LUCIANO LILLY

Text Typology and Translation

Multilingual Matters Limited

This book offers a challenging and stimulating perspective on translation. It is a comprehensive practical course in translation between English and Arabic and, as such, will be invaluable to students of translation. Based on contrastive linguistics, it features a variety of translation key concepts, including lexical, grammatical and

stylistic issues. The book balances theory and application in translation. The book is the result of the many courses the author has taught to students of Arabic-English translation, and will help bilingual speakers become familiar with translation techniques and develop practical translation skills to the same standard as that expected of a university graduate. It presents a remarkable selection of examples of English/Arabic translation. Through lexical research, glossary building and an introduction to key theoretical concepts in translation, the reader will gain a better

understanding of what graduate-level translation involves.

The proposed book titled *A Psychological Approach to Translation* is in fact a study that contains six parts. The first part describes the phenomena and events that motivated the researcher to think up and implement a semi-descriptive/ semi-experimental research, the problems that translation students and teachers encounter along translation courses and the specifically observed causes of failure in translating, the primary and secondary purposes of the study, and finally, the reasons for the process of delimiting the study so that the main direction and goal of the research could be stated and illustrated. The second part is a rather extensive and careful survey of many past and current linguistic and sociolinguistic

theories and approaches pertaining to translation as both product and process with abundant clear-cut examples and explanations. Next, part three is another careful survey of theories and problems, this time psycholinguistic and purely psychological, pertaining to human learning as a conditioned behavior together with several arguments and exemplifications presented in support of the main assumption in the study: the impact of systematic extensive reading in TL on one's translating ability. This part also reveals the fact that the existing psycholinguistic literature seriously suffers from the lack of adequate scientific explanations for the phenomenon of translating as a psychological behavior. Next, part four provides a description of step-by-step

development, instrumentation, and implementation of the study based on the conventions of a regular research method. It also includes information about the selection of data, the subjects and their selection criteria, the type of the test they were given, and the kind of statistical analysis used to translate the results into figures (quantification). The fifth part, fundamentally designed and intended to sum up the significant points discussed throughout the work, also indicates some pedagogical implications and constructive suggestions for future translator training programs recommending more extensive and more scientific studies of both longitudinal and cross-sectional types with factorial designs to investigate the effects of several independent variables

at the same time and further contribute to the enrichment of the modern faculty known as Translation Studies. Finally, part six constitutes a quick reference (handbook) for both translators and translation students to read or review some basic concepts in translation theory as well as the practical steps they should take in the act of translating. These steps are considered to be truly indispensable guidelines for the beginner who would often feel quite handicapped wondering what to do when faced with the task of translating a text for the first time. Their overall plan and logical order are based on the actual methods and techniques of translating learned and adopted from practical teaching experience by the author and followed by him to this day. The book closes with

a comprehensive bibliography, introducing a good number of both classic and new books on linguistics, language teaching and testing, psychology, translation studies, and other related subjects, which can profitably be used as authentic sources of reference in additional or supplementary studies.

Meaning in Translation Prentice Hall

This bestselling text is a comprehensive overview of functionalist approaches to translation in English. Christiane Nord, one of the leading figures in translation studies, explains the complexities of theories and terms in simple language with numerous examples. Covering how the theories developed, illustrations of the main ideas, and specific applications to translator training, literary translation,

interpreting and ethics, *Translating as a Purposeful Activity* concludes with a concise review of both criticisms and perspectives for the future. Now with a Foreword by Georges Bastin and a new chapter covering the recent developments and elaborations of the theory, this is an essential text for students of translation studies and for translator training.

Contexts in Translating Routledge
This text provides a snapshot of issues reflecting the changing nature of translation studies at the beginning of a new millennium. Resulting from discussions between translation theorists from all over the world, topics covered include: the nature of translation; English as a "lingua franca"; public service translation and interpreting;

assessment; and audio-visual translation. The first part of the work covers a discussion stimulated by Peter Newmark's paper, and the second part allows invited colleagues to develop his topics.

A Course in Translation Method: French to English Channel View Publications

Whether the judgements translators of different language works make are normative and somehow wrapped up in societal values that change with time or social positioning is the subject of these contributions. Two main contributions from English and Israeli scholars are presented which argue that the concept of norms should be the primary analytical tool for understanding everything from the choices of words to

regularly appearing patterns in writing. Seven brief responses and counter-responses follow. Also included are the transcripts of two debates on the topic. Distributed by Taylor and Francis.

Liber Amicorum for Peter Newmark

Routledge

This work is a textbook and a handbook of translation for English and foreign students working alone or on courses at degree and post-graduate level.

More Paragraphs on Translation

Multilingual Matters

This text aims to serve as a dual purpose in addressing both local and universal concerns: the entries relate to the interaction between the Chinese-speaking and English-speaking worlds,

while western knowledge and experience are also drawn on for topics general to translation studies.

Between English and Arabic Multilingual Matters

Boccaccio's Decameron recasts the storytelling heritage of the ancient and medieval worlds into perennial forms that inspired writers from Chaucer and Shakespeare down to our own day.

Translation Today Cambridge Scholars Publishing

German-language approaches to translation have been revolutionized by the theory of action (Handlungstheorie) and the related theory of translation's goal or purpose (Skopstheorie). Both these approaches are functionalist: they seek to liberate translators from servitude to the source text, seeing

translation as a new communicative act that must be purposeful with respect to the translator's client and readership. As one of the leading figures in this field, Christiane Nord gives the first full survey of functionalist approaches in English. She explains the complexities of the theories and their terms, using simple language with numerous examples. The book includes an overview of how the theories developed, illustrations of the main ideas, and specific applications to translator training, literary translation, interpreting and ethics. The survey concludes with a concise review of the criticisms that have been made of the theories, together with perspectives for the future development of functionalist approaches.

A Course in Translation Method

Routledge

A Companion to Translation Studies is the first work of its kind. It provides an authoritative guide to key approaches in translation studies. All of the essays are specially commissioned for this collection, and written by leading international experts in the field. The book is divided into nine specialist areas: culture, philosophy, linguistics, history, literary, gender, theatre and opera, screen, and politics. Contributors include Susan Bassnett, Gunilla Anderman and Christina Schäffner. Each chapter gives an in-depth account of theoretical concepts, issues and debates which define a field within translation studies, mapping out past trends and suggesting how research might develop in the future. In their general introduction the

editors illustrate how translation studies has developed as a broad interdisciplinary field. Accompanied by an extensive bibliography, this book provides an ideal entry point for students and scholars exploring the multifaceted and fast-developing discipline of translation studies.

Thinking Translation Routledge
Lance Hewson's book on translation criticism sets out to examine ways in which a literary text may be explored as a translation, not primarily to judge it, but to understand where the text stands in relation to its original by examining the interpretative potential that results from the translational choices that have been made. After considering theoretical aspects of translation criticism, Hewson sets out a method of analysing originals

and their translations on three different levels. Tools are provided to describe translational choices and their potential effects, and applied to two corpora: Flaubert's *Madame Bovary* and six of the English translations, and Austen's *Emma*, with three of the French translations. The results of the analyses are used to construct a hypothesis about each translation, which is classified according to two scales of measurement, one distinguishing between "just" and "false" interpretations, and the other between "divergent similarity", "relative divergence", "radical divergence" and "adaptation".

Translating as a Purposeful Activity

Xlibris Corporation

Thinking German Translation is a comprehensive and revolutionary 20-

week course in translation method offering a challenging and entertaining approach to the acquisition of translation skills. It has been fully and successfully piloted at the University of St. Andrews. Translation is presented as a problem-solving discipline. Discussion, examples and a full range of exercise work enable students to acquire the skills necessary for a broad range of translation problems. Examples are drawn from a wide variety of material from technical and commercial texts to poetry and song. Thinking German Translation is essential reading for advanced undergraduates and postgraduate students of German. The book will also appeal to a wide range of languages students and tutors through the general discussion of principles, purposes and

practice of translation.

A Textbook of Translation Multilingual Matters

In the past decades, translation studies have increasingly focused on the ethical dimension of translational activity, with an emphasis on reflexivity to assert the role of the researcher in highlighting issues of visibility, creativity and ethics. In *Reflexive Translation Studies*, Silvia Kadiu investigates the viability of theories that seek to empower translation by making visible its transformative dimension; for example, by championing the visibility of the translating subject, the translator's right to creativity, the supremacy of human translation or an autonomous study of translation. Inspired by Derrida's deconstructive thinking, Kadiu presents

practical ways of challenging theories that argue reflexivity is the only way of developing an ethical translation. She questions the capacity of reflexivity to counteract the power relations at play in translation (between minor and dominant languages, for example) and problematises affirmative claims about (self-)knowledge by using translation itself as a process of critical reflection. In exploring the interaction between form and content, Reflexive Translation Studies promotes the need for an experimental, multi-sensory and intuitive practice, which invites students, scholars and practitioners alike to engage with theory productively and creatively through translation.

Functionalist Approaches Explained
BRILL

Translation needs to be systematized so as to give authenticity to the translations (the product). However, translating metaphorical expressions is even harder and is prone to more difficulties due to the sensitivity of metaphorical expressions to languages. Peter Newmark, in his book *Approaches to Translation* (1988), presents some techniques for translating metaphorical expressions. So, the applicability of these techniques has been tested on English and Kurdish. Three Kurdish translations of the play Hamlet have been exemplified and the translation of their metaphorical expressions has been analyzed. In translating metaphors, the translator first needs to make up his/her mind whether it better suits the text to focus on the imagery or the sense of the

metaphor. If the imagery is to be focused and transferred into the target language, the metaphor can be translated literally or a standard metaphor of the target language can be utilized instead of the original. On the other hand, if the sense of the metaphor is to be transferred into the target language, the sense of the metaphor can be added between brackets or at the footnote after literal translation of the metaphor.

Translating Shakespeare for the Twenty-First Century UCL Press

Most of the contributions to *Translating Shakespeare for the Twenty-First Century* evolve from a practical commitment to the translation of Shakespearean drama and at the same time reveal a sophisticated awareness of

recent developments in literary criticism, Shakespeare studies, and the relatively new field of Translation studies. All the essays are sensitive to the criticism to which notions of the original as well as distinctions between the creative and the derivative have been subjected in recent years. Consequently, they endeavour to retrieve translation from its otherwise subordinate status, and advance it as a model for all writing, which is construed, inevitably, as a rewriting. This volume offers a wide range of responses to the theme of Shakespeare and translation as well as Shakespeare in translation. Diversity is ensured both by the authors' varied academic and cultural backgrounds, and by the different critical standpoints from which they approach their themes – from

semiotics to theatre studies, and from gender studies to readings firmly rooted in the practice of translation. Translating Shakespeare for the Twenty-First Century is divided into two complementary sections. The first part deals with the broader insights to be gained from a multilingual and multicultural framework. The second part focuses on Shakespearean translation into the specific language and the culture of Portugal.
