Step in Environmental Science Benjamin-Cummings Publishing Company
For introductory courses in Environmental Science, Environmental Studies, and Environmental Biology. With dramatically revised illustrations, the Twelfth Edition of Environmental Science: Toward a Sustainable Future is even more student-friendly while retaining the currency and accuracy that has made Wright/Boorse a

best seller. The text and media program continue to help you understand the science behind environmental issues and what you can do to build a more sustainable future, with further exploration of the hallmark core themes: Science, Sustainability, and Stewardship.
Environment Pearson
For courses in introductory environmental science. Pearson eText offers an affordable, simple-to-use, mobile reading experience that lets instructors and students extend learning beyond class time. Students can study, highlight, and

take notes in their Pearson eText on Android and iPhone mobile phones and tablets -- even when they are offline. Educators can also add their own notes and highlights directly in the eTextbook so that students see what is important for their particular course. Help Students Connect Current Environmental Issues to the Science Behind Them Pearson eText for Environment: The Science behind the Stories is a best seller for the introductory environmental science course known for its student-friendly narrative style, its integration of real stories and case

studies, and its presentation of the latest science and research. The 6th Edition features new opportunities to help students see connections between integrated case studies and the science in each chapter, and provides them with opportunities to apply the scientific process to environmental concerns. This loose-leaf, three-hole punched version of the textbook gives students the flexibility to take only what they need to class and add their own notes-all at an affordable price. For Introductory Environmental Science Courses (Non-Majors). Build and practice skills needed to understand complex environmental issues *The Environment and You*, 3rd Edition, by Norm Christensen, Lissa Leege, and new co-author Justin St. Juliana, gives today's generation of students reason to be hopeful about environmental challenges.

The authors draw on their pedagogical expertise and classroom experience to help students establish a reliable foundation in science. The unbiased approach of the text equips students with important analytical and quantitative reasoning skills, including how to ask questions to seek information required to develop informed opinions. The authors strive to inspire students, by connecting the course to choices they can make as citizens and demonstrating the role science can play in influencing personal, community, and global environmental issues. With the 3rd Edition, new features include You Decide which presents complex environmental issues and invites students to take a position and consider the results of their position. New Misconceptions address common student misunderstandings related to matters of scientific fact and tackle them head on. The textbook is closely integrated with Mastering(TM) Environmental Science to support instructors and students with a wide variety of engaging assignments and activities.

The Environment and You Pearson Educacion

Engage students in science through current environmental issues. *Essential Environment: The Science Behind the Stories*, 6th Edition by Jay Withgott and Matt Laposata, is the #1 book in the introductory environmental science market and known for its student-friendly narrative style, integration of real stories and case studies, and presentation of the latest science and research. The 6th edition features new opportunities to help

students see connections between integrated case studies and the science in each chapter, and highlights sustainable solutions that have successfully helped address environmental problems. Coverage of topical issues upholds the text's hard-won reputation for currency, using the most recent data available and focusing on emerging issues. Updates include new features such as Success Stories that demonstrate positive solutions to address local, national, and global environmental problems. New Case Study Video Tours take students on a virtual tour of the locations featured in each chapter's Central Case Study and can be assigned in Mastering Environmental Science. The succinct and affordable 6th Edition is streamlined with updated coverage and carefully crafted to make the text readable, informative, and engaging. For courses in introductory environmental science. Pearson eText allows educators to easily share their own notes with students so they see the connection between their reading and what they learn in class -- motivating them to keep reading, and keep learning. Portable access lets students study on the go, even offline.

And, student usage analytics offer insight into how students use the eText, helping educators tailor their instruction. NOTE: This ISBN is for the Pearson eText access card. complete list of chapter learning objectives, a pacing guide, a comprehensive list of additional chapter resources, and a list of relevant free response questions from previous APES® exams. AP Environmental Science WH Freeman Welcome to a new introductory environmental science book that offers students a reliable science foundation and inspires them to connect the course to the choices they can make as citizens. It's about science-informed by decades of careful research by generations of scientists and presented in a manner non-science majors understand. It's about solutions--offering a fresh alternative to "doom and gloom" by emphasizing problem solving and scalable solutions so students can make more informed choices on actions to support the well-being of humans and the planet. It's about today's students--making navigating information, focusing, and learning easier for a wide range of students. It's written by a world-class scientist and dedicated teacher -- author Norm Christensen was elected Fellow of the American Association for the Advancement of Science, is founding dean

of the Nicholas School of the Environment, and has served as president of the Ecological Society of America. He is also a gifted teacher who has taught the introductory environmental science course for over 15 years and won a Distinguished Teaching Award.
