DRAVEN TRISTIAN

A Practical Guide for Today's Artists Lulu Press, Inc
 Progressing logically from the most encompassing fundamentals to more specific drawing considerations, this book addresses the options, challenges, and methodologies of drawings made in the presence of subjects such as still life, figure, and landscape. It revolves around the premise that beginners' main interests center on developing the ability to draw what they see or envision in a more or less objective manner. The book approaches the teaching of drawing in the same way artists approach the creating of drawings: by proceeding from the general to the specific, acknowledging the given conditions of visual expression, being consistent and clear, and presenting a work in an organized and economical manner. Chapter titles include Matters of Measurement, From Gesture to Line, From Line to Shape, From Shape to Plane and Structure, From Structure to Value and Volume, Color in Drawing, Composition in Drawing, Seeing with the Mind's Eye, and Materials of Drawing. For serious amateur artists.

Library Journal Yale University Press

This open access book describes the serious threat of invasive species to native ecosystems. Invasive species have caused and will continue to cause enormous ecological and economic damage with ever increasing world trade. This multi-disciplinary book, written by over 100 national experts, presents the latest research on a wide range of natural science and social science fields that explore the ecology, impacts, and practical tools for management of invasive species. It covers species of all taxonomic groups from insects and pathogens, to plants, vertebrates, and aquatic organisms that impact a diversity of habitats in forests, rangelands and grasslands of the United States. It is well-illustrated, provides summaries of the most important invasive species and issues impacting all regions of the country, and includes a comprehensive primary reference list for each topic. This scientific synthesis provides the cultural, economic, scientific and social context for addressing environmental challenges posed by invasive species and will be a valuable resource for scholars, policy makers, natural resource managers and practitioners.

Content analysis is one of the most important but complex research methodologies in the social

sciences. In this thoroughly updated Second Edition of The Content Analysis Guidebook, author Kimberly Neuendorf provides an accessible core text for upper-level undergraduates and graduate students across the social sciences. Comprising step-by-step instructions and practical advice, this text unravels the complicated aspects of content analysis.

Artpaper Prentice Hall

Nine master artists present their personal approaches to sculpting the human figure in a spectacular volume that's technically illuminating and visually inspirational. The outstanding examples range from representational to abstract, diminutive to heroic. Nan Smith uses mold-making techniques and precise slab construction; Akio Takamori coil-builds a figure inspired by a Velázquez painting; and Christyl Boger creates a lavishly decorated, classically formal figurine. Each featured sculptor discusses the unique attractions and challenges of his or her method; detailed color photographs follow the artwork as it takes shape. Noted ceramics writer Glen R. Brown provides an insightful introduction.

The Handbook of Historical Economics guides students and researchers through a quantitative economic history that uses fully up-to-date econometric methods. The book's coverage of statistics applied to the social sciences makes it invaluable to a broad readership. As new sources and applications of data in every economic field are enabling economists to ask and answer new fundamental questions, this book presents an up-to-date reference on the topics at hand. Provides an historical outline of the two cliometric revolutions, highlighting the similarities and the differences between the two Surveys the issues and principal results of the "second cliometric revolution" Explores innovations in formulating hypotheses and statistical testing, relating them to wider trends in data-driven, empirical economics

American Book Publishing Record Prentice Hall

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

Themes, Tools, and Techniques Sterling Publishing Company, Inc.

In a world of modern, involved, caring parents, why are so many kids aggressive and cruel? Where is intelligence hidden in the brain, and why does that matter? Why do cross-racial friendships decrease in schools that are more integrated? If 98% of kids think lying is morally wrong, then why do 98% of kids lie? What's the single most important thing that helps infants learn language? NurtureShock is a groundbreaking collaboration between award-winning science journalists Po Bronson and Ashley Merryman. They argue that when it comes to children, we've mistaken good intentions for good ideas. With impeccable storytelling and razor-sharp analysis, they demonstrate that many of modern society's strategies for nurturing children are in fact backfiring—because key twists in the science have been overlooked. Nothing like a parenting manual, the authors' work is an insightful exploration of themes and issues that transcend children's (and adults') lives.

A Guide to Drawing, Printing, and Publishing Oxford University Press, USA

Henry is generally well-behaved, but he is occasionally arrogant and vain. Henry is at heart a hard worker, but his frequent bouts of illness hinder his work.

A Guide to Drawing from Observation Vintage

By showing that kitchen skill, and not budget, is the key to great food, *Good and Cheap* will help you eat well—really well—on the strictest of budgets. Created for people who have to watch every dollar—but particularly those living on the U.S. food stamp allotment of \$4.00 a day—*Good and Cheap* is a cookbook filled with delicious, healthful recipes backed by ideas that will make everyone who uses it a better cook. From Spicy Pulled Pork to Barley Risotto with Peas, and from Chorizo and White Bean Ragù to Vegetable Jambalaya, the more than 100 recipes maximize every ingredient and teach economical cooking methods. There are recipes for breakfasts, soups and salads, lunches, snacks, big batch meals—and even desserts, like crispy, gooey Caramelized Bananas. Plus there are tips on shopping smartly and the minimal equipment needed to cook successfully. And when you buy one, we give one! With every copy of *Good and Cheap* purchased,

the publisher will donate a free copy to a person or family in need. Donated books will be distributed through food charities, nonprofits, and other organizations. You can feel proud that your purchase of this book supports the people who need it most, giving them the tools to make healthy and delicious food. An IACP Cookbook Awards Winner.

Illustrating Children's Books University Press of Colorado

How and why do works make their way into a public art collection? Who decides what will be hung on the walls, placed on plinths, displayed in cases? These important, but seldom discussed, questions lie at the heart of this 'cultural biography' of the 70 years during which the Robert McDougall Art Gallery was Christchurch's civic art gallery. The book explains how the collection came together, how it developed, and how the public, and artists and critics, reacted to it. The book is presented in three parts, each of which has its own introduction. It provides an analytical framework in detail and in context by defining terms and explaining particular, recurrent concepts. These include, and indeed highlight, selection and presentation cultures derived from the core museological functions of collection and display. These, together with the framework's other concepts, are related to mainstream methodology in the social sciences, particularly political science. The latter is especially relevant to the study of a public art gallery – owned and funded by the public and its elected representatives, and controlled by these representatives and their appointed agents. Furthermore, the framework explores the concept of post-colonial tensions between heritages – specifically indigenous, transplanted and autochthonous ones. The significance of this becomes more apparent when the concepts used in relevant previous studies of specific public art galleries in New Zealand are reviewed. There is also a strong emphasis on the development of a public Maori art collection. It is a story, too, of vivid and influential personalities – the directors and curators who fought for the gallery and the artists represented in it. But the book is more than just the story of a single gallery's collection: it shines a light on concerns and patterns that will be familiar to galleries everywhere, and provides a unique perspective on New Zealand's cultural development over much of the twentieth century.

Haunting Experiences Prentice Hall

Appropriate for all beginning and intermediate courses in Art, Basic Drawing, Figure Drawing, or Life Drawing. Providing a concise but comprehensive survey of all matters pertaining to drawing the human figure, this well-illustrated and accurate guide demonstrates the interplay of structure, anatomy, design, and expression in sound figure drawing. This text shows how the integration of these four factors is essential in drawing the figure in a compelling and lucid manner.

Visual Arts and Older People Simon & Schuster

Lawrence Lessig, "the most important thinker on intellectual property in the Internet era", masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been able to exert such control over what we can and can't do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and, ultimately, our freedom to imagine.

Leonardo National Academies Press

Getting the right diagnosis is a key aspect of health care - it provides an explanation of a patient's health problem and informs subsequent health care decisions. The diagnostic process is a complex, collaborative activity that involves clinical reasoning and information gathering to determine a patient's health problem. According to *Improving Diagnosis in Health Care*, diagnostic errors-inaccurate or delayed diagnoses-persist throughout all settings of care and continue to harm an unacceptable number of patients. It is likely that most people will experience at least one diagnostic error in their lifetime, sometimes with devastating consequences. Diagnostic errors may cause harm to patients by preventing or delaying appropriate treatment, providing unnecessary or harmful treatment, or resulting in psychological or financial repercussions. The committee concluded that improving the diagnostic process is not only possible, but also represents a moral, professional, and public health imperative. *Improving Diagnosis in Health Care* a continuation of

the landmark Institute of Medicine reports *To Err Is Human* (2000) and *Crossing the Quality Chasm* (2001) finds that diagnosis-and, in particular, the occurrence of diagnostic errors"has been largely unappreciated in efforts to improve the quality and safety of health care. Without a dedicated focus on improving diagnosis, diagnostic errors will likely worsen as the delivery of health care and the diagnostic process continue to increase in complexity. Just as the diagnostic process is a collaborative activity, improving diagnosis will require collaboration and a widespread commitment to change among health care professionals, health care organizations, patients and their families, researchers, and policy makers. The recommendations of *Improving Diagnosis in Health Care* contribute to the growing momentum for change in this crucial area of health care quality and safety.

A Comprehensive Science Synthesis for the United States Forest Sector Academic Press
 Gary Paul Nabhan takes the reader on a vivid and far-ranging journey across time and space in this fascinating look at the relationship between the spice trade and culinary imperialism. Drawing on his own family's history as spice traders, as well as travel narratives, historical accounts, and his expertise as an ethnobotanist, Nabhan describes the critical roles that Semitic peoples and desert floras had in setting the stage for globalized spice trade. Traveling along four prominent trade routes—the Silk Road, the Frankincense Trail, the Spice Route, and the Camino Real (for chiles and chocolate)—Nabhan follows the caravans of itinerant spice merchants from the frankincense-gathering grounds and ancient harbors of the Arabian Peninsula to the port of Zayton on the China Sea to Santa Fe in the southwest United States. His stories, recipes, and linguistic analyses of cultural diffusion routes reveal the extent to which aromatics such as cumin, cinnamon, saffron, and peppers became adopted worldwide as signature ingredients of diverse cuisines. Cumin, Camels, and Caravans demonstrates that two particular desert cultures often depicted in constant conflict—Arabs and Jews—have spent much of their history collaborating in the spice trade and suggests how a more virtuous multicultural globalized society may be achieved in the future.

A pair of technology experts describe how humans will have to keep pace with machines in order to become prosperous in the future and identify strategies and policies for business and individuals to use to combine digital processing power with human ingenuity.

The Content Analysis Guidebook W. W. Norton & Company

Surveys the online social habits of American teens and analyzes the role technology and social media plays in their lives, examining common misconceptions about such topics as identity, privacy, danger, and bullying.

1976: January-June Twelve

Offers artists advice on creating a portfolio, planning a career strategy, staging art exhibitions, and making useful connections

New Thinking About Children Chronicle Books

Ghosts and other supernatural phenomena are widely represented throughout modern culture. They can be found in any number of entertainment, commercial, and other contexts, but popular media or commodified representations of ghosts can be quite different from the beliefs people hold about them, based on tradition or direct experience. Personal belief and cultural tradition on the one hand, and popular and commercial representation on the other, nevertheless continually feed each other. They frequently share space in how people think about the supernatural. In *Haunting Experiences*, three well-known folklorists seek to broaden the discussion of ghost lore by examining it from a variety of angles in various modern contexts. Diane E. Goldstein, Sylvia Ann Grider, and Jeannie Banks Thomas take ghosts seriously, as they draw on contemporary scholarship that emphasizes both the basis of belief in experience (rather than mere fantasy) and the usefulness of ghost stories. They look closely at the narrative role of such lore in matters such as socialization and gender. And they unravel the complex mix of mass media, commodification, and popular culture that today puts old spirits into new contexts.
