Planner on the Evolve website allows you to easily generate customized care plans based on the book's content. NEW! Improved focus on core content includes several care plans that have been moved from the book's Evolve website.

Delmar's Geriatric Nursing Care Plans Lippincott Williams & Wilkins

Includes care plans by body system for disorders often seen in the elderly population. Nursing care begins with a comprehensive review and assessment of each individual patient. The data is then analyzed and a specific plan of care developed.

Ulrich & Canale's Nursing Care Planning Guides E-Book Mosby Incorporated

The bestselling nursing care planning book on the market, *Nursing Care Plans: Diagnoses, Interventions, and Outcomes*, 8th Edition covers the most common medical-surgical nursing diagnoses and clinical problems seen in adults. It includes 217 care plans, each reflecting the latest evidence and best practice guidelines. NEW to this edition are 13 new care plans and two new chapters including care plans that address health promotion and risk factor management along with basic nursing concepts that apply to multiple body systems. Written by expert nursing educators Meg Gulanick and Judith Myers, this reference functions as two books in one, with 147 disorder-specific and health management nursing care plans and 70 nursing diagnosis care plans to use as

starting points in creating individualized care plans. 217 care plans --- more than in any other nursing care planning book. 70 nursing diagnosis care plans include the most common/important NANDA-I nursing diagnoses, providing the building blocks for you to create your own individualized care plans for your own patients. 147 disorders and health promotion care plans cover virtually every common medical-surgical condition, organized by body system. Prioritized care planning guidance organizes care plans from actual to risk diagnoses, from general to specific interventions, and from independent to collaborative interventions. Nursing diagnosis care plans format includes a definition and explanation of the diagnosis, related factors, defining characteristics, expected outcomes, related NOC outcomes and NIC interventions, ongoing assessment, therapeutic interventions, and education/continuity of care. Disorders care plans format includes synonyms for the disorder (for easier cross referencing), an explanation of the diagnosis, common related factors, defining characteristics, expected outcomes, NOC outcomes and NIC interventions, ongoing assessment, and therapeutic interventions. Icons differentiate independent and collaborative nursing interventions. Student resources on the Evolve companion website include 36 of the book's care plans — 5 nursing diagnosis care plans and 31 disorders care plans.

Nursing Diagnosis Handbook Speedy Publishing LLC

The first edition of this book was first on the market to address the complete perspective of patient care for the AIDS patient. This revised edition provides an in-depth overview of the pathophysiology, transmission, spectrum of disease and medical management of HIV disease in adults and adolescents. Psychological issues are addressed as well as the scope of physical signs and symptoms of the patient. Nursing interventions are categorized based both on accepted nursing diagnoses and primary, secondary, and tertiary prevention.

A pocket-sized clinical companion, *Manual of Psychiatric Nursing Care Planning*, 4th Edition helps you assess psychiatric nursing clients, formulate nursing diagnoses, and design psychiatric nursing care plans. It offers quick and easy access to information on care in a range of settings including the inpatient unit, home care, or community mental health setting. Expert author Elizabeth M. Varcarolis, RN, MA, provides a clinically based focus with the latest guidelines to psychiatric nursing care. Designed to accompany *Foundations of Mental Health Nursing*, this book is a perfect reference for creating care plans and for clinical use. Current coverage includes the latest diagnoses, assessment and treatment strategies, and psychotropic drug information relevant to nursing care of patients with psychiatric disorders. Clinically based information helps you provide patient care in a range of environments including the inpatient unit, community mental health setting, or home care setting. Coverage of all major disorders includes those commonly encountered in a clinical setting. A consistent format for each care plan includes a nursing diagnosis, etiology, assessment findings/diagnostic cues, outcome criteria, long-term goals, short-term goals, and interventions and rationales. Assessment tools such as tables, charts, and questionnaires are provided in an appendix

for quick reference. A Major Psychotropic Interventions and Client and Family Teaching chapter describes the uses and workings of psychotropic agents. The latest diagnostic information includes the DSM-IV-TR taxonomy with diagnostic criteria for mental disorders, to enable accurate assessment and diagnosis of patients. Current psychiatric nursing guidelines are based on ANA's 2007 Psychiatric Mental-Health Nursing: Scope and Standards of Practice. Updated 2009-2011 NANDA-I nursing diagnoses assist with accurate diagnoses by including the latest nursing diagnoses related to psychiatric nursing. Updated drug information includes the latest on medications used with psychiatric patients, for optimal drug therapy.
