 What's the secret to sales success? If
 you're like most business leaders, you'd

say it's fundamentally about relationships-
 and you'd be wrong. The best salespeople
 don't just build relationships with
 customers. They challenge them. The
 need to understand what top-performing
 reps are doing that their average
 performing colleagues are not drove
 Matthew Dixon, Brent Adamson, and their
 colleagues at Corporate Executive Board
 to investigate the skills, behaviors,
 knowledge, and attitudes that matter most
 for high performance. And what they
 discovered may be the biggest shock to
 conventional sales wisdom in decades.
 Based on an exhaustive study of
 thousands of sales reps across multiple
 industries and geographies, The
 Challenger Sale argues that classic
 relationship building is a losing approach,
 especially when it comes to selling
 complex, large-scale business-to-business
 solutions. The authors' study found that

every sales rep in the world falls into one
 of five distinct profiles, and while all of
 these types of reps can deliver average
 sales performance, only one-the
 Challenger- delivers consistently high
 performance. Instead of bludgeoning
 customers with endless facts and features
 about their company and products,
 Challengers approach customers with
 unique insights about how they can save
 or make money. They tailor their sales
 message to the customer's specific needs
 and objectives. Rather than acquiescing to
 the customer's every demand or objection,
 they are assertive, pushing back when
 necessary and taking control of the sale.
 The things that make Challengers unique
 are replicable and teachable to the
 average sales rep. Once you understand
 how to identify the Challengers in your
 organization, you can model their
 approach and embed it throughout your

sales force. The authors explain how almost any average-performing rep, once equipped with the right tools, can successfully reframe customers' expectations and deliver a distinctive purchase experience that drives higher levels of customer loyalty and, ultimately, greater growth.

This book provides practitioners with detailed experiences from industry on the implementation and use of collaboration technologies. Despite the increasing range of applications available - such as video and desktop conferencing systems, workflow management systems and on-line meeting schedulers - there is still little formalized knowledge on how to implement them to maximum effect. This book aims to fill that gap by looking at all the issues from the viewpoint of the implementation team, and focuses on strategies for overcoming various obstacles and measures which can be taken to enable effective use.

BUSINESS STRATEGY. "The 4 Disciplines of Execution" offers the what but also how effective execution is achieved. They share numerous examples of companies that have done just that, not once, but over and over again. This is a book that every leader should read! (Clayton Christensen, Professor, Harvard Business School, and author of "The Innovator's Dilemma)." Do you remember the last major initiative you watched die in your organization? Did it go down with a loud crash? Or was it slowly and quietly suffocated by other competing priorities? By the time it finally disappeared, it's likely no one even noticed. What happened? The whirlwind of urgent activity required to keep things running day-to-day devoured all the time and energy you needed to invest in executing your strategy for tomorrow. "The 4 Disciplines of Execution" can change all that forever.
