The book *Love Beyond Love* is about the very essence of life—LOVE and attaining the supreme consciousness of AUM. The search of the human soul for true love, whether it is momentary or transcendental, keeps the world moving. The themes of love, feminism, search for the supreme consciousness and the futility of time and space brims with rich imagery and exuberant passion. The question “Who am I?” as a social being and a spiritual source resonates unanswered in the entire realms of existence.

The book compiles the research works related to smart solutions concept in context to smart energy systems, maintaining electrical grid discipline and resiliency, computational collective intelligence consisted of interaction between smart devices, smart environments and smart interactions, as well as information technology support for such areas. It includes high-quality papers presented in the International Conference on Intelligent Computing Techniques for Smart Energy Systems organized by Manipal University Jaipur. This book will motivate scholars to work in these areas. The book also prophesies their approach to be used for the business and the humanitarian technology development as research proposal to various government organizations for funding approval.

This is a description of contemporary India and some of its recent history in the form of an autobiography. Rajmata Scindia is a member of the Indian Parliament. As a maharani she had thousands of servants and several enormous palaces. Since Independence, which marked the end of the supremacy of the Maharajas, she has emerged as one of India's most popular political leaders, first with the Congress party and now with the opposition. Her appeal to the masses, who see her as an image of Mother India, amazes both her admirers and her critics.

This unique one-of-a-kind book is a comprehensive introduction to the theory and practice of Ayurveda, and discusses the practical use of therapies such as diet, exercise, yoga, meditation, massage, and herbal remedies. The book also includes detailed information on Ayurvedic pharmacology and pharmacy, clinical methods and examinations, and general treatment protocols. Plus, a helpful section provides a comprehensive materia medica of 50 Indian herbs that include botanical descriptions, traditional Ayurvedic knowledge, constituent data and the latest medical

research, as well as clinical indications, formulations, and dosages. Helpful full-color insert containing photos of the 50 herbs covered, alongside a ruler for scale, allows the reader to quickly identify herbs correctly. Includes useful appendices, including information on dietary and lifestyle regimens, Ayurvedic formulations, Ayurvedic weights and measures, glossaries on Ayurvedic terms, and medical substances. Unique contributions include a discussion of pathology, clinical methods, diagnostic techniques, and treatment methods from an Ayurvedic perspective.

"...substantial contribution to African-American Studies and women's studies." --Mississippi Quarterly "A bravura performance by an accomplished scholar... it strikes a perfect balance between insightful literary analysis and historical investigation." --Eighteenth-Century Studies "... an impressive study of a wide range of writers.... Foster's work is both scholarly and accessible. Her prose is economical and direct, making this book enjoyable as well as instructive." --Belles Lettres "... an impressively wide-ranging discussion of texts and contexts..." --Signs "Foster has written a fine book that provides the reader with a context for understanding the importance of the written word for women who chose to 'set the record straight'." --Journal of American History "... fascinating, meticulously researched... Likely to prove seminal in the field... highly recommended..." --Library Journal "Written by Herself comprises a volume of remarkable female characters whose desires for social change often made them catalysts for spiritual awakening in their own times." --MultiCultural Review "... an outstanding piece of scholarship... Foster's book offers deeply intelligent, provocative, totally accessible analysis of a tradition and of writers still not sufficiently read and taught." --American Literature "Well written and thoroughly researched. Highly recommended..." --Choice The first comprehensive cultural history of literature by African American women prior to the 20th century. From the oral histories of Alice, a slave born in 1686, to the literary tradition that included Jarena Lee and Octavia Victoria Rogers Albert, this literature was argument, designed to correct

or to instruct an audience often ignorant about or even hostile to black women.

This multi-compendium is a comprehensive, illustrated and scientifically up-to-date work covering more than a thousand species of edible medicinal and non-medicinal plants. This work will be of significant interest to scientists, researchers, medical practitioners, pharmacologists, ethnobotanists, horticulturists, food nutritionists, agriculturists, botanists, herbalogists, conservationists, teachers, lecturers, students and the general public. Topics covered include: taxonomy (botanical name and synonyms); common English and vernacular names; origin and distribution; agro-ecological requirements; edible plant part and uses; botany; nutritive and medicinal/pharmacological properties, medicinal uses and current research findings; non-edible uses; and selected/cited references. Each volume covers about a hundred species arranged according to families and species. Each volume has separate scientific and common names indices and separate scientific and medical glossaries.

People always tell me, 'You're such a positive and happy person,' and it always makes me think, Hah!! I'm such a good actor. Actor, model, anchor, entrepreneur: Anu Hasan has been out there living her life, loving people, working hard and giving it her best shot. Ask her and she'll tell you: life's a funny thing. There are decisions to be made and lessons to be learnt. There are things to be done and people to be mollified. In this candid and entertaining account

of her life, Hasanwields that most powerful of weapons against the world:her sense of humour. Her unabashed acceptance of her own foibles will have you smile; her unapologetic stancetowards life and people might even raise a few eyebrows.But hey, Hasan's got her Sunny Side Up. 'Seldom does one get a chance to become acquainted with India's great leaders through a young woman so intimately associated with them.'-New York Times Book ReviewA dramatic portrait of the spirit of sacrifice that carried India through the years of the struggle for independence, this evocative memoir of an unusual childhood ends with the assassination of Mahatma Gandhi in 1948.Nayantara Sahgal describes what it was like growing up in Anand Bhavan, Allahabad, the home of her parents shared with her maternal uncle, Jawarlal Nehru, during the years when Gandhi was leading the movement for independence. It describes in loving detail the lives of a family for whom the country's fight for freedom was more important than anything else, certainly coming before comfort and riches.The book is particularly delightful for its picture of Nehru who springs from these pages as a man of friendly humanity and a joy in life that made him a beloved uncle, yet with an inborn greatness that inspired awe and admiration in the little girl who played with him.'She is brilliant...complex and questioning.' - Pearl S. Buck

This book is a collection of papers presented at the International Conference on Intelligent Computing, Information and Control Systems (IICCCS 2020). It encompasses various research works that help to develop and advance the next-generation intelligent computing and control systems. The book integrates the computational intelligence and intelligent control systems to provide a powerful methodology for a wide range of data analytics issues in industries and societal applications. The book also presents the new algorithms and methodologies for promoting advances in common intelligent computing and control methodologies including evolutionary computation, artificial life, virtual infrastructures, fuzzy logic, artificial immune systems, neural networks and various neuro-hybrid methodologies. This book is pragmatic for researchers, academicians and students dealing with mathematically intransigent problems.

**Edible Medicinal and Non-Medicinal Plants** CRC Press

This book highlights state-of-the-art research on big data and the Internet of Things (IoT), along with related areas to ensure efficient and Internet-compatible IoT systems. It not only discusses big data security and privacy challenges, but also

energy-efficient approaches to improving virtual machine placement in cloud computing environments. Big data and the Internet of Things (IoT) are ultimately two sides of the same coin, yet extracting, analyzing and managing IoT data poses a serious challenge. Accordingly, proper analytics infrastructures/platforms should be used to analyze IoT data. Information technology (IT) allows people to upload, retrieve, store and collect information, which ultimately forms big data. The use of big data analytics has grown tremendously in just the past few years. At the same time, the IoT has entered the public consciousness, sparking people's imaginations as to what a fully connected world can offer. Further, the book discusses the analysis of real-time big data to derive actionable intelligence in enterprise applications in several domains, such as in industry and agriculture. It explores possible automated solutions in daily life, including structures for smart cities and automated home systems based on IoT technology, as well as health care systems that manage large amounts of data (big data) to improve clinical decisions. The book addresses the security and privacy of the IoT and big data technologies, while also revealing the impact of IoT technologies on several scenarios in smart cities design. Intended as a comprehensive introduction, it offers in-depth analysis and provides scientists, engineers and professionals the latest techniques, frameworks and strategies used in IoT and big data technologies.

The Scope of Happiness is the autobiography of an outstanding world figure who was the sister, confidante, and lifelong political associate of India's first prime minister, Jawaharlal Nehru and the aunt of Indira Gandhi. Vijaya Lakshmi Pandit participated in the Indian national struggle for freedom from its inception and was imprisoned three times. In this very personal view of the struggle for independence, she gives an evocative picture of the cultured and protected world in which she grew up in Anand Bhavan in Allahabad, conveying even the textures, aromas and sounds of her childhood home. She offers an unprecedented picture of life in India under British rule, with its rigorous restrictions and racial bigotry. A compelling strength of this book is the intimate picture the author draws of many great figures: the searching and affectionate view of her brother, the insight into her niece Indira, a personal record of Mahatma Gandhi that no one else could give-and penetrating and entertaining anecdotes of world figures such as Krishna Menon, Earl Mountbatten of Burma, Chester Bowles, Dag Hammarskjold, Eleanor Roosevelt, President Tito and Prince Charles. No other living individual could draw the sweeping historical picture that Mrs Pandit has given us in her memoir, making it a book of rare significance that will speak lastingly for generations to come.

Signal and Acoustic Modeling for Speech and Communication Disorders demonstrates how speech signal processing and acoustic modeling can be instrumental in early detection and successful intervention with speech deficits resulting from

Parkinson's disease, Autism Spectrum disorder, cleft palate, intellectual disabilities, and neuro-motor impairments. Utilizing some of the most advanced methods in signal and acoustic modeling, this eminent group of contributors show how such technologies can inure to the benefit of healthcare and to society writ large. Paradoxically, what most of us take for granted still remains a Sisyphean battle for those with speech and language disorders, who struggle every day to make themselves heard and understood. The purpose of this book is to stimulate a vibrant discussion among speech scientists, system designers, and practitioners on how to best marshal the latest advances in signal and acoustic modeling to address some of the most challenging speech and communication disorders affecting a wide variety of patient populations across the world.
