MATHIAS WHEELER

Work, Industry and Canadian Society McGill-Queen's Press - MQUP

Explores workplace learning as a means of enhancing both work performance and the quality of working life. Identifies characteristics of high performance work organizations, considers the implementation of high performance work practices and investigates how far these practices are embedded in different countries. Examines ways in which public policy can be used to encourage organizations to make more effective use of the skills of their employees.

Ageism at Work McGill-Queen's Press - MQUP

Greg McElligott traces neoconservative labour market policy from its international origins to the local offices of the Canadian state.

Work, Industry and Canadian Society [sound Recording] University of Toronto Press

This reference provides an overview of relevant literature to engineers, managers, accountants, occupational health and safety specialists, and industrial hygienists, so that they, and other professionals, can understand what has caused our workplaces to become primary sources of physical and mental illness.

Canadian Society in the Twenty-First Century, Fourth Edition Scarborough, Ont. : Nelson Canada

In 2011, protesters around the world - including Canada - called for changes to the societies in which they live. Many observers were asking: "What do they want?" Some answers to this question can be found in *How Societies Work*, a unique and accessible introductory sociology textbook that introduces students to the structure of contemporary societies and the power relationships within them. In contrast to most introductory textbooks, *How Societies Work* explores a broad range of sociological concepts and theories while simultaneously creating a coherent picture of modern societies. Drawing on fields as diverse as anthropology, genetics, economics, social psychology, history and politics, this innovative and popular text looks at both the roots of modern societies and the current structures within them. This approach helps undergraduate students make sense of our complex social world and encourages them to connect the social world to their own lived experiences. This extensively revised and updated fifth edition includes discussions of the roots of the recent global economic crisis and worldwide responses to it, growing social inequality, broader global struggles for change, the growth of the security state in Canada and the sudden resurgence of political protest in North America. The final chapter looks to the future, examining such issues as the possible consequences of climate change, increased forced migration of peoples and the changing dynamic of global power. More boxes, quotes and "think about it" elements have been added to the fifth edition, while the language, clarity of presentation and many examples make it even more accessible to readers. It is an introductory textbook that truly engages students in the "sociological imagination." This fifth edition is presented in a large format, making it easier to read and even more student friendly. A testbank and power point presentation are available for instructors upon request.

Education, Training and the Future of Work I BRILL

An impassioned defence of the liberal arts.

Canada after Harper Routledge

In a contemporary labour market that includes growing levels of precarious employment, the regulation of minimum employment standards is intricately connected to conditions of economic security. With a focus on the role of neoliberal labour market policies in promoting "flexible" employment standards legislation - particularly in the areas of minimum wages and working time - Mark Thomas argues that shifts toward "flexible" legislation have played a central role in producing patterns of labour market inequality. Using an analytic framework that situates employment

standards within the context of the broader social relations that shape processes of labour market regulation, Thomas constructs a case study of employment standards legislation in Ontario from 1884 to 2004. Drawing from political economy scholarship, and using a qualitative research methodology, he analyses class, race, and gender dimensions of legislative developments, highlighting the ways in which shifts towards "flexible" employment standards have exacerbated longstanding racialized and gendered inequities. *Regulating Flexibility* argues that in order to counter current trends towards increased insecurity, employment standards should not be treated as a secondary form of labour protection but as a cornerstone in a progressive project of labour market re-regulation.

Work in Canada Routledge

Most Canadians know that Stephen Harper has had a tremendous impact on the country since becoming prime minister in 2006. But few have the in-depth knowledge of how far his transformation has gone -- what has already been done, and what the consequences will be in the future. This book brings together Canadian experts in a wide variety of areas. They document key changes put in place by the Harper government. There have been dramatic changes in education, health care, women's rights, science and research, guiding the economy, labour unions, water and natural resources, and aboriginal affairs. Most of these measures have been designed to be difficult, if not impossible, to reverse. Readers will for the first time grasp the breadth and depth of the Harper attack on institutions, policies, and programs that embody values and principles shared by most Canadians. Each chapter documents the dangers of a government fixated on the needs of corporations and the one percent, blinded to our environmentally unsustainable lifestyle, and expanding surveillance and security measures to intimidate and threaten opponents. The contributors to this book believe that engagement in public affairs by the citizenry can trump the power of the elites and the giant corporations who are the winners of the Harper era. As activists in public life, they propose strategies and measures to create a Canada that champions fairness, social justice, real democracy in our government institutions, action to reverse global warming, and a constructive role in world affairs.

From Education to Work Crane Library

Written as the computer revolution dawned on Canadian society, *Computers on the Job* introduces the effects of technological change on people in their homes and workplaces. Heather Menzies explains, in clear, nontechnical terms, how the microchip unleashes the full potential of computers, allowing employers to automate many routine jobs and transform others--sometimes for the benefit of employees, sometimes not. She traces the effects of computerization on office work, on the service industry and on traditional blue-collar occupations, forecasting changes that, in many cases, have come to pass. *Computers on the Job* is a pioneering study of the impact of widespread computer use on Canadian society.

The Media Gaze McGill-Queen's Press - MQUP

The introduction summarizes and locates the major waves of change. The authors then document each trend in relation to eighteen thematic groups that include age, community, women, labour, management, stratification, social relations, the state, mobilizing institutions, social forces, ideologies, households, lifestyle, leisure, education, integration, and attitudes and values. *Work, Industry, and Canadian Society, Loose-Leaf Version* James Lorimer & Company
A penetrating analysis and critique of the neoliberal policies that prompted the global economic crisis of 2008.

Worlds of Work John Wiley & Sons

First published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

The Development of Generativity across Adulthood Fernwood Publishing

The advent of transnational economic production and market integration compels sociologists of

work to look beyond traditional national boundaries and build an international sociology of work in order to effectively address the human, scientific, and practical challenges posed by global economic transnationalism. The purpose of this volume is to promote transnational dialogue about the sociology of work and help build a truly international discipline in this field.

Values in Conflict University of Alberta

This work was supported financially by the Comparative, International and Development Education Centre at OISE/University of Toronto and morally by his colleagues in every part of the world.

Work in Canada and Work, Industry, Canadian Society Oxford University Press

This edited volume explores how and why immigrant/refugee mothers' experiences differ due to the challenges posed by the migration process, but also what commonalities underline immigrant/refugee mothers' lived experiences. This book will add to the field of women's studies the much-needed discussion of how immigrant and refugee mothers' lives are dependent on cultural, environmental and socio-economic circumstances. The collection offers multiple perspectives on migrant mothering by including ethnographic and theoretical submissions along with mothers' personal narratives and literary analyses from diverse locales: New Zealand, Japan, Canada, The United States, Turkey, Italy and the Netherlands among others. The first section of the volume focuses on mothers' roles in the family institution and the pressures and responsibilities they face in "creating" and "reproducing" families physically and socially. The second section shifts its attention to children and highlights mothers' continued roles in the development of their children abroad, along with the gendered/generational dynamics in the settlement process and the resultant effects on motherhood responsibilities. In all chapters, readers will find how women negotiate their traditional roles in a new sociocultural milieu, and how mothering processes are critical in creating connections with traditions and homelands.

Regulating Flexibility Springer Science & Business Media

Social models are always contested and ambiguous. This is particularly evident in the field of human resources management, where decisions that ultimately affect the patterns of social relations are made every day. This collection of in-depth essays focuses on some central human resources elements - gender, youth, ageing, educational background, training, workers' rights - providing an up-to-date summary and analysis of how employers are dealing - and should be dealing - with workforce characteristics under current globalized forces. The emphasis is on Europe, but valuable insights come also from Chile, Canada, and the United States. Sixteen experts discuss such important issues as the following: the shift from intervention in favour of workers' rights towards corporate neo-liberal policies; importance of transnational framework agreements in countries where a trade union; tradition is lacking; evidence that provision of childcare promotes female labour market participation; short-time working, labour hoarding, and labour underutilization; enhancing training policies for employable skills; enforcement of corporate social responsibility; alarmingly high rates of precarious employment; worldwide decline of full-time permanent positions; pension system reform; over-exposure of young people to non-standard employment; discouraged workers; regional imbalances in employment policy; and weaknesses of education programmes in connection with the world of work. Industrial relations and human resources professionals as well as employment lawyers worldwide will welcome this incisive analysis, and academics everywhere are sure to benefit from its evidence, insights, and proposals. The book presents a selection of papers from the

international conference in commemoration of Marco Biagi entitled Europe 2020: Comparative Perspectives and Transnational Action, held at the Marco Biagi Foundation in Modena, Italy. 17-19 March 2011.

The Wiley Handbook of Vocational Education and Training McGill-Queen's Press - MQUP
Informative and helpful essays that study census data regarding developments in Canadian society.
Teaching the World UBC Press

A central claim of this volume is that public policy in education and training can only be properly understood if it is seen in relation to prevailing economic and employment conditions. It has become increasingly apparent that the neo-liberal economic policies pursued by Western governments during the 1980s and 1990s have led to a growing world-wide 'work crisis'. Unemployment levels, particularly in Europe, remain persistently high, and for those in employment, job insecurity and long working hours have become the norm. The response of UK governments has been to promote 'flexibility' in employment practices while proclaiming the importance of improving skill levels through education and training. This volume challenges the adequacy of such an approach, and asks whether reliance on education and training reforms without additional political intervention in economic processes is capable of reversing current trends. Issues covered in this reader include: * the impact of globalization on employment trends * neo-liberal and neo-Keynesian approaches to employment policy * political reforms in education and training institutions * the impact of flexibilization on private life and the family. The two volumes in this series are readers for the Open University course Education, Training and the Future of Work, E837, a module of the MA in Education. The companion volume is Education, Training and the Future of Work II: Developments in Vocational Education and Training. John Ahier is Lecturer in Education at the Open University. Geoff Esland is Director of the Centre for Sociology and Social Research at the Open University and Course team Chair of E837.

Computers on the Job James Lorimer & Company

Management consultant Kenichi Ohmae describes the new reality of global economic competition as a 'borderless world'. What is the future of human values, and of environmental quality, in such a world? The authors whose work is collected in *Surviving Globalism* try to answer these questions from the point of view of sociology, social history, philosophy, geography and political theory. Many argue that the gains made over the last few decades in terms of social justice and environmental protection are in grave peril. Others take a somewhat more optimistic note, but all emphasize the importance of dealing with environmental and social policy against the background of a transforming global economy.

A Tribute to David N. Wilson Scarborough, Ont. : Nelson Canada

Re-issuing volumes originally published between 1949 and 1995 this 31 volume set examines the theory and behaviour of organizations. Topics covered include: the sociology of work leadership and organizations politics at work theory and practice of company organization patterns of business organization company strategy and organizational design.

Choosing to Labour? McGill-Queen's Press - MQUP

This book catalogues an exhibition of textbooks by authors from the University of Alberta. Each finished textbook contains its own story of challenges and victories. And each has its own power as a record of knowledge, a teaching tool, and an object of permanence and beauty.
