The Betta Fish or Siamese Fighting Fish hails from the Mekong basin and has featured in fish tanks and bowls for centuries despite its reputation for aggression. Today there is a wide range of colours and tail and fin shapes to delight the aquarist, and these fish are also bred very successfully in captivity, including by hobbyists. This book will introduce you to these fish by looking at the different types, discussing their appearance and biology, typical Betta Fish behaviour, their feeding

requirements, and what makes these elegant fish both fascinating and unique. It will also tell you what you need to know in order to decide whether or not this is the pet for you and, if it is, where to buy one, how to select your Betta Fish, what you need to buy before you bring it home, and how to take proper care of it. The hobbyist must know what these fish need with regards to their environment. All the necessary equipment and water and other parameters are examined as the quality of the water and the general environment has a crucial bearing on the health and happiness of Betta or Siamese fighting fish. Like all fish, the Betta is unfortunately susceptible to a number of different types of bacterial, parasitic and fungal infections and infestations. Anyone who is serious about having a fish and a tank needs to know what to look for and how to deal with common fish ailments. This book also contains helpful information on their mating behaviour, spawning and on caring for the hatchlings or fry for those who are interested in breeding Bettas. Other areas of discussion are how to prevent fights between fish and which other species are compatible so you don't have to deal with aggression and the injuries and stress which inevitably follow fights or bullying. Covered in this book: - The basics - Choosing the right fish - Social behaviour - Buying - Equipment needed - Setting up the aquarium - Water & other parameters - Daily care - Feeding - Health - Breeding - Prices and costs and much more

The Queer Art of Failure is about finding alternatives - to conventional understandings of success in a heteronormative, capitalist society; to

academic disciplines that confirm what is already known according to approved methods of knowing; and to cultural criticism that has extensively theorized hegemony but paid little attention to counter-hegemony. Judith Halberstam proposes "low theory" as a means of recovering ways of being and forms of knowledge not legitimized by existing systems and institutions. Low theory is derived from eccentric archives. It runs the risk of not being taken seriously. It entails a willingness to fail and to lose one's way. Tacking back and forth between high theory and low theory, high culture and low culture, Halberstam looks for the unexpected and subversive in popular culture, avant-garde performance, and queer art. She pays particular attention to animated children's films, contending that new forms of animation, especially CGI, have generated narratives filled with unexpected encounters between the childish, the transformative, and the queer. Dismantling contemporary logics of success, Halberstam demonstrates that failure sometimes offers more creative, cooperative, and surprising ways of being in the world.

The Amazon and Orinoco basins in northern South America are home to the highest concentration of freshwater fish species on earth, with more than 3,000 species allotted to 564 genera.

Amazonian fishes include piranhas, electric eels, freshwater stingrays, a myriad of beautiful small-bodied tetras and catfishes, and the largest scaled freshwater fish in the world, the pirarucu. Field Guide to the Fishes of the Amazon, Orinoco, and Guianas provides descriptions and identification keys for all the known genera of fishes that

inhabit Greater Amazonia, a vast and still mostly remote region of tropical rainforests, seasonally flooded savannas, and meandering lowland rivers. The guide's contributors include more than fifty expert scientists. They summarize the current state of knowledge on the taxonomy, species richness, and ecology of these fish groups, and provide references to relevant literature for species-level identifications. This richly illustrated guide contains 700 detailed drawings, 190 color photos, and 500 distribution maps, which cover all genera. An extensive and illustrated glossary helps readers with the identification keys. The first complete overview of the fish diversity in the Amazon, Orinoco, and Guianas, this comprehensive guide is essential for anyone interested in the freshwater life inhabiting this part of the world. First complete overview of the fish diversity in the Amazon and Orinoco basins Contributors include more than fifty experts Identification keys and distribution maps for all genera 190 stunning color photos 700 detailed line drawings Extensive and illustrated glossary

To young Christians of the world, Pope Francis has a message for you: "Christ is alive, and he wants you to be alive!" In his fourth apostolic exhortation, *Christus Vivit*, Pope Francis encapsulates the work of the 2018 synod of bishops on "Young People, The Faith, and Vocational Discernment." Pope Francis has always had a special relationship with young people, and in his fatherly love for you he shows that: You can relate to young people in Scripture who made a difference You identify with the Christ who is always young You face difficult issues in the world today You yearn for the truth of the Gospel You are capable of amazing things when you respond to the Gospel You learn and grow with help from the faithful of all generations You need bold and creative youth ministry You can discover who God made you to be You are urged to pray for discernment *Christus Vivit* is written for and to young people, but Pope Francis also wrote it for the entire Church, because, as he says, reflecting on our young people inspires us all. "May the Holy Spirit urge you on as you run this race. The Church needs your momentum, your intuitions, your faith. We need them! And when you arrive where we have not yet reached, have the patience to wait for us."

Whether you are thinking of buying your first betta, or simply looking to improve your betta breeding skills, this book is for you! "A must-read for both the novice

and more experienced betta hobbyist alike." - Dr Joep H. M. van Esch (co-founder of the Bettas4all Standard) *Look Who's Back* B.E.S. Publishing
 The mysterious world beneath the ocean's surface has captivated man for centuries the Egyptians, Greeks, Romans, and ancient Chinese all kept fish in their homes for purposes other than the culinary. But it was not until the nineteenth-century invention of the aquarium that the deep was truly domesticated, offering the curiously inclined a chance to invent their very own exotic sea world within their own walls. In this fascinating history of the aquarium, Bernd Brunner traces the development of this most wonderful invention, giving insight into the cultural and social circumstances that accompanied its swift rise in popularity. Brunner tells a compelling story of obsession, beauty, discovery, and delight, from the aquarium's humble origins as a tool for scientific observation to the Victorian era's elaborately decorated containers of oceanic curiosity, to the great public aquaria of the twentieth century.
