Contemporary Political Ideologies

Scientific e-Resources

This text is a classic in Indian political literature as the original author belongs to the Idealist school of great political thinkers such as T H Green and Bosanquet. It is a comprehensive treatise on basic structure of established political theories, be it Bosanquet's idealistic theory of the State to liberal and anti-idealist view, as expressed by L T Hobhouse, to the Marxian theory of the State. The textbook follows an ideological approach where it rejects the attitude of those behaviouralists who place undue emphasis on methods, techniques and skills rather than on first

principles and value judgements. It is developed for the undergraduate students of Political Science (Pass and honours courses). Aspirants of various competitive examinations such as Civil Services Examination and state public service commission examinations will also find the book extremely useful.

Principles of Management S. Chand Publishing

This volume offers an incisive overview of central issues and controversies in political thought and analysis. It includes major discussions of the idea of the modern state, contemporary theories of the state, problems of power and legitimation, new forms of democratic ideal, citizenship and social movements, the direction of public policy and the fate of sovereignty in the modern global

system. While analysing these topics, the author critically assesses the thought of many of those who have contributed decisively to political discussion. Among those whose works are discussed are classic figures such as Hobbes, Locke, Mill and Marx, as well as contemporary writers such as Habermas, Offe and Giddens. *Political Theory and the Modern State* is an ideal resource for students seeking an introduction to modern politics and political sociology. It is also an original statement about the many competing perspectives in political thought today.

The Oxford Companion to Politics in India
Routledge

Political protest and social movements are ubiquitous phenomena. This book focuses on the current theoretical approaches that aim at explaining them: the theory of collective action, the resource mobilization perspective, political opportunity structure theory, the identity approach, the framing perspective, and the dynamics of contention approach. The book has three

objectives: (1) Many basic concepts like political opportunities or identity are not clearly defined. It is further often a matter of interpretation what factors are supposed to affect which phenomena. The first aim is therefore to provide a detailed introduction to and a clear restatement of the theories. Only then is it possible to assess and improve them. (2) For each theory the major strengths and weaknesses are discussed, and various modifications and extensions are suggested. (3) Building on these analyses, it is shown how the theories can be integrated into a single theoretical paradigm: the structural-cognitive model.
