An in-depth study of the work of German-born industrial designer Richard Sapper, most famous for designs such as the Tizio lamp and the Brionvega radio. Richard Sapper (1932-2015) a German-born designer who was based in Milan most of his working career, is considered one of the most important designers of his generation. Within his lifetime, he received numerous international design accolades, including ten prestigious Compasso d'Oro awards. Sapper developed and designed a wide variety of products, ranging from ships and cars, to computers and electronics as well as furniture and kitchen appliances. His clients included Alessi, Artemide, B&B Italia, Brionvega, FIAT, Heuer, Kartell, Knoll, IBM, Lenovo, Lorenz Milano, Magis, Molteni, Pirelli and many others. This investigation of Sapper's work, based on over forty hours of interviews with the designer Jonathan Olivares, studies his objects, the circumstances that shaped them and the resulting ideals that emerge. The inter-generational conversation explores themes that reoccur throughout Sapper's oeuvre, and which have a particular importance for a younger generation of designers and those with a desire to understand Sapper's work from a fresh perspective. An illustrated timeline, packed with images from Sapper's personal archives, reveals the incredible variety and technical brilliance of his work. Richard Sapper died in Milan on 31 December 2015. Designed by SM Associati, the agency of Marco Velardi from *Apartmento* magazine, the book opens with an image essay featuring candid commissioned photography by Ramak Fazel.

Limited Edition is the new buzzword in furniture design. The demand for unique pieces is steadily increasing. With prototypes, one-offs and limited product lines, designers are celebrating a cult of individuality for all price classes. Furniture prototypes have always been an element of the industrial design process, but now they are being brought from the workshops and presented to the public as embodiments of one of the most exciting creative fields of our age. In the global village with its standardized commodities, exclusive one-offs with an artisanal flavor are turning into coveted objects. Limited furniture series satisfy the collector's thirst for objects that dissolve the boundary between art and design. Limited Edition pursues this new phenomenon and uncovers its background in meticulous investigative essays based on the author's ongoing interchange with key designers, gallery owners, auctioneers and manufacturers. With a rich selection of magnificent images and an attractive layout, it presents the best and most breathtaking pieces by the leading designers.

[An Architectural History](#) Phaidon Press

The first book to present a comprehensive overview of postwar Japanese design For the Japanese, the concept of design is not limited to functionality or materiality--it is deeply connected with ancient culture and rituals. In this sense, a chair is much more than what you sit on, a cup more than what you drink from: these objects are to be reflected upon, to be touched and cherished. As mass manufacture became widespread in the post-war period, fascinating cross-cultural exchanges began to take place between Japan and the West. And in recent years, a new generation of designers has taken Japanese creativity into entirely new territory, reconceptualizing the very meaning of design. Showcasing over 80 designers, hundreds of objects, and contributions from both Japanese and Western designers inspired by Japan, this volume will remain the definitive work on the subject for many years to come.

Exquisitely produced to reflect Dieter Rams' aesthetic philosophy, this book presents highlights from a forty-year career designing iconic consumer products that enhance our daily lives. For decades,

anyone who cared about product design looked to the Braun label when choosing their appliances, radios, and other consumer items. Now Dieter Rams, the guiding force behind the Braun look, breaks down his design principles and processes in this elegant book. Enumerating each of his ten principles such as good design is innovative; good design is aesthetic; good design is useful, etc., this book presents one hundred items that embody these guidelines. Readers will find items that are familiar such as the ubiquitous coffee grinder but also those that are more unusual such as shelving systems and cigarette lighters. A fascinating essay places Dieter Rams in the context of modern design, from Bauhaus to Philip Johnson. Archival materials include photos of Rams' design team and excerpts from his publications and speeches. The book closes with a chronological overview of design icons, categorized by function, that show the enormous breadth of Rams' vision. Taken together, these images and texts offer the most comprehensive overview of Dieter Rams' work to date and will serve as both a reference and an inspiration for anyone interested in how and why good design matters.
