Writers Digest Books
A new book just hitting the marketplace will be a welcome guide to many cash strapped owners of vacation and second homes in this difficult real estate environment. Making Money on Your Vacation Rental Home is the title of this detailed "how to" book recently published by Howard Jones, a CPA and licensed real estate broker who has owned and managed his own vacation rental homes. Subtitled An Essential Handbook for Managing Your Short Term Vacation and

Resort Rental Property for Maximum Enjoyment and Profit, this comprehensive 400 page handbook includes a chapter by chapter guide for rental home owners who wish to take advantage of the new opportunity that has emerged in recent years to self manage their rental homes by using commercial rental web sites. Besides covering owner rental management, specifics are provided on related topics such as maintaining the necessary computer resources and the tax implications for buying, selling and owning vacation homes. *The Cultivator & Country Gentleman*
Nick Ellis

Doing Youth Participatory Action Research offers an unprecedented, in-depth exploration of the pragmatics and possibilities of youth-driven research. Drawing upon multiple years of experience engaging youth in rigorous, critical inquiry about the conditions impacting their lives, the authors examine how YPAR encourages the educational community to re-imagine the capabilities of young people and the purposes of teaching, learning, and research itself. Much more than a "how-to" guide for those interested in creating their own YPAR projects, this book draws upon the voices of students and educators, as well as the multiple historical

traditions of critical research, to describe how youth inquiry transforms each step of the traditional research process. From identifying research questions to collecting data and disseminating findings, each chapter details how YPAR revolutionizes traditional conceptions of who produces knowledge, how it is produced, and for what purposes. The book weaves together research, policy, and practice to offer YPAR as a practice with the power to challenge entrenched social and educational inequalities, empower critically aware youth, and revolutionize pedagogy in classrooms and communities. For researchers, educators, community members,

and youth who want to connect, question, and transform the world collectively, Doing Youth Participatory Action Research is a rich source of both pragmatic methodological guidance and inspiration.

Rowman & Littlefield
This report concludes that the Government must employ a basket of measures, covering all tenures of housing, if sufficient finance is ever to be available to tackle the country's housing crisis. For decades, successive Governments have failed to deliver sufficient homes to meet demand. The country faces a significant housing shortfall, and the financial crisis has

amplified the problem. 232,000 new households are forming each year in England, and yet in 2011 fewer than 110,000 new homes were completed. The Committee sets out four key areas for action, which, taken together, could go a long way to raising the finance needed to meet the housing shortfall: large-scale investment from institutions and pension funds; changes to the financing of housing associations, including a new role for the historic grant on their balance sheets; greater financial freedoms for local authorities; new and innovative models, including a massive expansion of self build housing.

Discovering Dynamical Systems Through Experiment and Inquiry differs from most texts on dynamical systems by blending the use of computer simulations with inquiry-based learning (IBL). IBL is an excellent tool to move students from merely remembering the material to deeper understanding and analysis. This method relies on asking students questions first, rather than presenting the material in a lecture. Another unique feature of this book is the use of computer simulations. Students can discover examples and counterexamples through manipulations built into the software. These tools have long been used in the study of dynamical systems

to visualize chaotic behavior. We refer to this unique approach to teaching mathematics as ECAP—Explore, Conjecture, Apply, and Prove. ECAP was developed to mimic the actual practice of mathematics in an effort to provide students with a more holistic mathematical experience. In general, each section begins with exercises guiding students through explorations of the featured concept and concludes with exercises that help the students formally prove the results. While symbolic dynamics is a standard topic in an undergraduate dynamics text, we have tried to emphasize it in a way that is more detailed

and inclusive than is typically the case. Finally, we have chosen to include multiple sections on important ideas from analysis and topology independent from their application to dynamics.

Inquiry Learning Through Integration
Routledge

“With over 3.5 million homeschooled students in the U.S., this book admirably explores the intersection of this growing and important grass roots movement and libraries of all kinds, showing how and why libraries are a vital element in the homeschooling movement.”—Bruce R. Schueneman, Library Director, James C. Jernigan Library, Texas A&M University-Kingsville “A rich and

exciting sourcebook for librarians serving those outside of formal schooling.”—Tim

Gorichanaz, Drexel University, Philadelphia

“This book effectively covers all the bases ensuring positive experiences and outcomes for libraries serving home school families in their service areas.”—Deb Biggs Tenbusch, Librarian and Account Manager, Gale, Cengage Learning, Farmington Hills, Michigan

“Whether starting new programs or expanding current ones, these chapters will help you to engage and prepare your resources to help homeschoolers.”—Kathleen Christy, Adult Services Manager, Blount County Public Library, Maryville, Tennessee “21st century homeschoolers

are facing new challenges and this book presents fresh solutions and describes opportunities you may not realize existed for your library to serve these important patrons.”—Robert Perret, Contributor, Creativity for Library Career Advancement “I think infinite possibilities best describes this must-read book for public and academic librarians who seek to find ways to engage, support and serve the growing homeschool community.”—Anastasi a Varnalis-Weigle, Associate Professor, University of Maine, Augusta “Librarians of all types, as well as library stakeholders, will find Homeschooling and Libraries a great resource to help

identify needs and ways to support the growing homeschooling community.”—Michelle McKinney, Reference and Web Services Librarian, University of Cincinnati Blue Ash College, Cincinnati, Ohio “An impressively-researched volume that draws on a variety of perspectives, offering insight into the needs of homeschooled populations, including case studies, needs assessment, and future possibilities for programming, continuing education, and outreach.”—Erin Pappas, Research Librarian for the Humanities, University of Virginia Libraries “This practical book will assist libraries as they develop ways to reach out to home

educating families.”—Ruth Elder, Cataloging Librarian, Troy University, Troy, Alabama “This book reopened my mind to the wonders that libraries in all of their aspects and attributes have to offer students including the unique and diverse students who are homeschooled.”—Jim Jipson, University of West Florida, Pensacola, Florida As families are looking for better ways to educate their children, more and more of them are becoming interested and engaged in alternative ways of schooling that are different, separate, or opposite of the traditional classroom. Homeschooling has become ever more creative and varied as families create custom-

tailored curricula, assignments, goals, and strategies that are best for each unique child. This presents a multitude of challenges and opportunities for information institutions, including public, academic, school, and special libraries. The need for librarians to help homeschool families become information and media literate is more important than ever. This collection of essays provides a range of approaches and strategies suggested by skilled professionals as well as veteran homeschool parents on how to best serve the diverse needs and learning experiences of homeschooled youth. It includes information on needs assessments for special needs students,

gifted students, and African American students; advice on how to provide support for the families of homeschoolers; case studies; and information on new technologies that could benefit libraries and the homeschooler populations that they serve.

What are your organization's policies for generating and using huge datasets full of personal information? This book examines ethical questions raised by the big data phenomenon, and explains why enterprises need to reconsider business decisions concerning privacy and identity. Authors Kord Davis and Doug Patterson provide methods and techniques to help your business engage in a transparent and productive ethical inquiry into your current data practices. Both individuals and organizations have

legitimate interests in understanding how data is handled. Your use of data can directly affect brand quality and revenue—as Target, Apple, Netflix, and dozens of other companies have discovered. With this book, you'll learn how to align your actions with explicit company values and preserve the trust of customers, partners, and stakeholders. Review your data-handling practices and examine whether they reflect core organizational values Express coherent and consistent positions on your organization's use of big data Define tactical plans to close gaps between values and practices—and discover how to maintain alignment as conditions change over

time Maintain a balance between the benefits of innovation and the risks of unintended consequences

A Handymanual for Scrupulous Landlords and Landladies who Do it Themselves "O'Reilly Media, Inc."

I Is for Inquiry takes a unique approach to helping teachers in the elementary grades create lessons and sustain inquiry in their classrooms. This colorful, illustrated alphabet book explores 26 (including X and Z) key ideas and skills in inquiry-based teaching and learning, such as collaboration, dialogue, evidence, hypothesis,

and scaffolding. Each short chapter:
Summarizes one inquiry element that can be built into students' experiences. Uses straightforward language and examples. Includes a classroom vignette and suggestions for using the concept. Shares selected references and related Internet-based resources. Helps teachers build self-confidence about teaching through inquiry. This book will serve as a familiar and fun resource for busy teachers at any point in their careers. Using the inquiry vocabulary and repertoire of concepts, teachers can build curriculum and share ideas with colleagues, making inquiry in the classroom as approachable as ABC!

Nolo

There exists a wealth of information about inquiry and about science, technology, engineering, and mathematics (STEM), but current research lacks meaningfully written, thoughtful applications of both topics. Cases on Inquiry through Instructional Technology in Math and Science represents the work of many authors toward meaningful discourse of inquiry used in STEM teaching. This book presents insightful information to teachers and teacher education candidates about using inquiry in the real classroom, case studies from which research suggests appropriate uses, and tangible direction for creating their own

inquiry based STEM activities. Sections take the reader logically through the meaning of inquiry in STEM teaching, how to use technology in modern classrooms, STEM projects which successfully integrate inquiry methodology, and inquiry problem solving within STEM classrooms with the aim of creating activities and models useful for real-world classrooms.

Landlording McFarland

Based on research that demonstrates the powerful advantages of integrating the curriculum while providing inquiry opportunities, The Early Childhood Curriculum shows how to make such an approach work for all children, preschool through the primary

grades. The text demonstrates how to confidently teach using inquiry-based methods that address the whole child, while also meeting and exceeding academic standards. Offering a foundation in early childhood theory, philosophy, research, and development, the 2nd edition of this unique textbook helps future teachers, as well as current educators, understand the "why" of curriculum in early childhood and invests them with the skills they need to move from simply following a script to knowledgeably creating curricula on their own. Since each curricular subject has its own integrity, there is a chapter for each discipline, grounding the reader in the

essentials of the subject in order to foster knowledgeable and effective integration. The 2nd edition of The Early Childhood Curriculum includes information on the most recent trends in national curriculum standards, particularly in regard to the Common Core State Standards Initiative and the Next Generation Science Standards. Coupled with this information are practical suggestions for meeting standards while still providing young learners with a truly child-centered educational experience. Chapters contain real-life vignettes that demonstrate inquiry and integration in practice. The entire text reflects the

philosophy that the use of inquiry to seek and obtain information is one of the most valuable and powerful tools children can acquire along the way to becoming lifelong learners.

Survey of Conditions of the Indians in the United States Kaplan Publishing

Nwanna provides comprehensive information on travel to more than 170 countries, and addresses diverse concerns regarding personal safety, finances, illness, birth and marriage, and more.

Transforming Inquiry with Researchers, Educators, and Students Routledge

This volume highlights work being done in qualitative inquiry through a variety of

critical lenses such as new materialism, queer theory, and narrative inquiry. Contributors ranging from seasoned academics to emerging scholars attend to questions of ontology and epistemology, providing, in the process, insights that any qualitative researcher interested in the state of the field would find of value.

The authors: re-think taken-for-granted paradigms, frameworks, methodologies, ethics, and politics; demonstrate major shifts in qualitative inquiry, and point readers in new and exciting directions; advocate for a critical qualitative inquiry that addresses social justice, decolonization, and the politics of research; present

plenary addresses and other key original papers from the 2015 International Congress of Qualitative Inquiry. This title is sponsored by the International Association of Qualitative Inquiry, a major new international organization which sponsors an annual Congress.

Making and Writing Creative, Qualitative Research IGI Global Artful Collaborative Inquiry comprises essays created collectively by a group of scholars and artists, the majority of whom have several decades of experience of working together. The book challenges commonly-held, individualistic beliefs about ownership, authorship and scholarly and artistic

ethics and practices. The essays exemplify the entangled kinds of scholarly and artistic works that emerge in a post-human world, where humans, other species, environments, things and other matters, all matter and are of equal concern in the conduct of ethical artful scholarship. Situated at the (messy) crossroads where contemporary scholarship and artistic practice converge, the seamless mo(ve)ment and interplay between text and image make up the main body of the work in this book. The chapters combine the playful use and merging of time, space and place, researcher and researched, to give a unique exemplar of research and creativity in the rapidly emerging field of

collaborative scholarship. It will be of particular interest to creative and qualitative scholars

wishing to conduct more artful research, and artists engaging with scholarship.
