There is no problem with the lethality of the 5.56 NATO caliber. Most NATO nations are confident with the lethality of their 5.56mm and 7.62mm rounds. To increase small arms lethality, nations must better train their soldiers. Soldiers must "train as they fight."
MAJ Ehrhart - Increasing Small Arms

Lethality in Afgh.

There are several ways to extend the lethality of the infantry. A more effective 5.56-mm bullet can be designed which provides enhanced terminal performance out to 500 meters. A better option to increase incapacitation is to adopt a larger caliber cartridge, which will function using components of the M16/M4.
