This is one of the most important books ever written on the clandestine world of the UFO cover-up. Grant Cameron and Scott Crain do more than demonstrate the reality of an extraterrestrial presence on Earth. Through tenacious investigation and impeccable research, they shine a light into the CIA, NSA, Air Force, Navy, and other inside groups that have managed this secret for decades. Their conclusion is inescapable and shocking: this is a secret that the insiders themselves struggle to understand and contain. "Government agencies, at various times, perceive a need to release some UFO information to the public. Some, definitely not all. How do they do it? Always via avenues that leave no one at risk. That means ensuring there is no direct connection between the agency and whomever is doing the actual releasing. It also means

the necessity of mixing in some false information. It means, ultimately, to tell the truth, but tell it with a slant. Until there is a full disclosure of the UFO/ET reality, deniability will remain paramount to those in possession of this great secret." - By the authors, from the book's Introduction.

What do the following events have in common? In 2000, the election between George W. Bush and Al Gore was a virtual tie. The 1989 and 1990 vintages have turned out to be two of the best ever for Bordeaux wines. In 2001, the Federal Reserve lowered the interest rate eleven times. The decade of the 1970s was one of the worst on record for U.S. inflation. In 2001, the author of this book, at age 59, ran a marathon in 3 hours and 30 minutes, but should have been able to do it in 3 hours and 15 minutes. This book shows clearly and simply how these diverse events can be explained by using the tools of the social sciences and statistics. It moves from a discussion of formulating theories about real world phenomena to lessons on how to analyze data, test theories, and make predictions. Through the use of a rich array of examples, the book demonstrates the power and range of social science and statistical methods. In addition to "big" topics—presidential elections, Federal Reserve behavior, and inflation—and "not quite so big" topics—wine quality—the book takes on questions of more direct, personal interest. Who of your friends is most likely to have an extramarital affair? How important is class attendance for academic performance in college? How

fast can you expect to run a race or perform some physical task at age 55, given your time at age 30? (In other words, how fast are you slowing down?) As the author works his way through an incredibly broad range of questions and topics, demonstrating the usefulness of statistical theory and method, he gives the reader a new way of thinking about many age-old concerns in public and private life.

W. W. Norton & Company

This "compellingly hard-hitting" bestseller from a Pulitzer Prize finalist gives readers the complete untold story of the top-secret military base for the first time (New York Times). It is the most famous military installation in the world. And it doesn't exist. Located a mere seventy-five miles outside of Las Vegas in Nevada's desert, the base has never been acknowledged by the U.S. government — but Area 51 has captivated imaginations for decades. Myths and hypotheses about Area 51 have long abounded, thanks to the intense secrecy enveloping it. Some claim it is home to aliens, underground tunnel systems, and nuclear facilities. Others believe that the lunar landing itself was filmed there. The prevalence of these rumors stems from the fact that no credible insider has ever divulged the truth about his time inside the base. Until now. Annie Jacobsen had exclusive access to nineteen men who served the base proudly and secretly for decades and are now aged 75-92, and unprecedented access to fifty-five additional military and intelligence personnel, scientists, pilots, and engineers linked to the secret base, thirty-two of whom lived and worked there for extended periods. In Area 51, Jacobsen shows us what has really gone on in the Nevada desert, from testing

nuclear weapons to building super-secret, supersonic jets to pursuing the War on Terror. This is the first book based on interviews with eye witnesses to Area 51 history, which makes it the seminal work on the subject. Filled with formerly classified information that has never been accurately decoded for the public, Area 51 weaves the mysterious activities of the top-secret base into a gripping narrative, showing that facts are often more fantastic than fiction, especially when the distinction is almost impossible to make.

Night of the Ninjas St. Martin's Press  
This study offers fresh insight into the place of (non)violence within Jesus' ministry, by examining it in the context of the eschatologically-motivated revolutionary violence of Second Temple Judaism. The book first explores the connection between violence and eschatology in key literary and historical sources from Second Temple Judaism. The heart of the study then focuses on demonstrating the thematic centrality of Jesus' opposition to such "eschatological violence" within the Synoptic presentations of his ministry, arguing that a proper understanding of

eschatology and violence together enables appreciation of the full significance of Jesus' consistent disassociation of revolutionary violence from his words and deeds. The book thus articulates an understanding of Jesus' nonviolence that is firmly rooted in the historical context of Second Temple Judaism, presenting a challenge to the "seditious Jesus hypothesis"—the claim that the historical Jesus was sympathetic to revolutionary ideals. Jesus' rejection of violence ought to be understood as an integral component of his eschatological vision, embodying and enacting his understanding of (i) how God's kingdom would come, and (ii) what would identify those who belonged to it.

*Nineteen Eighty-Four* QEB Publishing  
Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

In the new novel in the #1 New York Times bestselling series, Lt. Eve Dallas is about to walk into the shadows of her husband’s dangerous past... While Eve examines a fresh body in Washington Square Park, her husband, Roarke, spots a man among the onlookers he’s known since his younger days on the streets of Dublin. A man who claims to be his half brother. A man who kills for a living—and who burns with hatred for him. Eve is

quick to suspect that the victim's spouse—resentful over his wife's affair and poised to inherit her fortune—would have happily paid an assassin to do his dirty work. Roarke is just as quick to warn her that if Lorcan Cobbe is the hitman, she needs to be careful. Law enforcement agencies worldwide have pursued this cold-hearted killer for years, to no avail. And his lazy smirk when he looked Roarke's way indicates that he will target anyone who matters to Roarke...and is confident he'll get away with it. Eve is desperate to protect

Roarke. Roarke is desperate to protect Eve. And together, they're determined to find Cobbe before he finds them—even if it takes them across the Atlantic, far outside Eve's usual jurisdiction...
