In Making Every Maths Lesson Count: Six principles to support great maths teaching, experienced maths teacher and lecturer Emma McCrea takes away the guesswork as she sums up the key components of effective maths teaching. Maths classrooms are incredibly complex places. At any given time, the factors influencing the effectiveness of your teaching are boundless and this can lead to relying on intuition as to what might work best. This book aims to signpost a route through this complexity. Writing in the practical, engaging style of the award-winning Making Every Lesson Count, Emma McCrea helps teachers to move beyond trial and error by sharing evidence-informed tips and suggestions on how they can nudge the impact of their teaching in the right direction. Making Every Maths Lesson Count is underpinned by six pedagogical principles challenge, explanation, modelling, practice, feedback and questioning and presents 52 high-impact strategies designed to streamline teacher workload and ramp up the level of challenge in the maths classroom. The book draws out the key findings from the latest research on memory, learning and motivation and each chapter features numerous worked examples to demonstrate the theory in

action, together with a concluding series of questions that will help maths practitioners relate the content to their own classroom practice. Furthermore, Emma's writing offers clarity around the language of maths teaching and learning, and also delves into the finer points of how to identify and address any misconceptions that students may hold. Written for new and experienced practitioners alike, this gimmick-free guide provides sensible solutions to perennial problems and inspires a rich, challenging and evidence-based approach to the teaching of maths. Suitable for maths teachers of students aged 11 to 18 years, and for primary school maths specialists.

Lesson Study has been shown to be a systematic way of building teachers' knowledge by allowing them to share their knowledge with each other. While much has been written about the benefits of Lesson Study in science and mathematics education, this book analyses its impact on education for children with special needs. It studies the ways in which the Lesson Study process is implemented in different educational contexts in the Netherlands, Singapore, the UK, and Sweden—countries which propagate more inclusive learning environments regardless of varying degrees of student capacities. In addition to making transcultural comparisons regarding concepts, procedures, and instruments in the use of Lesson Study in these four countries, this book will provide practice-based suggestions for teachers to formulate collaborative lesson plans.

Lesson Planning for Skills-Based Health Education is a highly practical and useful resource for middle school and high school health educators looking for innovative and tried-and-true ways to implement a skills-based approach to health education. The text—written by renowned authors Sarah Benes and Holly Alperin, along with experts in the field, including many SHAPE America Teacher of the Year honorees—offers effective, skills-based learning activities, lessons, units, and assessments that you can use in your classroom as they are or with modifications to meet the needs of your students. You can use this text to build a completely new curriculum or to supplement your existing curriculum, providing a smooth transition from a content-based approach to a skills-based approach. The authors explain the rationale and foundation for making that transition, putting the lesson plans, activities, and assessments in context for you as you learn how to implement a skills-based approach. The 64 lessons and activities in Lesson Planning for Skills-Based Health Education have been • created by the authors and a number of experienced teachers broadly recognized for their expertise in skills-based health education, • organized to map to the skills in the National Health Education Standards and aligned with a five-step skill-development model • designed to be flexible and adaptable to meet the needs of a wide range of educators, from those wanting a complete new curriculum to those wanting to simply supplement their existing curriculum while meeting the needs of all students. Lesson Planning for Skills-Based Health Education is an ideal companion to The Essentials of Teaching Health Education, another book by Benes and Alperin, which presents teaching and assessment strategies for planning and implementing a skills-based approach to teaching health education. Together, these two books can help you effectively teach skills-based health education from day one. Lesson Planning for Skills-Based Health Education offers a detailed, easy-to-use learning activity template and employs a

teacher-friendly format that has been proven effective in the field. It comes with a web resource that has digital versions of the many reproducible forms in the text. The text is organized into two parts. Part I delves into key aspects of planning, implementing, and assessing a skills-based approach, offering you a strong foundation in the core concepts of the approach. Each of the part II chapters is devoted to a skill addressed in the National Health Education Standards, providing you with the following material: • An overview of the skill • Key considerations for teaching the skill • A unit outline • Assessments • Lesson plans • Learning activities Lesson Planning for Skills-Based Health Education offers you all you need to put a skills-based approach into practice: the solid foundational information that explains the concepts and the resources, tools, and strategies to help you implement the lesson plans and activities that will aid your students in developing proficiency in the skills emphasized in the national standards. Through this text, you will be able to offer instruction that challenges your students and provides them with opportunities to meet the standards in a classroom environment that is engaging, thought provoking, and relevant. **With Announcements for the Winter Semester and the Spring Semester of ... and ...** Springer Nature

This book is the first in a new series from Carol Ann Tomlinson and Caroline Cunningham Eidson exploring how real teachers incorporate differentiation principles and strategies throughout an entire instructional unit. Focusing on the middle grades, but applicable at all levels, Differentiation in Practice, Grades 5-9 will teach anyone interested in designing and implementing differentiated curriculum how to do so or how to do so more effectively. Included are \* Annotated lesson plans for differentiated units in social studies, language arts, science, mathematics, and world/foreign language. \* Samples of differentiated worksheets, product assignments, rubrics, and homework

handouts. \* An overview of the essential elements of differentiated instruction and guidelines for using the book as a learning tool. \* An extended glossary and recommended readings for further exploration of key ideas and strategies. Each unit highlights underlying standards, delineates learning goals, and takes you step by step through the instructional process. Unit developers provide running commentary on their use of flexible grouping and pacing, tiered assignments and assessments, negotiated criteria, and numerous other strategies. The models and insight presented will inform your own differentiation efforts and help you meet the challenge of mixed-ability classrooms with academically responsive curriculum appropriate for all learners. The book illustrates how Lesson Study can be applied to craft metacognitive teaching strategies to enhance students' learning to learn competencies. Based on the findings of an empirical study of a university-funded teaching development project, this book reports how to apply Lesson Study and Learning Study to enhance teachers' metacognitive teaching competencies with a view to tackling the impacts and challenges created by and underlying the learning to learn curriculum. The book allows readers to experience metacognitive learning by sorting the prior knowledge on the metacognition, setting the goal and planning reading schedule, checking their understanding and

progress, evaluating what they have or have not learned and reflected on their reading experience and feelings. Readers can grasp the key concept underpinning metacognitive teaching, including teaching strategies for developing students' metacognitive abilities that include working on problem-solving activities, working on small collaborative groups, making metacognitive and learning strategies explicit, and encouraging students to reflect upon and talk about their learning.
