*PARAMETER LIST ALARM LIST M-CODE LIST*

Anyone who is familiar with Mazak machines acknowledges that nearly every function of the machine is controlled by parameters. This topic is meant to assist fellow Mazak people with helpful parameters for their

machines. PLC parameters for chip conveyor intermittent cycling. RB2: bit 4 must be set to 1: Chip conveyor interval specification To turn on Intermittent cycle: press Machine s *Mazak T2 Parameter - flyingbundle.com* I entered half of the parameters and then had to shut the control off and finish up later.

When I powered up the control to finish entering parameters, it wouldn't accept anything anywhere. I pulled the cards, pulled out the batteries and did the memory wipe / parity reset procedures (with the jumpers) per the Mazak instructions. Hello All, I purchased a 1988 QT8 with a CAM T2 control. The

machine has been sitting with no power so the battery was dead and all parameters were lost. I have (2) sets of parameter list that came with the machine. these have been loaded, and changed back and forth between the (2) sets until everything seems to work fine with the exception that the X & Z travel in the opposite direction.
