Pirotechnia Berghahn Books

Drawing on social science perspectives, *Contested Categories* presents a series of empirical studies that engage with the often shifting and day-to-day realities of life sciences categories. In doing so, it shows how such categories remain contested and dynamic, and that the boundaries they create are subject to negotiation as well as re-configuration and re-stabilization processes. Organized around the themes of biological substances and objects, personhood and the genomic body and the creation and dispersion of knowledge, each of the volume's chapters reveals the elusive nature of fixity with regard to life science categories. With contributions from an international team of scholars, this book will be essential reading for anyone interested in the social, legal, policy and ethical implications of science and technology and the life sciences.

Word for Windows 95 Smithsonian Inst Press

Depicts artifacts and objects from the collections of the various museums of the Smithsonian Institution that honor the human impulses of discovery, imagination, and memory

Evidence-Based Public Health HarperCollins Publishers

Paula Hyman broadens and revises earlier analyses of Jewish assimilation, which depicted "the Jews" as though they were all men, by focusing on women and the domestic as well as the public realms. Surveying Jewish accommodations to new conditions in Europe and the United States in the years between 1850 and 1950, she retrieves the experience of women as reflected in their writings--memoirs, newspaper and journal articles, and texts of speeches--and finds that Jewish women's patterns of assimilation differed from men's and that an examination of those differences exposes the tensions inherent in the project of Jewish assimilation. Patterns of assimilation varied not only between men and women but also according to geographical locale and social class. Germany, France, England, and the United States offered some degree of civic equality to

their Jewish populations, and by the last third of the nineteenth century, their relatively small Jewish communities were generally defined by their middle-class characteristics. In contrast, the eastern European nations contained relatively large and overwhelmingly non-middle-class Jewish population. Hyman considers how these differences between East and West influenced gender norms, which in turn shaped Jewish women's responses to the changing conditions of the modern world, and how they merged in the large communities of eastern European Jewish immigrants in the United States. The book concludes with an exploration of the sexual politics of Jewish identity. Hyman argues that the frustration of Jewish men at their "feminization" in societies in which they had achieved political equality and economic success was manifested in their criticism of, and distancing from, Jewish women. The book integrates a wide range of primary and secondary sources to incorporate Jewish women's history into one of the salient themes in modern Jewish history, that of assimilation. The book is addressed to a wide audience: those with an interest in modern Jewish history, in women's history, and in ethnic studies and all who are concerned with the experience and identity of Jews in the modern world.

The Christmas Story Rizzoli International Publications

What is the material of the artifact? What are the characteristics of the substrates? Is it possible to adequately isolate the tooth? It is fundamental to answer these questions when performing the assessment before beginning the final and decisive phase of prosthetic restoration: cementation. The materials and techniques used for cementation are described in this text, which is specifically dedicated to prosthetists and to those who practice conservative dentistry. Cementation is a complex procedure that requires good skills, and its outcome depends on the knowledge of the substrates involved and the choice of the most suitable cement for the specific situation. This handbook examines each substrate and defines the cementation protocols for all cases in daily practice.

La Tosca Oxford University Press

This work not only examines Rome's reaction during the fascist period but delves into the broader historical development and the

impact of theological anti-Judaism

Archives, Ancestors, Practices Arktos

In line with the resurgence of interest in the history of archaeology manifested over the past decade, this volume aims to highlight state-of-the-art research across several topics and areas, and to stimulate new approaches and studies in the field. With their shared historiographical commitment, the authors, leading scholars and emerging researchers, draw from a wide range of case studies to address major themes such as historical sources and methods; questions of archaeological practices and the practical aspects of knowledge production; 'visualizing archaeology' and the multiple roles of iconography and imagery; and 'questions of identity' at local, national and international levels.

Uses of a Whirlwind University of Washington Press

This manual provides a detailed presentation of the various Romance languages as they appear in texts written by Jews, mostly using the Hebrew alphabet. It gives a comprehensive overview of the Jews and the Romance languages in the Middle Ages (part I), as well as after the expulsions (part II). These sections are dedicated to Judaeo-Romance texts and linguistic traditions mainly from Italy, northern and southern France (French and Occitan), and the Iberian Peninsula (Catalan, Spanish, Portuguese). The Judaeo-Spanish varieties of the 20th and 21st centuries are discussed in a separate section (part III), due to the fact that Judaeo-Spanish can be considered an independent language. This section includes detailed descriptions of its phonetics/phonology, morphology, lexicon, and syntax.

The Vatican Necropoles State University of New York Press

A comprehensive overview of contemporary radical social movements in the United States.

Manual of Judaeo-Romance Linguistics and Philology Walter de Gruyter GmbH & Co KG

It is November 1918. Germany has just surrendered after four years of the most savage warfare in history. It is teetering on the brink of total social and economic collapse, and the German

people now lie at the mercy of new, liberal politicians who despise everything Germany once stood for. The Communists are rioting in the streets, threatening to topple the new government in Weimar and bring about their own revolution. The frontline soldiers are returning from the hell of the war to find an unrecognizable land, the principles and traditions they had sacrificed so much to defend now the stuff of mockery. The narrator of *The Outlaws*, a 16-year-old military cadet, is too young to have served in the trenches, but feels the sting of this betrayal no less than they. Since Germany's armies have been all but disbanded, he joins the paramilitary Freikorps - groups of veterans who refuse to lay down their arms, and who have pledged to stop the Communists - and begins fighting, first in the streets of Germany's cities, and then in the Baltic states, defending Germany's eastern frontiers from Communist subversion while ignoring the calls to disengage by the meek politicians at home. After months of intense fighting abroad, the Freikorps soldiers return to settle scores with their enemies in Germany, dreaming of a nationalist counter-revolution, and, their trigger fingers still itchy, fix their sights on bringing down the hated new government once and for all... *The Outlaws* is a chronicle of the experiences of the men who fought in the Freikorps, but it is also an adventure and a war story about an entire generation of soldiers who loved their homeland more than peace and comfort, and who refused to accept defeat at any price. "What we wanted we did not know; but what we knew we did not want. To force a way through the prisoning wall of the world, to march over burning fields, to stamp over ruins and scattered ashes, to dash recklessly through wild forests, over blasted heaths, to push, conquer, eat our way through towards the East, to the white, hot, dark, cold land that stretched between ourselves and Asia - was that what we wanted? I do not know whether that was our desire, but that was what we did. And the search for reasons why was lost in the tumult of continuous fighting." - p. 65 Ernst von Salomon (1902-1972) was one of the writers of the German Conservative Revolution of the 1920s. Like the narrator of *The Outlaws*, he was a military cadet at the end of the First World War, and joined the Freikorps, participating in many of the events described in the book, including the assassination of Foreign Minister Walther Rathenau, for which he was imprisoned. He went on to write many books and film scripts.

Gender and Assimilation in Modern Jewish History OUP USA
'Joined-up government' is a key theme of modern government. The Labour government, first elected in 1997, decided that intractable problems such as social exclusion, drug addiction and crime could not be resolved by any single department of government. Instead, such problems had to be made the object of a concerted attack using all the arms of government - central and local government and public agencies, as well as the private and voluntary sectors. This book seeks to analyse 'joined-up government', to consider its history, and to evaluate its consequences for British institutions such as the Cabinet, the civil service and local authorities. Is joined-up government a new idea, or merely a new label for a very old idea? What lessons can be learnt from previous attempts at joined-up government? How does it affect our traditional constitutional conceptions relating to Cabinet government, a politically neutral and non-partisan civil service, and an independent system of local government? Will it lead to the concentration of power in 10 Downing Street or is it compatible with a political system based on checks and balances? Drawing together papers given at a conference held at the British Academy, *Joined-Up Government* provides a broad overview of one of the most significant aspects in modern government. Its contributors include not only distinguished academics, but also those who have themselves been engaged as practitioners in developing joined-up programmes. This book will be indispensable to all those who seek to understand how new developments in government are affecting our lives.

A short reference that visually presents the most essential Word for Windows 95 tasks along with the most efficient way to accomplish each of those tasks. Coded by task category that is organized alphabetically, the reference makes it easy to locate information. Tasks are also listed alphabetically within common topic areas.

America's Smithsonian Brepols Publishers

Editing as an academic mode of work has had a variable 'press' - it is often seen as just plumbing. But without editions no historian of whatever critical persuasion could operate. Texts that are not edited are effectively invisible. The advent of electronic means of text production has also raised new possibilities and new problems that need to be openly considered rather than ignored.

The papers in this volume reflect those concerns, and explore the ways forward. How do the best editorial procedures of the past get transmitted to the future? A distinguished line-up of experienced editors and younger scholars actively grappling with these issues reflect on their engagement with the challenges of textual theory and editorial practice. No single solution emerges as applicable to all texts and for all editions; the individual characteristics of each text and its transmission, together with the intended audience of each edition, emerge as primary areas for consideration.

The Elder Seneca Indiana University Press

As an award-winning cookbook author, food writer, and online culinary expert, Michael Ruhlman has developed a reputation for providing lucid, no-nonsense cooking advice as sharp as a good chef's knife. In this first in a new series of books focusing on cooking methods, Ruhlman explores one of the most fundamental cooking techniques- roasting. Humankind has been roasting for millennia. The term originally referred to cooking over an open fire, usually on some kind of spit, and has evolved to describe cooking of meat or vegetables or even fruit in an oven, a "dry heat" (and usually high-heat) method of making things irresistibly appetizing. "Of all our cooking terms," Ruhlman writes, "sautéed, grilled, poached, broiled-I believe roasted is the most evocative adjective we can attach to our food, conjuring as it does ideas of deep rich flavors and delicious browning." *RUHLMAN'S HOW TO ROAST* combines practical advice - what tools you need, staple ingredients to have on hand, how to get the most out of your oven - with 20 original and mouthwatering recipes, chosen to showcase a wide range of roasting methods and results, from "The Icon" (roast chicken), to Monkfish Roasted with Tomatoes and Basil, to Roasted Peaches with Mint Crème Fraîche. Dozens of color photographs offer step-by-step illustration as well as finished-dish showpieces.

La Tosca John Wiley & Sons

Originally printed in 1540, this classic work on the field of metallurgy marked the beginning of a true technological literature. Biringuccio's *Pirotechnia* is the earliest printed work to cover the whole field of metallurgy. Originally printed in Venice in 1540, this was the first book to deal with the applied metal arts and processes of ore reduction and to describe the techniques which had been in development since the bronze age. Written by

a master craftsman in a time when knowledge was kept alive by the spoken rather than the written word, this classic marked the beginning of a true technological literature, with both craftsmanship and science united by a writer's pen to form a record of an important facet of man's achievement as a stimulus to further advance. After the publication of the *Pirotechnia*, many followed Biringuccio's example, and as a result of this growing literature of technological practice and experimental fact, science eventually became the concern of the educated man.

Probable Truth Read Books Ltd

Serving as an introduction to PROFINET technology, this book gives engineers, technicians and students an overview of the concept and fundamentals for solving automation tasks. Technical relationships and practical applications are described using SIMATIC products as examples.

Ruhlman's How to Roast Springer

Stepping out of her beloved trunk full of bread crumbs, dust, spider webs, books, and ragged funeral ornaments, the young protagonist of Paola Masino's most controversial novel realizes that her fate is already sealed. She will have to conform to society's expectations of a woman: her wild imagination will have

to be controlled, her intelligence kept at bay. In short, she will have to become a Housewife. Subject to Fascist censorship before its first publication in 1945, *Birth and Death of the Housewife* offers a surrealist criticism of Fascism and the rigid notion of womanhood it promoted. In her depiction of a woman's struggle to play a role that simply does not correspond to her desires, Masino expresses a frustration and a rebellious instinct rarely found among her contemporaries. Defying interpretations and standing alone among the heroines of twentieth-century Italian literature, Masino's *Housewife* remains an uncomfortable, enigmatic figure whose impudent determination to challenge the bulwarks of traditional female roles reaches beyond historical boundaries and resonates powerfully with contemporary readers.

Automating with PROFINET Walter de Gruyter GmbH & Co KG
Essentials of Marketing Communications 3rd edition gives students a concise overview of the strategic and tactical decision-making processes involved in marketing communications. It also links the current theories of marketing communications to consumer behaviour issues as well as explaining how marketing communications works in the real world. The text is ideal for those studying marketing communications for the first time.

History of the Ecumenical Movement Little, Brown

This manual contains overviews on language acquisition and distinguishes between first- and second-language acquisition. It also deals with Romance languages as foreign languages in the world and with language acquisition in some countries of the Romance-speaking world. This reference work will be helpful for researchers, students, and teachers interested in language acquisition in general and in Romance languages in particular.

Heavy Tractor M1 MIT Press

This is the first published summary of the entire complex of the great necropolises of Rome, which were situated on Vatican Hill. The work concerns one of the most extensive, richest, and least-known Roman archaeological phenomena and bears witness to the work of creating an underground museum that has been followed internationally as a model of conservation practice. From the submerged world of the necropolises emerges the funeral 'normality' of the Roman world, from poorer cremations in wooden urns, to sumptuous sarcophagi, to sepulchres adorned with frescoes and mosaics. One can also observe Egyptian cults influencing the practice of epicurean philosophy. In addition, we can catch a glimpse of the first traces of Christianity, which include the presence of St. Peter the Apostle's tomb.
