LAYLAH SOFIA

Making Citizens Rowman & Littlefield

This book explores four interrelated themes: rethinking civic education in light of the diversity of U.S. society; re-examining these notions in an increasingly interconnected global context; re-considering the ways that civic education is researched and practiced; and taking stock of where we are currently through use of an historical understanding of civic education. There is a gap between theory and practice in social studies education: while social studies researchers call for teachers to nurture skills of analysis, decision-making, and participatory citizenship, students in social studies classrooms are often found participating in passive tasks (e.g., quiz and test-taking, worksheet completion, listening to lectures) rather than engaging critically with the curriculum. Civic Education for Diverse Citizens in Global Times, directed at students, researchers and practitioners of social studies education, seeks to engage this divide by offering a collection of work that puts practice at the center of research and theory.

Building Better Citizens Boston, Houghton [1914]

In *Teaching America*, more than 20 leading thinkers sound the alarm over a crisis in citizenship—and lay out a powerful agenda for reform. The book's unprecedented roster of authors includes Justice Sandra Day O'Connor, Senator Jon Kyl, Senator Bob Graham, Secretary Rod Paige, Alan Dershowitz,

Juan Williams, Glenn Reynolds, Michael Kazin, Frederick Hess, Andrew Rotherham, Mike Feinberg, Seth Andrew, Mark Bauerlein and more. Their message: To remain America, our country has to give its kids a civic identity, an understanding of our constitutional system, and some appreciation of the amazing achievements of American self-government. But we are failing. Young Americans know little about the Bill of Rights, the democratic process, or the civil rights movement. Three of every four high school seniors aren't proficient in civics, nine of ten can't cut it in U.S. history, and the problem is only aggravated by universities' disregard for civic education. Such civic illiteracy weakens our common culture, disenfranchises would-be voters, and helps poison our politics.

Civic Education for Diverse Citizens in Global Times Routledge

"This book explores how to forge more empowering and equitable spaces for civic learning by centering the agency and lived experiences of marginalized groups. It reimagines the role of education in preparing all kids for democratic participation, highlights a crucial point of political socialization, and provides actionable advice for policymakers hoping to equalize democratic opportunities for young people in the United States. The book makes four primary claims. First, it argues that traditional civic education courses have not lived up to their promise to foster democratic capacity, especially for marginalized students. In response, it presents a new approach to civic education that aims to foster political empowerment by centering critical categories of knowledge—those that highlight the agency and grassroots political action of marginalized groups— and historically grounded conversations about current events. Second, it demonstrates that such an approach to civic education increases rates of intended political

participation among young people of color and heightens political empathy among white youth. Third, it highlights the agency of teachers in processes of socialization, exploring how their attitudes and lived experiences drive the creation and implementation of more empowering civic learning environments. Fourth, it argues that teachers and students—those who spend the most time in social studies classrooms—should drive initiatives to revitalize civic education. These insights should inform the work of policymakers looking to make civic education more empowering for young people throughout the United States”—

Teaching Civics in the Library Teachers College Press

What are the philosophical and historical foundations of the American political system? -- How did the framers create the Constitution? -- How has the Constitution been changed to further the ideals contained in the Declaration of Independence? -- How have the values and principles embodied in the Constitution shaped American institutions and practices? -- What rights does the Bill of Rights protect? -- What challenges might face American constitutional democracy in the twenty-first century? -- Reference.

Civic Sociology Springer

Learning about civics shouldn't be boring. How America Works gives teens a fun, behind-the-scenes look at how the U.S. government works, why they should care and how they can get involved. But this isn't just any old civics primer. Appealing graphics and a conversational tone draw readers in from the very first page. Political cartoons and debates spark critical thought. And age-appropriate explanations make even the most complex civics topics accessible and easy to understand. In short, this comprehensive guide has everything teens need to know about government and civic engagement (and probably don't). 11 easily digestible units From the Declaration of Independence to civil rights and immigration, How America Works helps readers understand the foundations of our nation and the key civic issues facing America today—without dry or complicated language. Ideas for civic engagement It's easy for teens to feel like the government doesn't matter to them. But when they see their interests and concerns reflected on every page, they'll feel empowered to get involved. And we've got plenty of ideas to help them out. Perfect for teachers or parents Your middle- and high-school students are the voters, active citizens, and community leaders of tomorrow. When you give them How America Works, you're giving them a guide to making their voices heard. Exclusive online bonus Order now and get access to online videos, lessons and writing extensions that expand on the topics covered in the book. Here's what we cover: The Declaration of Independence The Constitution The Bill of Rights How Washington Works Supreme Court Cases Every Student Should Know The Presidency Why Voting Matters The Long Struggle for Civil Rights Immigration: Who Gets to Be an American? You and the Media Could You Pass America's Citizenship Test?

The Teaching of Civics R&L Education

This scarce antiquarian book is a facsimile reprint of the original. Due to its age, it may contain imperfections such as marks, notations, marginalia and flawed pages. Because we believe this work is culturally important, we have made it available as part of our commitment for protecting, preserving, and promoting the world's literature in affordable, high quality, modern editions that are true to the original work.

Teaching America IAP

As former elementary school teachers, the authors focus on what is possible in schools rather than a romantic vision of what schools could be. Based on a 5-year study of an elementary school, this book shows how civic engagement can be purposive and critical—a way to encourage young people to examine their environment, to notice and question injustices, and to take action to make a difference in their communities and school. Focusing on the intersection of student voice and critical inquiry, the book describes how to embed civic engagement into curriculum, school decision-making processes, and whole-school activities. Chapters provide an overview of what research has demonstrated about civic engagement at the classroom, school, and community levels, including detailed descriptions of activities and lessons for practice. Classroom teachers, school principals, community members, and teacher educators can use this resource to foster a deeper, richer understanding of what is entailed in civic life. Book Features: A vivid portrait of a “typical” public school that wants to do more than teach to the test. An examination of the conditions that enable young people to participate in democratic practices, including identifying and questioning injustices. Concrete examples of student voice and critical inquiry in classroom contexts. Practices and activities that encourage children to get along with others, exchange perspectives, and work across differences. “Offers a suggestive range of evidence that high-quality civic engagement initiatives can enhance students’ academic, social, and emotional engagement. . . . It reveals the nitty-gritty of how experienced teachers can enable children who are immersed in meaningful civic work also to engage more deeply with mathematical problem-solving, peer collaboration, literacy and social studies learning, and development of empathy and mutual trust.” —From the Foreword by Meira Levinson “Mitra and Serriere show us not only that elementary-aged children are capable of civic engagement, but how such engagement can be nurtured in the classroom. Children can be active civic participants; this book demonstrates both the power of this idea and how we might accomplish this essential task.” —Beth C. Rubin, Rutgers University

No Reluctant Citizens Rowman & Littlefield

From its formative years to the present, advocates of various persuasions have written and spoken about the country's need for moral and civic education. Responding in part to challenges posed by B. Edward McClellan, this book offers research findings on the ideas, people, and contexts that have influenced the acquisition of moral and civic learning in the America.

Civic Education in the Elementary Grades Center for Civic Education

This text takes a clear stance: Social studies is about citizenship education - citizenship not only as a noun, but as a verb, something one DOES. Based on this clear curricular and pedagogical purpose, it lays out a holistic and multicultural three-part process for civic preparation: becoming informed, thinking it through, and taking action. Six outstanding teaching strategies and teaching/learning projects throughout bring this framework life.

Secondary School Manual: Syllabus for the Social Sciences Russell Sage Foundation

Voluntary national content standards for civics education for grades K-12, supported by the US Department of Education.

A Suggested Course of Study in American Government for Senior High School Social Studies Routledge

American political culture runs through civics classrooms, and the degraded dialogue and scorched-earth partisanship that has defined modern American politics is an indicator that all is not well in our nation's schools. Teaching Civics in Unstable Times: Guidelines for Defining “We” in

American Democracy offers a fresh, expansive view of what civic education can look like in K-12 classrooms, and presents three strategies to help teachers, curriculum writers, and administrators turn their schools into laboratories for democracy that train young people for the moral and intellectual challenges of democratic citizenship. This book defines “democracy” as a way of life that is characterized by frequent public engagement, stubborn open-mindedness, and rigorous debate. Our democratic government depends on our citizens leading a democratic life, and civic education's chief priority is to teach young people how to do so. Civic curriculum has spent decades obsessing over names and dates that fail to give students a sense of their vaunted place in our governing system. This book presents three strategies for teaching civics that invest young people in our shared, grand experiment in self-government and prepares them to lead our nation towards a politics that is more compassionate, inclusive, and inspired.

Reassessing the Social Studies Curriculum McFarland

A Student's Guide to American Civics -- The four books in this series offer important answers to the basic questions about living in America and being a U.S. citizen. Profiling one civics concept in each volume, the books provide up-to-date information concerning real issues that affect each of us daily.

American Civics for the Seventh and Eighth School Years (1913) Routledge

Can social studies classrooms be effective “makers” of citizens if much of what occurs in these classrooms does little to prepare young people to participate in the civic and political life of our democracy? Making Citizens illustrates how social studies can recapture its civic purpose through an approach that incorporates meaningful civic learning into middle and high school classrooms. The book explains why social studies teachers, particularly those working in diverse and urban areas, should infuse civic education into their teaching, and outlines how this can be done effectively. Directed at both pre-service and in-service social studies teachers and designed for easy integration into social studies methods courses, this book follows students and teachers in social studies classrooms as they experience a new approach to the traditional, history-oriented social studies curriculum, using themes, essential questions, discussion, writing, current events and action research to explore enduring civic questions. Following the experiences of three teachers working at three diverse high schools, Beth C. Rubin considers how social studies classrooms might become places where young people study, ponder, discuss and write about relevant civic questions while they learn history. She draws upon the latest sociocultural theories on youth civic identity development to describe a field-tested approach to civic education that takes into consideration the classroom and curricular constraints faced by new teachers.

We the People Routledge

American democracy is at a critical crossroads. Racor, division, and suspicion are the unfortunate byproducts of the contentious 2016 presidential election. The election also bred a measure of civic uncertainty where citizens of all ages struggle to find and define their roles within a functioning democracy. No Reluctant Citizens: Teaching Civics in K-12 Classrooms is designed to help social studies teachers reinforce the centrality of civic education through a series of hands-on, participatory, and empowering activities. From civic literacy to human rights, from service learning to controversial issues, No Reluctant Citizens: Teaching Civics in K-12 Classrooms explores an array of topics that ultimately provides K-12 students the conceptual and practical tools to become civically engaged.

Civics for New Americans Scholastic Teaching Resources

Civics education is “on the books” in all 50 states, yet civic illiteracy is widespread. Only one third of 12th graders are able to explain the significance of the Declaration of Independence, and fewer than half of 8th graders know the purpose of the Bill of Rights. This instructional guide explores the foundations of civics education—and the reasons for its demise—with commentary from civics education leaders and scholars across the nation. Questions for eliciting civics discussion are provided for all grade levels, along with detailed civic action and service projects and reading plans. Best practices and grant writing options are included. The author argues for a return to early 20th century civics education and details the traditional and present-day role of America's libraries in developing a civic-minded populace. School and public librarians are urged to utilize trade books and carefully evaluated websites to integrate civics within educational and youth services offerings.

How America Works Russell Sage Foundation

Schooling Corporate Citizens examines the full history of accountability reform in the United States from its origins in the 1970s and 1980s to the development of the Common Core in recent years. Based in extensive archival research, it traces the origins and development of accountability reform as marked by key government- and business-led reports—from A Nation at Risk to No Child Left Behind and Race to the Top. By using the lens of social studies and civic education as a means to understand the concrete impacts of accountability reforms on schools, Evans shows how reformers have applied principles of business management to schools in extreme ways, damaging civic education and undermining democratic learning. The first full-length narrative account of accountability reform and its impact on social studies and civic education, Schooling Corporate Citizens offers crucial insights to the ongoing process of American school reform, shedding light on its dilemmas and possibilities, and allowing for thoughtful consideration of future reform efforts.

Social Civics McGraw Hill Professional

Educating for citizenship was the original mission of American schools, but for decades that knowledge—also known as civics education—has been in decline, as schools have shifted focus to college and career, STEM, and raising reading and math scores. But over the last few years, spurred on by political polarization and a steep decline in public understanding, civics education is seeing a nation-wide resurgence, as school leaders, educators, and parents recognize the urgency of teaching young people how America works—especially young people who have been marginalized from the political system. But this isn't your grandmother's civics. The “new” civics has been updated and re-tooled for the phone-addicted, multi-cultural, globalized twenty-first century kid. From combatting “fake news” with fact checking in Silicon Valley, to reviving elementary school social studies in Nashville, to learning civic activism in Oklahoma City, journalist Holly Korbey documents the grassroots revival happening across the country. Along the way, she provides an essential guidebook for educators, school leaders and caregivers of all types who want to educate a new generation of engaged citizens at a critical time in American democracy.

Teaching Civics in Unstable Times Rowman & Littlefield

Everything parents need to help their kids succeed in social studies The only comprehensive social studies skill-building series available, the Get

Ready! For Social Studies series equips proactive parents with the tools they need to help their children develop the core skills required to perform at grade level in social studies-related subjects. This title covers the foundations of American government, the rights and responsibilities of U.S. citizens, the three-branch organization of American government at federal, state, and local levels, and comparative government.

Social Civics Routledge

Engage students in meaningful civic learning and encourage them to become active and informed citizens. With this essential book, co-published by Routledge and MiddleWeb, you will gain a variety of practical strategies for teaching civics and current events to your middle school students. Author and expert teacher Sarah Cooper takes you into her school and shares her classroom-tested methods and tools. Topics include: Fitting current events into an already-packed history curriculum Staying nonpartisan and fostering balanced discussions Helping students find their stake in the news

Teaching civic literacy through primary sources, then and now Encouraging students to invest in analytical writing Fostering student ownership of our classrooms through discussion and debate Cultivating citizenship through empathy and community engagement Throughout the book, you'll find student examples, handouts, and rubrics, so that you can easily implement the ideas in your own classroom. By getting your students to think critically about current events, you will help them become passionate writers, thinkers, and involved citizens.

Young Citizens of the World Oxford University Press

Hailed as a stellar educational resource for nearly a century, Magruder's American Government is updated annually to meet the changing needs of today's high school students and teachers. The program's engaging narrative is enhanced with numerous primary sources, political cartoons, charts, graphs, and photos, making the structure and principles of government accessible and motivating to students of all abilities.
