In general, most people who have laser-assisted in-situ keratomileusis (LASIK) eye surgery achieve 20/25 vision or better, which works well for most activities. But most people still eventually need glasses for driving at night or reading as they get older. LASIK surgery has a good track record. LASIK surgery: Is it right for you? - Mayo Clinic Is LASIK for Me? Headaches, eye strain, and fatigued eye muscles are a few issues associated with deteriorating vision. LASIK surgery is one way to resolve those issues. Although many people have LASIK surgery, you may wonder if it is a viable option for you. We will cover three common issues, one of which you may be currently experiencing, to help you decide if LASIK surgery is the proper option. Is LASIK for Me? - The Eye Center If any of the

above situations sound familiar, you might consider (or perhaps, have already considered) LASIK eye surgery. Laser-assisted in situ keratomileusis (LASIK) is a popular laser eye surgery that can treat nearsightedness, farsightedness, and astigmatism. Deciding on LASIK Surgery. Not every person is a good candidate for LASIK surgery. If you think you may be interested in LASIK, you can first talk to your regular eye doctor about whether or not it is right for you. Deciding on LASIK Surgery: Is LASIK Right For You? What qualifies me as a good candidate for LASIK? What conditions might rule me out? Good candidates have mild to moderate hyperopia (farsightedness), myopia (nearsightedness), or astigmatism. If you have or had any of the following conditions, you may not be a good candidate for LASIK or PRK: Is LASIK Laser Eye Surgery Right for Me? - Corrective Eye Overall, LASIK has an excellent track record for improving people's vision. As stated above, almost every kind of eye vision problem can be corrected with LASIK. However, your results may vary some based on which refractive error you have, along with a couple of other factors. Patients who are nearsighted tend to see the best results from LASIK. Is LASIK Right For Me? - Harcourt Health LASIK, which stands for laser-assisted in situ keratomileusis, is a type of refractive surgery. The surgeon first cuts a thin flap of tissue from the front of the eye. Then, a laser burns away... Twenty Years Later, LASIK Has Its Pros and Cons Most laser surgery patients have a LASIK procedure. LASIK stands for laser-assisted in situ keratomileusis. The eye surgeon uses a femtosecond laser, or an instrument called a microkeratome blade, to create a thin, hinged flap on the top layer of the cornea. The surgeon lifts the flap and then uses an excimer laser underneath to sculpt the cornea. Is LASIK for me? - jenkinseyecare.com LASIK can correct refractive errors like nearsightedness, farsightedness, and astigmatism. But if you have a prescription that's too strong, you may not be a candidate for LASIK. What is causing your vision problems? The cause of your vision problems is important as well. Is LASIK Right For Me? | Laser Vision Correction ... When is LASIK not for me? You are probably NOT a good candidate for refractive surgery if: You are not a risk taker. Certain complications are unavoidable in a percentage of patients, and there are... When is LASIK not for me? | FDA Is LASIK right for you? LASIK has delighted millions of patients worldwide, but it is not suited for everyone. As a patient, it is important that you have a clear understanding of the surgery, the procedure's advantages and risks, and whether or not you would make a good candidate. EyeSTAR LASIK Institute has prepared this information guide to help you decide whether LASIK is right for you. Is LASIK for Me? - SlideShare LASIK (laser in situ keratomileusis) is an outpatient surgical procedure used to treat nearsightedness, farsightedness, and astigmatism. LASIK cannot reverse presbyopia, the age-related loss of close-up focusing power, which mainly affects near vision. Is LASIK for Me? LASIK is a safe procedure for many people - but first you have to find out if you're a good candidate for it. The best, board certified eye doctors can determine that with several tests and help you find the right option. Simply put, if you're a candidate, you're good to go. Is LASIK Safe for Me? | Find Out If You're a Candidate | TX LASIK surgery is performed by an ophthalmologist who uses a laser or microkeratome to reshape the eye's cornea in order to improve visual acuity. For most people, LASIK provides a long-lasting alternative to eyeglasses or contact lenses. LASIK is most similar to another surgical corrective procedure, photorefractive keratectomy (PRK), and LASEK. LASIK - Wikipedia Not everyone is a candidate for LASIK, but you won't know until you take control! You can begin by taking this quick quiz to determine if LASIK may be an option for you!
