Blade Runner Gollancz

This indispensable guide provides a thorough chronological examination of Ridley Scott's directorial career. All of Scott's films are included, along with information on his frequent collaborators, his thoughts on his own films, and a section on his unrealised projects. This is the essential reference guide to one of mainstream cinema's most diverse directors.

Blade Runner 2049 is a 2017 sequel to the 1982 movie Blade Runner, about a world in which some human-looking replicants have become dangerous, so that other human-looking replicants, as well as humans, have the job of hunting down the dangerous models and “retiring” (destroying) them. Both films have been widely hailed as among the greatest science-fiction movies of all time, and Ridley Scott, director of the original Blade Runner, has announced that there will be a third Blade Runner movie. Blade Runner 2049 and Philosophy is a collection of entertaining articles on both Blade Runner movies (and on the spin-off short films and Blade Runner novels) by twenty philosophers representing diverse backgrounds and philosophical perspectives. Among the issues addressed in the book: What does Blade Runner 2049 tell us about the interactions of state power and corporate power? Can machines ever become truly conscious, or will they always lack some essential human qualities? The most popular theory of personhood says that a person is defined by their memories, so what happens when memories can be manufactured and inserted at will? We already interact with non-human decision-makers via the Internet. When embodied AI becomes reality, how can we know what is human and what is simulation? Does it matter? Do AI-endowed human-looking replicants have civil and political rights, or can they be destroyed whenever “real” humans decide they are inconvenient? The blade runner Deckard (Harrison Ford) appears in both movies, and is generally assumed to be human, but some claim he may be a replicant. What's the evidence on both sides? Is Niander Wallace (the-mad-scientist-cum-evil-corporate-CEO in Blade Runner 2049) himself a replicant? What motivates him? What are the impacts of decision-making AI entities on the world of business? Both Blade Runner and Blade Runner 2049 have been praised for their hauntingly beautiful depictions of a bleak future, but the two futures are very different (and the 2019 future imagined in the original Blade Runner is considerably different from the actual world of 2019). How have our expectations and visions of the future changed between the two movies? The “dream maker” character Ana Stelline in Blade Runner 2049 has a small but pivotal role. What are the

implications of a person whose dedicated mission and task is to invent and install false memories? What are the social and psychological implications of human-AI sexual relations?

The first sequel to the major movie spectacular, Blade Runner, The Edge of Human has been commissioned by Orion and authorised by the Philip K Dick Trust and The Blade Runner Partnership. It is written by a writer who worked alongside Dick in the years prior to his tragically early death. It answers a lot of the questions left hanging by the movie and yet remains true to the spirit of the original Philip K Dick story Do Androids Dream of Electric Sheep. Rick Deckard is living with his replicant lover, Rachael, in the rural backwoods of North America. They eke out their remaining days together with Rachael spending most of the time in cryogenic suspension. Out of the blue Deckard is snatched away and dumped back in LA with more questions than answers. Why is he on a murder rap? Who is the sixth replicant? and is Sarah Tyrell, Rachael's double, to be trusted?

A designer's deep dive into seven science fiction films, filled with “gloriously esoteric nerdery [and] observations as witty as they are keen” (Wired). In Typeset in the Future, blogger and designer Dave Addey invites sci-fi movie fans on a journey through seven genre-defining classics, discovering how they create compelling visions of the future through typography and design. The book delves deep into 2001: A Space Odyssey, Star Trek: The Motion Picture, Alien, Blade Runner, Total Recall, WALL-E, and Moon, studying the design tricks and inspirations that make each film transcend mere celluloid and become a believable reality. These studies are illustrated by film stills, concept art, type specimens, and ephemera, plus original interviews with Mike Okuda (Star Trek), Paul Verhoeven (Total Recall), and Ralph Eggleston and Craig Foster (Pixar). Typeset in the Future is an obsessively geeky study of how classic sci-fi movies draw us in to their imagined worlds.

Early in the 21st Century, the Tyrell Corporation advanced Robot evolution into the Nexus phase - a being virtually identical to a human - known as a Replicant. Replicants were used Off-world as slave labor. Those who escaped Earth were hunted by Blade Runner units ordered to kill any trespassing Replicant upon detection. In 2022, a Replicant attack on the Tyrell Corporation forced the company into bankruptcy and erased all records of existing Replicants. The surviving Nexus 8 models disappeared with the help of the Replicant underground. Many Replicants remained in servitude. In 20217, Aahna “Ash” Ashina, a former Blade Runner, rejoined her department to hunt down fugitive Replicants. Her superiors are unaware that her loyalties are divided. Her lover, Freysa, is a leader in the Replicant underground. While investigating a report of a rogue Replicant at the Los Angeles seawall construction site, Ash discovered that a Nexus 6 Replicant, Yotun, whom she had failed to retire 12 years previously, had somehow outlived his expiration date and had become the leader of a Replicant guerrilla army. In a surprise attack, Yotun and his Replicants destroyed a section of the seawall and murdered the political and corporate elite of Los Angeles. Ash, meanwhile, finds herself captive in Yotun's hidden base of operations...

As the eagerly-anticipated new film Blade Runner 2049 finally

comes to the screen, rediscover the world of Blade Runner . . . World War Terminus had left the Earth devastated. Through its ruins, bounty hunter Rick Deckard stalked, in search of the renegade replicants who were his prey. When he wasn't 'retiring' them with his laser weapon, he dreamed of owning a live animal - the ultimate status symbol in a world all but bereft of animal life. Then Rick got his chance: the assignment to kill six Nexus-6 targets, for a huge reward. But in Deckard's world things were never that simple, and his assignment quickly turned into a nightmare kaleidoscope of subterfuge and deceit - and the threat of death for the hunter, rather than the hunted . . .

The story of the phenomenon that is Kraftwerk, and how they revolutionised our cultural landscape 'We are not artists nor musicians. We are workers.' Ignoring nearly all rock traditions, experimenting in near-total secrecy in their Düsseldorf studio, Kraftwerk fused sound and technology, graphic design and performance, modernist Bauhaus aesthetics and Rhineland industrialisation - even human and machine - to change the course of modern music. This is the story of Kraftwerk the cultural phenomenon, who turned electronic music into avant-garde concept art and created the soundtrack to our digital age.

Excerpt: The Blade Runner soundtrack was composed by Vangelis for Ridley Scott's 1982 film Blade Runner. It is mostly a dark, melodic combination of classical composition and synthesizers which mirrors the futuristic film noir envisioned by Scott. Several different albums have been made, some including tracks omitted from the final cut, or new tracks in the same style. An orchestral rendition of part of the soundtrack was released in 1982 by the New American Orchestra. However, the original soundtrack album (1994) features vocal contributions from Demis Roussos and the sax solo by Dick Morrissey on "Love Theme." The track "Memories of Green" from Vangelis' 1980 album See You Later was also included. A new release made in 2007 includes a

disc of new music inspired by the film. The film also features "Ogi No Mato" ("The Folding Fan as a Target" on Traditional Vocal and Instrumental Music from Nonesuch Records) by the Japanese group Ensemble Nipponia, and harpist Gail Laughton's "Pompeii 76 A.D." (from Harps of the Ancient Temples). The original soundtrack release was delayed for over a decade, until 1994, despite the music being well-received by fans and critically acclaimed-nominated in 1983 for a...
